

Fred Fish Disk 951

IconMiser Intercepts attempts by programs to create icons and substitutes images or icons you prefer in their place. Easy to configure, works with 1.2 or above. Supports icon drag-n-drop with 2.0 or above. Version 2.0, binary only. Author: Todd M. Lewis

MaxonMAGIC Demoversion of the commercial program MaxonMAGIC, an animated screenblinker and crazy soundprogram. The complete version includes 15 different blankers and two disks full of samples. The demo is almost completely operational. Settings can't be saved and it will also remind the user that it is a demo every now and then. Author: Klaus-Dieter Sommer, distributed by MAXON Computer

Fred Fish Disk 952

MachV Release 5.0, version 37.5 of the hotkey/macro/multipurpose utility. You can record keystrokes and mouse events, manipulate screens and windows, popup a shell, view the clipboard, blank the screen and much more. This release has a complete ARexx interface, so you can execute ARexx programs and functions from hotkeys and store results in environment variables. The optional title bar clock is an AppWindow. You can drop an icon in the clock and its name is set in a variable for use in macros. The documentation has been rewritten and includes two indices. This is the freely distributable release of 5.0. It is the same as the registered version except this version has a "welcome" window and has a limit of 25 macros. It has been localized for deutsch and francais. Requires OS2.04+. This is an update to MachIV on disk number 624. Binary only, share-ware. Author: Brian Moats, PolyGlot Software

UUArc UUArc is an archiving system designed to enable easy transmission of binary files/archives over communication links only capable of using ASCII, such as Electronic Mail. It encodes binary files into files containing only printable standard ASCII characters. Written primarily for use with GuiArc to add UUEncoding/UUDecoding facilities to it, it takes similar command line options to other commonly used archiving programs. This is version 1.3, an update to version 1.1 on disk 912. Public domain, includes source. Author: Julie Brandon

Fred Fish Disk 953

AmigaToNTSC AmigaToNTSC patches graphics.library so it will think you have an NTSC Amiga. AmigaToPAL will patch it to think you have a PAL Amiga. Custom screens will open in the mode selected. Version 1.2, an update to version 1.0 on disk number 575. Binary only. Author: Nico Francois

AppCon Declares the actual CON:-window as an AppWindow and lets you drop your icons in this window. Then, the name and path of the icon are inserted into the current command line exactly as if you typed them with your keyboard, but slightly faster! Version 37.177, includes source. Author: Stephan Fuhrmann

ByteFilter Lets you to filter out specified bytes from any file, so you are able to extract the texts from a binary file, for example. This is version 1.20 and it uses jhextras.library, which is included in the libs drawer. Freeware, includes source. Author: Jan Hagqvist

EasyCatalog An IFF-CTLG catalog file editor. From now on, you can just enter the text for the catalog and save it. Existing catalogs can be loaded and changed. Requires Kickstart 2.x or higher. English and Dutch (Nederlands) catalogs supplied. Version 0.8 β , binary only. Author: Jeroen Smits

ISAM A Server/Library. Even novice programmers can store and/or retrieve database records. Powerful, multi-"user", almost unlimited number & size of records/files. Different users may access same file, file and record locking (exclusive or shared), multiple keys/file. Keys may: ascend/descend, have unique/repeatable values, be up to 499 bytes. Many record retrieval methods. Recover Index file if lost or corrupt. Deleted record space reclaimed. Small: server is less than 51K; Resident Library less than 9K. Usable from C/Asm./ARexx/etc. AmigaDOS V1.2 and up. Shareware, binary only, examples w/source. Version 1.03, an update to version 1.01 on disk number 766. Author: Scott C. Jacobs, RedShift Software

LHA_DOpus An ARexx script for Directory Opus 4.11 that lists the contents of lha-archives in a DOpus window. Allows extract, delete and add operations on specific files of the archive. Version 1.0, freeware. Author: Michiel Pelt

Fred Fish Disk 954

MFT Multi-Function Tool. A little assembly program (just over 1K) that can perform all of the following DOS commands: RENAME, DELETE, MAKEDIR, WAIT, FILENOTE. Useful for disks where every byte counts and you don't want a bunch of bigger utilities taking up room. Current version does not support pattern matching. Version 1.03, includes source in assembler. Author: Thorsten Stocksmeier

SCAN8800 A specialized database program to store frequencies and station names for shortwave transmitters. It can also control a receiver for scanning frequency ranges. Version 2.38, an update to version 2.33 on disk number 864. Binary only. Author: Rainer Redweik

Fred Fish Disk 955

DlxGalaga A shoot'em up game. Deluxe version of an old classic. Version 1.0, binary only, shareware. Author: Edgar M. Vigdal

MuroloUtil Several CLI or script based utilities. Included are: Button - A little utility that opens a requester with custom text. Useful for batch and scripts; C64Saver - A utility that reads C64 basic programs, decodes and saves them in a readable file; Calendar - A utility which prints a monthly calendar and some information about the days; CarLost - A utility that causes DTR to drop on the serial port; CDPlayer - A utility to play a musical CD on CDTV or A570; FMBadFmt - Intuition based utility which formats BAD floppies and makes them useable; KickMaker - A utility to create a new KickStart disk with the last version of kickstart on it... For A3000 owners only; SerTest - A utility that opens a window and shows the status of serial port signals Switch - A utility that opens a little centered window, that has custom text and two buttons for choice. Most programs require OS2.04+, some source included. Author: Felice Murolo

PFS A filesystem for the Amiga. Offers higher performance on all operations and full compatibility with AmigaDos. Requires Kickstart 2.0 or higher. Shareware release 1.0, version 6.11. Binary only. Author: Michiel Pelt

Fred Fish Disk 956

DDBase A simple database program. Features: Up to 1500 records, up to 20 fields/record; Draw up to 10 Bevel/FlipBoxes, Box, Circles; Import/Export data as ASCII or Superbase; Uses external fields {ASCII/IFF}. Installation utility provided. Version 3.00, requires OS2.x or greater. Binary only, freeware. Author: Peter Hughes

FMSynth A program to create sounds with FM synthesis. It has six operators, a realtime LFO and a free editable algorithm. The sound can be played on the Amiga keyboard or on a MIDI keyboard which is connected to the Amiga. The sounds can be saved in IFF-8SVX (one or five octave) or raw format. FMSynth has an AREXX port now. Included are 230 FM sounds. Version 3.3, an update to version 1.1 on disk number 895. Shareware. Author: Christian Stiens

SetDefMon A small utility to set the system's default monitor during WBStartup or to zap the default monitor on the fly. Possible default monitors include Pal, Ntsc, Euro36, Super72, DbINtsc and DbIPal. Version 1.2, includes source in C. Author: Franz Schwarz

Fred Fish Disk 957

PARex PARex is a program which allows you to process files, mostly textfiles, whereby strings can be replaced by another, text between two strings can be stripped, strings put in lower or upper case. PARex supports normal text searching, wildcard searching,

context remembering and word-only searching. Using data scripts enables the use of an unlimited number of such replace commands. Each replace command can be individually controlled. All ASCII codes can be used in the search and replace strings, even entire files, dates, times, can be inserted in such strings. Custom formatted hexadecimal output is also supported. Over twenty ready to use program scripts are included to perform simple tasks as: converting files between different computer systems, stripping comments from source files, finding strings in files, converting AmigaGuide files to normal text files,... even automatic version updating of source files. By the way, v3.00 is about two to more than twenty times faster than the previous versions, and is supplied in english, german, french, and dutch. This is version 3.00, an update to version 2.12 on disk number 859. Binary only (but the source is available), shareware. Author: Chris P. Vandierendonck

VChess Fully functional shareware chess game completely written in Amiga Oberon. Features: selectable screen type (can run right on the workbench screen); sizeable board; Two-human, Computer-Human and Computer-Computer play modes; Load, save games; Load/save/print movelist; Use/save openings; Time limits; Solve for mate; Selectable fonts; Setup board; Rotate board; Show movelist; Show thinking; ... and more. Requires OS2.0+, and should run even on low memory (512K) machines if the opening library is not used. Version 2.0, binary only, shareware. Author: Stefan Salewski

Fred Fish Disk 958

Alert A small command to display texts in a recovery-alert. Works on all machines with Kickstart V33 or higher. Version 1.1, includes source. Author: Ketil Hunn

Fed-CASE A graphical environment to design flowcharts. The source code generator generates directly compilable C source. The generated code can be compiled on other computer systems. I.E. you can generate source code for a C compiler on a UNIX operating system or a PC operating system. Version 1.0 (demo version), binary only. Author: Christian Joosen, Ron Heijmans

TestMaker NOT just a test creator for teachers. Ten years in developing, this one makes up tests, review sheets, quizzes, etc., in a variety of formats, and helps the teacher maintain a question database for use in most subjects. Version 3.12, binary only (Compiled HiSoft Basic), shareware. Author: Bill Lunquist, Bob Black

Fred Fish Disk 959

AmigaDiary AmigaDiary is a handy workbench tool of the type that currently abound office PC's. It is a mouse driven diary capable

of storing all personal events and is the perfect solution to all those forgotten birthdays, missed appointments etc. Version 1.13, binary only. Author: Andrew K. Pearson

HQMM Hero Quest MapMaker. With HQMM, you can create your own missions for Hero Quest, the board game. You can place all objects that are in the Hero Quest set (doors, traps, furniture, monsters etc.) on the map and you can write your own story to go with it. All this will be printed out in the same style as the original Hero Quest missions. Version 1.11, requires OS2.0+. Binary only, freeware. Author: Camiel Rouweler

IntuiMake A tool for developers, created with the intention of building complex projects, with an easy to use graphics user interface. No further knowledge about conventional makes is needed, because Intuimake does not deal with script files or things like that. Requires OS2.0+. Version 1.2, binary only. Author: Björn E. Trost and Dirk O. Remmelt

Fred Fish Disk 960

Imperial An oriental game in which you have to remove tiles from a layout (like Shanghai or Taipei). Every game has a solution and there's a layout editor. English NTSC version and French PAL version supplied. Some other versions available from the author. Version 2.0, binary only, shareware. Author: Jean-Marc BOURSOT

Minesweeper Yet another minesweeper game. This one forgives the player, when he hits a mine, if no useful inferences could be made from the exposed information. The element of luck is sharply reduced. First version, binary only. Author: Donald Reble

PowerPlayer A very powerful, user friendly and system friendly module player. It can handle nearly all module-formats, can read powerpacked & xpk-packed modules and comes along with its own powerful cruncher that uses the lh.library. Has a simple to use userinterface and an ARexx port, has locale-support and a nice installer script for CBM's installer utility. Version 4.0, update to version 3.9 on disk number 863. Binary only, shareware. Author: Stephan Fuhrmann

Fred Fish Disk 961

FIVE-STAR Demo version of a powerful prediction tool for LOTTO, POOLS, SWEEP, DIGIT (eg 4d) and HORSE (races) systems available worldwide. The program uses an identical framework for all five systems but they are run completely individually so that any number of them can be used simultaneously. All records, updates, predictions, bets and results are stored separately and can be saved to disk or sent to the printer at any time. This demo version

is supplied with a very basic manual and is completely functional except for data input. Version 1.0, binary only. Author: Joe Taylor

MPMaster A useful MIDI program that enables to transmit/receive samples via MIDI between the Amiga and any MIDI device that supports the MIDI Sample Dump Standard format (such as the Yamaha SY85 synthesizer). It has a WorkBench interface, can play samples and all settings of the sample can be modified before transmission. Includes a circuit to build a very small MIDI interface. Distributed in two languages: English and Spanish. Requires

WorkBench 2.04 or higher. Version 1.2, binary only, freeware. Author: Antonio J. Pomar Rosselló

Fred Fish Disk 962

EnvTool A tool for a project icon, born out of a severe need to allow users to use their own tools for reading doc files, viewing pictures, editing files, etc. EnvTool will send the associated file to either the tool specified by an environment variable, or a selected default tool if the environment variable is not set. Version 0.1, includes source in C. Author: Dan Fish

EZAsm Combines 68000 assembly language with parts of C. Produces highly optimized code. Uses C-like function calls (supports all 3.0 functions), taglists, braces, "else", ".fd" support, and much more. Comes bundled with A68k and Blink, for a complete programming environment. This is version 1.8, an update to version 1.7 on disk 699. Includes example source and executable files. Binary only. Author: Joe Siebenmann

MuchMore Another program like "more", "less", "pg", etc. This one uses its own screen or a public screen to show the text using a slow scroll. Includes built-in help, commands to search for text, and commands to print the text. Supports 4 color text in bold, italic, underlined, or inverse fonts. Can load xpk crunched files. Has a display mode requester. Is localized with German, Italian, French, and Swedish cat- alog files. Supports pipes. Requires KickStart 2.04 or later. This is version 4.2, an update to version 3.6 on disk number 935. Includes source in Oberon-2. Author: Fridtjof Siebert, Christian Stiens

ToolAlias Provides a mechanism for rerouting specific programs to other programs. For example, with ToolAlias, you could reroute all references to ':c/muchmore' to use 'sys:util- ities/ppmore' instead, so that when browsing documents on a Fish disk, you get to use your favourite text viewer, rather than loading the one specified in the document's ToolTypes. Requires OS2.0+. Version 1.02, Includes source. Author: Martin W. Scott

TouchAnother Amiga version of the Unix utility with the same name. Touch changes the date and time stamp of all speci- fied files to the current date and time. This version will also create an empty file (like the Unix version) if the specified file does not exist. Version 1.2, an update to

version 1.0 on disk 919. Public domain, includes source. Author: Kai Iske

Fred Fish Disk 963

BootPic BootPic shows nearly any IFF picture that you like while your system is initialized after a reset. Additionally, it may play a MED-Module. Requires OS 2.0 or higher. Version 3.1, a major update to version 2.1b on disk number 718. Binary only. Author: Andreas Ackermann

Codecracker Another MasterMind clone. Difficulty level may be set by selecting the number of color columns and the number of different colors to choose from. Documentation contained within the program. Version 2.23, binary only. Author: Michael Reineke

SIOD An interpreter for the algorithmic language Scheme, a dialect of LISP developed at MIT. Siod is a C implementation that covers a large part of the standard and can be run with a small amount of memory (also runs on old A500 NOT expanded). It is the ideal tool to learn the language or for experimenting with functional languages. Version 2.6, includes source and examples. Based on the original code from Paradigm Inc. An update to version 2.4 on disk number 525. Author: Scaglione Ermanno

Split! A high-speed file splitter. Splits a large file into several smaller files (size is user-definable). Due to the use of a 32k buffer, Split! is up to 14 times faster than the competition. CLI interface. Originally created for transporting large documents. Version 1.0, binary only. Author: Dan Fraser.

Fred Fish Disk 964

Angie ANother Great Intuition Enhancer commodity that can be used to assign AngieSequences that can consist of dozens of Intuition related actions, arbitrary dos commands and input event data to an unlimited number of hotkeys. Furthermore, these AngieSequences can be executed via ARexx. Angie's capabilities include auto window hunting, auto ActiveWinTask priority increment, 'TWA' window remembering, auto DefPubScreen definition, etc. Angie comes with a comfortable Intuition user interface and is completely localized. Includes English and German documentation and German catalog. Version 3.6, an update to version 1.6 on disk number 938. Binary only, giftware. Author: Franz Schwarz

NewDate A replacement for the AmigaDOS command 'Date'. Besides the usual date options, NewDate enables date output in your own defined format. NewDate currently supports 18 languages: English, German, French, Dutch, Italian, Spanish, Portuguese, Danish, Finnish, Swedish, Norwegian, Icelandic, Polish, Hungarian, Czech, Romanian, Turkish and Indonesian. Version 1.20, an update to version 1.10 on disk number 859. Binary only, freeware, Author: Chris Vandierendonck

RIVER This program searches an embedded version ID in a file. Like the 'Version' command you can check the version and revision number of a file. You can also add this embedded version ID as a filenote, or print it in a table where each field of the ID is clearly stated. You can also construct your own version comment using embedded version ID fields. Version 2.30, an update to version 2.00 on disk number 787. Binary only, freeware. Author: Chris P. Vandierendonck

Stocks Demo version of a stocks analysis program. Provides powerful technical analysis using numerous studies including Candlesticks, traditional bar charts, 3 moving averages, MACD, Stochastics, Gann, TrendLines, %R, Average Volume and more. It generates buy/sell signals based on customizable trading rules and graphs daily, weekly, and monthly charts using a simple ASCII data file format compatible with Compu-Serve historical data. Displays on Workbench or Custom Public Screen. Includes on-line AmigaGuide help text. Requires OS2.0+. Version 3.02a, binary only. Author: James Philippou, Bug-Free Development

Fred Fish Disk 965

CDPlay A small CD Player designed for the Xetec CDx Software. The program uses a small window that opens on the Workbench screen. Smaller with many more functions than those on the player that is supplied with the Xetec Software. Version 2.01, binary only. Author: Nic Wilson

UChess A powerful version of the program GnuChess version 4 for the Amiga. Plays a very strong game of chess. Code has been rewritten and data structures reorganized for optimal efficiency on 32 bit 68020 and better Amiga systems. Fully multitasking, automatically detects and supports 640X480X256 color AGA mode machines, and does not at any time BUSY wait. Requires a

68020/030/040 based Amiga computer system with AmigaOS 2.04 or later and 4 Meg of ram minimum. Special "L" version optimized for 68040 and requires 10 Meg of ram minimum. Supports a variety of standard features such as load, save, edit board, autoplay, swap sides, force move, undo, time limits, hints, show thinking, and a supervisor mode that will allow two humans to play with the computer acting as a "supervisor". Version 2.69. Source for this version may be found on AmigaLibDisk966. Author: FSF, Amiga Port by Roger Uzun

Fred Fish Disk 966

CDTV-Player A utility for all those people, who'd like to play Audio CD's while multitasking on WorkBench. It's an emulation of CDTV's remote control, but is a little more sophisticated. Allows access to the archive even without a CDRom drive (i.e. AMIGA 500-4000), although you can't play a CD. Program and KARAOKE (live on-screen) included. Recognizes CDs automatically. Works on all CDTVs, AMIGA CD 32 and all CD ROM emulating the cdtv.device or cd.device. Version 2.31, an update to version 2.05 on disk 894. Freeware, binary only. Author: Daniel Amor

FHSpread A Spreadsheet program that uses its own custom screen. Can be switched between hires, laced and PAL, NTSC. Should work on any amiga with at least 1MB. Version 2.01, an update to version 1.71 on disk number 887. Binary only. Author: Frank Hartog

UChessSrc Lha archive of all the sources necessary to build UChess version 2.69 as contained on disk number 965. Author: FSF, Amiga Port by Roger Uzun

Fred Fish Disk 967

IconTrace Use this program to find out which tooltypes a program supports and which icons it looks for. KickStart 2.0 or higher required. This is version 2.02, binary only. Author: Peter Stuer

MUI_usr An object oriented system to create and maintain graphical user interfaces. From a programmer's point of view, using MUI saves a lot of time and makes life much easier. Thinking about complicated terms like window resizing or font sensitivity is simply not necessary. On the other hand, users of MUI based applications have the ability to customize nearly every pixel of a program's interface according to their personal taste. Version 1.4,

this is part 1 of a 2 part distribution and contains the user system. The developers support package can be found on disk number 968. Shareware. Author: Stefan Stuntz

Fred Fish Disk 968

DiskInfo A replacement for the AmigaDOS 'Info' command, but can additionally give more extensive information on the disk (volume) and/or on the device in which the disk is inserted. Version 2.00, an update to version 1.00 on disk number 783. Binary only, freeware. Author: Chris P. Vandierendonck

JustLook A collection of routines for controlling the mouse and key-board thru generation of 'Input Events'. Implemented as object code to be linked with your programs. This is for application writers who like to include HowToDo programs with their applications. Users can actually see how to do things, rather than describing them in document files. This is not a recorder, mouse and keyboard events are generated in real time and so the software adapts itself to changes at a particular execution. Includes example programs and source in C and assembly. Author: Kamran Karimi

MUI_dev An object oriented system to create and maintain graphical user interfaces. From a programmer's point of view, using MUI saves a lot of time and makes life much easier. Thinking about complicated terms like window resizing or font sensitivity is simply not necessary. On the other hand, users of MUI based applications have the ability to customize nearly every pixel of a program's interface according to their personal taste. Version 1.4, this is part 2 of a 2 part distribution and contains the developer support package. The user system can be found on disk number 967. Shareware. Author: Stefan Stuntz

PowerSnap A utility that allows you to use the mouse to mark characters anywhere on the screen, and then paste them somewhere else, such as in another CLI or in a string gadget. Checks what font is used in the window you snap from and will look for the position of the characters automatically. Recognizes all non-proportional fonts of up to 24 pixels wide and of any height. Works with AmigaDOS 2.0 in both shell and WorkBench environments. This is version 2.2, an update

to version 2.1b on disk 781. Binary only. Author: Nico Francois

Fred Fish Disk 969

ACE ACE is a FreeWare Amiga BASIC compiler which, in conjunction with A68K and Blink, produces standalone executables. The language defines a large subset of AmigaBASIC but also has many features not found in the latter. A simple graphical front-end (Integrated Development Environment) is also provided. This is written in ACE. Version 2.0, freeware, binary only.

Author: David Benn

DOSTrace SnoopDOS clone with a lot more whistles and bells: session history, commodity, and can trace a lot more functions than SnoopDOS. KickStart 2.04 or higher required. This is version 2.13, binary only. Author:

Peter Stuer

LazyBench A little utility for lazy people with a hard disk crammed full of goodies which are too difficult to reach because they are buried away in drawers inside drawers inside drawers inside drawers... LazyBench installs itself as a commodity, adds an item under the Workbench "Tools" menu and waits in the background. Use its hot key combination to pop up its window and select an item from the list displayed, thus launching your favourite application without messing around with windows and drawers. Font sensitive, Style Guide compliant and fully configurable. Requires AmigaDOS 2.xx or later. Version 1.14, an update to version 1.12 on disk 935. Binary only. Author: Werther 'Mircko' Pirani

SysInfo A brand new release of this popular program. It reports interesting information about the configuration of your Amiga, including some speed comparisons with other configurations, versions of the OS software, and much more. Version 3.23, an update to version 3.18 on disk number 860. Binary only. Author: Nic Wilson

Fred Fish Disk 970

ADM A comfortable and flexible address database with font sensitive windows, commodity support, application window support, an ARexx-port, public screen support, and totally controllable from the keyboard. It includes user flags (grouping), email support, and freely configurable label printing. It can fill out letter forms and call your word processor, print remittance orders, dial

numbers, and has online help. Requires AmigaDOS version 2.04 or later. Version 1.20, an update to version 1.01 on disk 847. German version only. Shareware, binary only. Author: Jan Geissler

NoNTSC Converts NTSC-Screens to PAL-Screens. It links into the OpenScreen-Routine and looks at the height of every screen opened. If it has NTSC-Height (200 Pixels), it is converted to PAL-Height (256 Pixel). Author: Thorsten Stocksmeier

UUCode Optimized uuencode/uudecode programs. Designed to be reliable and fast. Also includes 68030 based versions. V36.6, includes source. Author: Ralph Seichter

Fred Fish Disk 971

DiskInfo A replacement for the AmigaDOS 'Info' command, but can additionally give more extensive information on the disk (volume) and/or on the device in which the disk is inserted. Version 2.00, an update to version 1.00 on disk number 783. Binary only, freeware. Author: Chris P.

Vandierendonck

QDiskA WorkBench utility that will monitor the space usage of any mounted AMIGA DOS volume, like your hard drive or your floppy drive. QDisk will also notify you if a volume becomes too full. Comes with a preference editor to customize QDisk to your needs. Version 2.01, an update to version 1.1 on disk 903. Freeware, binary only. Author: Norman Baccari

Yak Yet Another Kommodity. Features a sunmouse that only activates when the mouse stops, KeyActivate windows, click windows to front or back, cycle screens with mouse, mouse and screen blanking, close/zip/shrink/enlarge windows with programmable hotkeys and a lot of other configurable hotkeys. Fully localized English language builtin and provided catalogs for Dutch, French, German, Italian and Swedish. Documentation in English, French, German and Italian. Includes installer scripts and C source. Version 1.57, an update to version 1.52 on disk number 912. Author: Gael Marziou & Martin W. Scott

Fred Fish Disk 972

Icons A bunch of 4-Color Icons from which you may find something suitable for your particular WorkBench environment. Author: Magnus Enarsson

IntellInside A cute little play on the marketing motto of that "other" family of microprocessors ...a WorkBench TrashCan Icon. Author: Unknown... (Unconfessed??)

MoreIcons Another bunch of Icons (8-Color this time) from which you may find something suitable for your particular WorkBench environment. Author: Dan Elgaard

QuickFile QuickFile is a flexible, easy to use flat file database. Files can be larger than available ram, but as much of the file as possible is kept in ram for fast access. Features include: multiple indexes that are automatically maintained; character, date, integer and floating point data types; up to 250 characters per field and 250 fields per record; form and list style displays and reports; unlimited number of views for each file; fast sorting with multiple sort keys; improved search function; fields can be added, changed, or deleted at any time; flexible ascii export/import; flexible multi-column label printing. Runs on WB1.3 or later and should be OK with 512K ram. Version 2.02, an update to version 1.3.3 on Disk 919. Shareware, binary only. Author: Alan Wigginton

RCONA replacement for the CON:-Handler of Amiga-OS 2.x / 3.x. Has many new features including scrolling back text which has disappeared, enhanced copy & paste support, window iconification, output logging, print window contents, and much more. This is a demo distribution of a shareware product. Version 1.4, an update to version 1.0 on disk 930. Binary only. Author: Gerhard Radatz

Fred Fish Disk 973

TextPlus A TeX frontend word processor. TPP provides facilities for tables, lists, mailmerge, footnotes, inclusion of iff-graphics, an ARexx-Port (122 commands), printing via the printer.device (no TeX needed for this), and full OS2.xx/3.xx compatibility. Makes use of PasTeX, Georg Hessmann's Amiga implementation of TeX, or AmigaTeX of Radical Eye Software, which is supported from now on. New features: user definable menus, keymap, and macros; completely localized (available languages: english, deutsch); clipboard support; AppWindow, Applcon; 11 new ARexx commands. This is version 5.01, an update to version 4.10 on disk 845/846. Shareware, binary only. Author: Martin Stepler

Fred Fish Disk 974

DDLI The Duniho and Duniho Life Pattern Indicator (DDLI) is a program that asks you questions in order to determine your Life Pattern. The Life Patterns correspond to the sixteen psychological types measured by the Myers-Briggs Type Indicator (MBTI), and they are represented by the same abbreviations. By using knowledge that Terence Duniho has added to the study of Type, this program also checks itself by asking supplementary questions about other preferences that correlate with a person's type. Author: Fergus Duniho

KingCON A console-handler that optionally replaces the standard 'CON:' and 'RAW:' devices. It is 100% compatible, but adds some VERY useful features, such as: Filename-completion (TAB-expansion); A review-buffer; Intuition menus; Jump scroll (FAAST output!). Cursor-positioning using the mouse; MC68020-optimized version; And more... Version 1.1, requires OS2.x, binary only. Author: David Larsson

MathPlot A function plotter with lin/log plot, a complete KS 2.0 interface, and ARexx support. Needs Kickstart/WorkBench 2.0 and mtool.library (included). Version 2.20, an update to version 2.07 on disk number 916. This is a Demo version with some options disabled, requires a key file for full functionality. Shareware, source available from author. Author: Rüdiger Dreier

Fred Fish Disk 975

CLIExchange A 592 byte CLI replacement for the standard CBM Exchange utility. The only difference is that Exchange has a graphical user interface while CLIExchange has been designed to be called from CLI so it can be used within scripts, menus, docks or hotkeys. You need at least 2.04 system release. C source included. Author: Gaël Marziou

DieserZug A nicely done WorkBench "Worms" type game, where the object is to gobble up pieces making yourself longer and longer, while avoiding running into the walls or your "tail". Features 3 different speeds, high score list, pause and help keys. Version 1.2a, binary only. Author: Juha Vehviläinen

ITF Amiga port of ITF4.01. ITF stands for "Infocom Task Force". There have been several ports of Infocom interpreters to the Amiga, but none of this program. The interpreter supports v1, v2, v3 (Zork1 to Stationfall), v4 (Trinity, Bureaucracy, etc.) and v5 (Sherlock, Beyond Zork etc.) games. This is more than any other freely

distributable interpreter. With this interpreter you can play ALL the games in the LTOI2 package for the IBM PC, by copying the datafiles with Cross- DOS or similar, then just running this interpreter. Re- quires OS 2.0+. Binary only. Author: InfoTaskForce, amiga port by David Kinder

PCal Creates a very nice looking postscript calendar. By default, PCal simply prints an empty calendar. Its real power is in its ability to place ``events" in appropriate days on the calendar, thus allowing the user to create personalized calendars. This is achieved through the use of a "calendar.dat" file that has extraordinary flexibility. Author: Patrick Wood, Joe Brownlee, Andy Fyfe, et al.
