

Quickly and Easily Create and

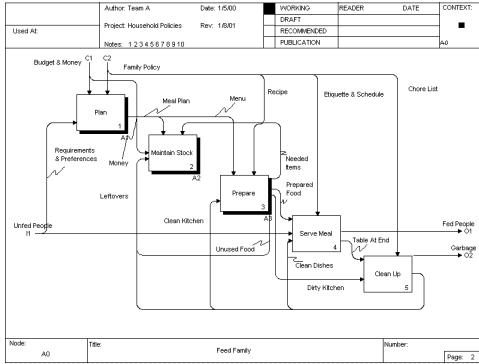

Edit IDEF0 Diagrams

- Powerful Business Modeling
- Intelligent Rules Checking Technology
- Fast Model Creation and Easy Navigation
- Full Support for NON-IDEFO Components
- Integrated HTML Publishing

IMPLEMENTING ENTERPRISE PROCESS MANAGEMENT

Clear, efficient communications of complex business problems and processes is a fundamental requirement for the success of any business process-reengineering program. iGrafx IDEF0 2000 is the most intelligent modeling solution for business analysts and process management professionals who need to communicate business processes through a consistent, standards-based approach.

iGrafx IDEF0 enables fast, easy creation and editing of IDEF0 diagrams.

FOCUS ON YOUR PROCESS

Your time is valuable, and with iGrafx IDEF0, you can create your models faster than with other applications, leaving you more time to focus on and understand your process and identify improvements. iGrafx IDEF0 delivers the most user-friendly and intuitive interface to help you quickly and easily construct your models and ensure that your models adhere to the IDEF0 methodology. The Model Wizard helps you construct the foundation of your model, all before you even place a single graphic. The Rules Validator ensures that your models adhere to IDEF0 standards. Easily access and navigate through your models using the IDEF Explorer.

The dialog box is titled 'IDEFO Model Setup Wizard'. It contains the following fields and text:

- Model:** Household Policies. Text: 'The model name. Used to identify the model in the IDEF Explorer.'
- Function:** Feed Family. Text: 'A verb or verb phrase that describes what must be accomplished by the process.'
- Purpose:** Define the functions involved in feeding a family in order to write training. Text: 'A brief statement of the reason for a model's existence.'
- Viewpoint:** The parents. Text: 'A brief statement of the perspective of the model.'
- Template:** IDEF0 Blank: 8.5 x 11.igt. Button: Select Template...

Buttons at the bottom: < Back, Next >, Finish, Cancel.

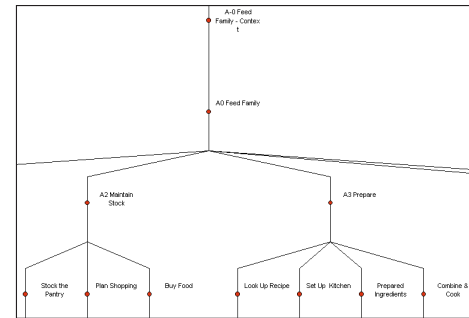

The Model Wizard lets you quickly build the model foundation and A-O diagram.

ENHANCE ENTERPRISE-WIDE COMMUNICATIONS

iGrafx IDEF0 enables clear, efficient enterprise-wide communications of new business processes. With iGrafx IDEF0, you can publish files in HTML or Java formats. By posting your IDEF0 models to the Web, you and your internal and external partners will benefit from the ability to immediately access updated models. This will help you achieve results from new operations sooner and reduce overall waste due to following old practices.

CONSOLIDATE YOUR PROCESS KNOWLEDGE

iGrafx IDEF0 is built on the leading process management and simulation solutions from Micrografx. With iGrafx IDEF0, you can easily create FEO and text diagrams as well as process models and link them directly to your IDEF0 diagrams. Using the process models, you can conduct simulations and what-if analysis to help you gain further insight into your process and estimate return on investment, operational efficiency, resource utilization, and much more.

With iGrafx IDEF0, create node tree diagrams as well as FEO and text diagrams.

CENTRALLY MANAGE YOUR PROCESS KNOWLEDGE

In any organization undergoing process management and change, communication and instant access to the latest process standards is a key to successful implementation of and adherence to process change. iGrafx Process Central, a separately available component of the Micrografx Enterprise Process Management solution set, provides enterprise-wide ability to store, manage, and communicate the latest process standards. By maintaining a central repository of process knowledge, you can implement new changes faster, minimize business risk through improved adherence to standards, and ensure a real-time and historical archive of process knowledge to facilitate compliance with external standards bodies.

2000

IDEF0

The Intelligent Business Modeling Solution

FEATURES	BENEFITS
Setup Wizard	Quickly build the framework for your IDEF0 model with an easy-to-use wizard.
IDEF Explorer	Quickly and easily view, add, rename, print and change properties of the components of your IDEF0 model.
IDEF Rules Validation	Reduce model creation time and minimize rules violations with automatic validation.
IDEF0 Model Templates	Get started on your model quickly using a standard template.
Supporting Diagrams	Easily create supporting diagrams including FEO, Node and Text using a single, consistent interface.
Glossary	Aid understanding of your model using an easy-to-set-up glossary.
Table of Contents	Enable quick overview with the Table of Contents (TOC) page.
Web Support	Easily publish your entire model to the Web. Maintain all links and navigation aids for enterprise wide communication.

ENHANCE IGRAFX IDEFO 2000 WITH THESE ENTERPRISE SOLUTIONS FROM MICROGRAFX

Micrografx Enterprise Process Management (EPM) solutions cover a range of integrated products and services that allow you to visually analyze, define, communicate and improve your business.

iGrafX Process 2000 is an integrated solution for mapping, modeling, simulation, and performing "what-if" analysis on your business processes.

iGrafX Process for Six Sigma is the leading process analysis and improvement solution for Six Sigma. Achieve greater results sooner, through improved understanding of your process.

iGrafX Process Central provides a team-based, collaborative environment for enterprise process management. By employing a central process repository for your process models, you are better able to manage change, share business models, and sustain process improvement projects.
