Subj: No mention of the codes....? 95-07-18 08:16:18 EDT
From: Vanth

Odd that I find no mention of the cheat codes in this folder...

I had 3 of them and just got another off the net (haven't tested this last one yet)
To input the codes:

- 1) pause the game
- 2) hold down the right shift button
- 3) spell the code out using the D-pad and A,B, and C buttons, holding that right shift button the whole time

The available letters are N,S,W,E,U,D,L,R,A,B, and C

N,U = North, Up --> Up on the D-pad

S,D = South, Down --> Down on the D-pad

W,L = West, Left --> Left on the D-pad

E,R = East , Right --> Right on the D-pad

If you entered a code correctly then the cheat activates and the game unpauses. All codes begin with LCD.

The first 3 are:

LCD RUNNER this one gives you that limited time speed up

LCD EEL gives you 3-way electric breath (no sound effect for this on levels where this power-up would not normally be found, but it still works fine.)

LCD NUCLEAR a weird kind of limited invulnerability. You can walk through monsters and don't take damage from them or their shots. However, the liquid rez pools, red liquid, or falls to bottomless areas (as in the toon level "Rock-it!") can and will kill you

and last but not least, the latest (untested by me) code:

LCD RUBBER - this one reportedly gives you the Grasshopper Jump powerup.

Enjoy, and post any new codes in here! I'm always looking for new ones as my eye hand coordination isn't what it used to be.

as always, I remain...
