

FontCARD NTX

FontCARD NTX is a card that fits in the font card slot of the NTX Printer. The FontCARD NTX adds 25 Adobe Type 1 Postscript fonts to the NTX's resident fonts. The type faces on this card are those in the Adobe Typesets 1, 2, and 3.

There are many advantages in buying a Sonnet FontCARD NTX, the two most important are:

- 25 additional resident fonts; these fonts do not require downloading, so printing is much faster and consequently if your connected on a network traffic for printing is considerably less.

- ATM, screen, and printer fonts are included for use on all computers on the network.

To illustrate printing speeds with and without the FontCARD NTX, I ran the Sonnet supplied test page and a 36 page AMUG Newsletter. Here are the results:

	<u>Without Card</u>	<u>With Card</u>
Test Page	1:24	4:02
Newslettter	43:36	49:21

Another thought on buying the FontCARD NTX is the fact that buying the card is less than twice the price of buying the Adobe Typesets individually.

Macwarehouse pricing:

Adobe Typeset	1	\$65.00
Adobe Typeset	2	\$65.00
Adobe Typeset	3	<u>\$129.00</u>
	Total	\$259.00
Sonnet FontCARD NTX	\$469.00	
AMUG Special Price		<u>\$399.00</u>

Sonnet will also customize the FontCARD NTX for sites that purchase more than 10 cards.

My reaction to the FontCARD NTX was to buy one.

To get the special AMUG Price of \$399.00, order it by:
