

JAN 2005 assets info

Ranking system

Players' fighting abilities are judged and indicated by the ranking system.

By fighting opponents with similar strength, the players' ranking will change.

Structure is exactly the same as Arcade version but for PS2 version, players ranking will depend on whether they beat ghost characters with grades in Arcade mode.

Customise mode

Playing the original mode on home console "Tekken ADV (TBC)" or Arcade mode, players can earn prize money.

Using obtained prize money, players can purchase items or character colours in Customise mode. So that players are able to coordinate their original characters with items they purchased.
