Introduction

Welcome to the Apple PowerBook Solutions Guide, a collection of third-party products designed to meet the ever-changing needs of PowerBook computer users on the go.

With a Macintosh® PowerBook, you can have the power of Macintosh computing any time, any place. And by selecting applications that are just right for you, the PowerBook computer gives you everything you need to get the job done, no matter where you may be.

At Apple, we strive to provide our customers with the best solutions for all computing needs. We hope this catalog provides you with some good ideas on software, hardware, and accessories that can help make all your jobs a little easier—and, because we're Apple, we want to make your job a little more fun, too.

While we've made every effort to provide the latest, most accurate product information, please note that some of the listed features and prices may have changed since this guide was published. And entirely new products may have been introduced.
Be sure to consult your local Apple dealer if you can't find what you're looking for in this guide. Apple dealers are experts on the latest products and services designed for the PowerBook family of Apple Macintosh computers.

So power up your PowerBook and find out what real mobile computing is all about.

Contact Management

ACT! for Macintosh
ACT! for Macintosh integrates a powerful contact database and WYSIWYG calendar manager, custom report generator, and full-featured word processor with spell-checker. ACT! combines the planning and scheduling benefits of a paper-based organizer with the activity follow-up and support of a personal assistant. Other features include an automatically generated history for each contact, unlimited notes per contact, macros, e-mail support, automatic file backup, and a merge feature for database reconciliation. ACT! also has fully customizable pop-up windows throughout to minimize data entry. Users can also customize and reposition the database fields for use in any industry.   Contact management is a universal business activity, and PowerBook™ users, such as salespeople, customer service reps, managers, administrators, and others will find it a valuable tool. ACT! takes advantage of System 7 and supports Apple Events.

**Contact Software
International, Inc.**
Carrollton, TX
214-418-1866

Available: Q2 1992
Price: $395

Address Book Plus
Address Book Plus 2.0 is an ideal complement to Apple's PowerBook computers. Mobile users will be more organized by having access to their important contact information at all times. Address Book Plus 2.0 gives you the flexibility to store and manage vital data, including basic contact information such as names and addresses, and up to four phone or fax numbers. And Address Book Plus 2.0 dials calls automatically through your modem or speaker. Finding important information is easy, and you can search and sort by any field, using up to 45 categories per entry.

Power Up Software

415-345-5900

Available: now
Price: $99.95

C•A•T III
C•A•T III sales automation software provides busy PowerBook users with a convenient file of telephone numbers and contacts, to-do lists, call logs, appointments, and other sales-oriented data. The dynamic program features a unique template component for users to develop custom solutions like automating follow-up activities, call reporting, forecasting, and electronic roll-up of regional reports. Output can be printed to letterhead, labels, phone lists, custom reports, and other formats. Other C•A•T features include a word processor with mail merge features; the ability to search and sort contacts by geographic location, type of account, size of account, and other factors; and support for System 7's publish and subscribe and file server features, allowing sharing of information and databases easily — even while using the PowerBook in an airplane.

Chang Labs
Cupertino, CA
408-727-8096

Available: now
Price: $495

Dynodex
Dynodex 2.0 a fast, full-featured address book database manager—one PowerBook users will find to be a great companion. With Dynodex, you can keep track of contacts, sort addresses by any field, group names by categories, and dial any phone

Portfolio Systems, Inc.
Cupertino, CA
800-SAY-DYNO

number right from the application—the desk accessory lets you look up information quickly and add, delete, and/or edit addresses as you work. Dynodex imports and exports data in text format. And it takes advantage of Apple Events, making information management even more efficient. Dynodex prints address information to personal-organizer pages, mailing labels, envelopes, rotary cards, envelopes, and postcards.

Available: now
Price $125

Fair Witness
Fair Witness is an information spreadsheet — a powerful new way to organize your work. Create an outline. Add columns for dates, number,s pictures, or text. Build formulas or create a time chart that shows relevant project dates. Fair Witness lets you organize information the way you need to view it and it lets y ou search, sort, and rearrange the information so you can quickly see what you want to see. Fair Witness helps you brainstorm, plan, manage, organize, and evaluate information quickly, flexibly, and exactly as you like.

Chena Software
Allentown, PA
215-770-1210

Available: now
Price: $495

INtouch
INtouch is an easy-to-use desk accessory that stores unlimited names, addresses, phone numbers, and notes; prints envelopes and labels; dials telephone numbers; and more. Because INtouch is a desk accessory, it provides PowerBook computer users with instant access to important data. The INtouch Network capability lets you share your names and addresses with anyone on your AppleTalk network — even across zones. No special networking software is required, and the INtouch Network utilizes true client/server architecture. Best of all, INtouch is completely System 7 compatible.

Advanced Software, Inc.
Sunnyvale, CA

Available: now
Price: $69.95 for single-user version; $199.95 for network 3-pack

LEADS!
The LEADS! family of sales automation applications will keep salespeople up to date on the latest, hottest leads from the corporate office while providing managers with up-to-the-minute sales information. All three products — LEADS! Personal, LEADS! Manager, and LEADS! Corporate — can be used for personal contact tracking, high-volume lead management, and sophisticated marketing analysis. Each version can be used alone or combined with the others to create a complete sales management solution. Salespeople can manage their daily activities with LEADS! Personal running on their PowerBook computers. The software lets them record meeting and conversation notes, schedule follow-ups, and print mail-merge letters, labels, and reports. Each salesperson can then "send" the changes to a central data file (administered with LEADS! Manager or Corporate) down the hall or across the country. Changes and additions to the central file can also be distributed to the field for follow-up. At this central location, LEADS! Manager can be used for high-volume literature fulfillment and detailed tracking of lead sources. LEADS! Corporate offers all the features of Manager, plus sophisticated analysis reports to turn your sales information into a strategic marketing tool.

TouchBASE

TouchBASE is a database to keep track of personal and business contacts. It's handy all the time because it is a desk accessory. TouchBASE is simple because it is pre-configured to manage contacts, and yet it is customizable to fill future needs. TouchBASE is complete because it can print envelopes, labels, fax cover sheets, and listing reports. TouchBASE easily imports and exports data from most other products such as FileMaker, Microsoft Works, and Microsoft Excel. It's even a multi-user product so that you can share your database on a network or use it all by yourself.

Time and Information Management

Acta 7
Acta 7 is the indispensable productivity tool that lets you organize your ideas, your information, your time, and your projects. Acta 7 lets you view up to nine outlines at once, switching between them as your focus changes. Time spent in an airport or lobby won't be wasted anymore. With Acta 7 and your PowerBook computer, you can create to-do lists, rearrange your schedule, find a phone number, brainstorm ideas for a new proposal, outline a speech, prepare a desktop presentation, or work on an article—any time, anywhere. With Acta 7 you can enhance your outlines with sound, color text, and TrueType fonts as well as graphics. Share your ideas and keep them dynamic using publish and subscribe. Easy to learn and easy to use, Acta 7 includes Balloon Help™ to keep you on track.

Price: $149

AgentDA 2.03
AgentDA 2.03 will help you keep your schedule straight. A perfect fit for Macintosh PowerBook computer users on the go, it uses only 140K of disk space. Agent DA is a classic appointment diary in electronic form that lets you track appointments, schedule workgroups, and plan projects. You can create as many agendas as you need, and several users can access them simultaneously. AgentDA's built-in searching capability enables you to search for a word or part of a word in all your agendas or in a selected date range, where you can find activities one at a time or all at once. A special find command lets you select all past activities that you haven't checked as completed. These features allow flexibility in sorting data, and easy access to pending to-do reminders. Its intuitive interface eliminates training so that you can focus on increasing efficiency, improving productivity, and enhancing your time management.

Connections
Connections, personal information management software designed for use with the new PowerBook line, is complete with advanced features such as group calendaring, voice alarms, preformatted print reports, and the ease of click-and-drag operation. Connections helps people on the go remember appointments, meet deadlines, make telephone contacts, and find information that flows through their workspace every hour. A special Connections feature enhances the PowerBook, synchronizing your personal appointment calendar with the calendar back at the office. Using a group calendar server, Connections will reconcile changes made to the group and portable calendars with a single menu choice. An extensive import facility makes it possible to bring your telephone directory into Connections from FileMaker, Focal Point II, and other database files or HyperCard® stacks.

Concentrix Technology, Inc.

Price: $199

DateBook

After Hours Software

DateBook is a personal organizer that combines calendar, scheduling, alarms, and to-do lists to keep track of all your day-to-day activities. This full-featured program provides multiple views, and each view can be customized. With a quick glance at the Month view's "busy-ness indicators" you can see how busy you are for every day of an entire month. You can view and print your yearly, monthly, weekly, and daily schedules in any of three ways: text, Gantt chart, or time bar. You can even set reminder alarms that can be attached to any activity, including recurring events.

Van Nuys, CA

Price: $99

First Things First 2.1

First Things First 2.1 is a simple and fast time-management utility that helps Macintosh computer users manage tasks and events by priority as well as by schedule. Its unique access method — a floating clock icon — is always available and lightning fast. First Things First helps users instantly set up effective reminders — leaving more time for real work. Up to 96 categories can be defined to organize information. A file reconciliation utility merges and purges separate files kept on a PowerBook computer and a desktop Macintosh. Best of all, the program is simple to use; there is no learning curve — no training or support is required.

Visionary Software

Price: $69.95

In Control

In Control, an innovative to-do list manager, lets you organize things to do into lists and juggle priorities to meet shifting needs. Paired with a Macintosh PowerBook computer, In Control will keep you up to date even when you're away from the office. With In Control, you can quickly and easily view to-do items from a variety of perspectives, such as deciding what to do next, preparing for a one-on-one meeting, or choosing to whom a task should be delegated. In addition, In Control affords the full power of an outliner to organize, collapse, and indent to-do lists. Data from In Control can be exchanged with a variety of popular word processors, spreadsheets, and databases.

Available: now
Price: $129.95

Meeting Maker

Meeting Maker is a Macintosh network application that helps users plan, schedule, and confirm meetings. Users can schedule a time and date, select required guests, reserve rooms and resources, and prepare agendas. Meeting Maker also has a personal calendar that allows users to block out activities, meetings, private work sessions, even recurring weekly or monthly appointments in a single step. Calendars can also be printed in popular day-planner formats.

ON Technology
Cambridge, MA
617-876-0900

Available: now
Price: $495

Microsoft Schedule+
Microsoft Schedule+ is a calendaring and scheduling program designed for AppleTalk® or compatible networks, and it will run off the Microsoft Mail version 3.0 server. Combine Schedule+ with the PowerBook computer and you can easily schedule a meeting with your coworkers while you're away from the office. By dialing into the network, Microsoft Schedule+ lets you see when your coworkers are available so that you can schedule meetings with assurance. The program provides an efficient way to coordinate busy schedules.

event and to-do records, and print activity and contact history reports. All features are logically integrated to provide maximum power, efficiency, and benefit.

StackRunner!
With StackRunner!, you can browse, print, or edit HyperCard stacks on your PowerBook computer without taking up valuable hard disk space with the application. StackRunner! lets you install a runtime engine into your stacks to make them double-clickable, self-running applications. This eliminates the need to access the HyperCard application. StackRunner! even supports visual effects and sound— so you can create simple on-line demonstrations or electronic training "manuals" for customers, and not worry about what version of HyperCard they have. StackRunner! supports both 1.x and 2.x HyperCard file formats. You can open multiple scrollable, resizable windows with either stack format. The StackRunner! installer kit allows distribution of up to 250 runtime stacks at no additional charge. For unlimited distribution, add a Runtime Distribution License Agreement for a $150 annual fee. Freeware and public domain licenses are available at no charge. Discounts for user groups and special interest groups are also available.

Symmetry Software
Scottsdale, AZ
800-624-2485

Price: $79

Up-to-Date
Never miss an important appointment again using Up-to-Date, the intelligent calendaring system that keeps individual and workgroup calendars up to date — even when you're on the road. With a single keystroke you can enter single or recurring events such as weekly meetings. And you won't forget them once they're entered. The automatic reminder pops up on your screen, giving you advance notice of the upcoming appointments, even when you're running other programs. Coordinate your schedule with others over the network. Custom calendar layouts can be created, and you can print professional-looking calendars in multiple formats.

Word Processing

Nisus Compact
Nisus Compact is a word processor written especially to meet the requirements of Macintosh PowerBook users. Its compact size requires minimum space on your hard disk and it has very low memory requirements as well. Nisus Compact minimizes the use of disk access to conserve computer battery power; a battery status display is always visible while the program is running so you can gauge your remaining work time. New search tools have been added to Nisus Compact for easier organizing, accessing, and searching. File Clerk — a new system of file saving and retrieval — automates file management for all files, no matter which application created them. Using System 7 Remote Access, it is also possible to edit files from a remote computer after automatically retrieving them through the File Clerk Catalog. Fuzzy Find is a new search method which allows users to find items by making approximate sound-alike matches. Nisus Compact has retained almost all of the word processing power of the full-fledged Nisus so the advantages and strengths of the original are always at your fingertips. Nisus Compact files are fully compatible with Nisus 3.06.

Integrated Functionality

BeagleWorks
BeagleWorks combines word processing, database, spreadsheet, chart, draw, paint, and communications modules all in one package. This package allows you to perform a number of tasks faster and easier, whether you're working at home, at the office, or traveling with your PowerBook computer. BeagleWorks uses a revolutionary technology called In-Context Editing, along with System 7's publish and subscribe feature, to link information among documents. Material from any BeagleWorks module (except communications) can be freely moved to any other module. Changes made in one document are automatically reflected in the linked documents. When material is linked to a word processor document, you can take advantage of powerful features such as automatic text wrap (including irregular wrap), borders, and multiple columns that can be turned on and off anywhere on the page. It also includes a spelling checker and thesaurus dictionaries.

QuickMail Remote
QuickMail Remote is part of the QuickMail electronic mail package for Macintosh computers on Ethernet and AppleTalk networks and for networks containing both Macintosh and IBM or IBM-compatible computers. After a connection begins, QM Remote displays a list of all mail waiting. Messages can be read, printed, saved in QM file format, or converted to text. You also can file copies of messages in personal QuickMail folders and open them later with the QuickMail desk accessory. Best of all, you can read and reply to messages while still on line, or disconnect while you work. QuickMail is available in 1-, 5-, 10-, 50-, and 100-user packs, plus

WordPerfect Office for the Macintosh
The WordPerfect Office provides a collection of office automation programs for Macintosh users, including a Mail desk accessory. If you're away from the office, use your PowerBook to tie into your network and then use Mail to send and receive mail over the network—you can even add a personalized voice message to your communications. Use Mail to send files, broadcast messages to groups on the network, or access custom forms. UseWordPerfect Office Mail with the other programs included in the package: Calendar, Notebook, and File Manager.

File Transfer and Translation

Intertie
Intertie is designed for PowerBook users who also have a desktop Macintosh computer. It uses a process called "synchronizing" to transfer files automatically between Macintosh computers. Before you head out with your PowerBook for another destination, connect your PowerBook to any AppleTalk network, or restart your desktop Macintosh with the PowerBook configured as a hard disk. Intertie knows which files have changed and automatically copies new or changed files from one Macintosh to the other, synchronizing any two Macintosh volumes or folders either on a SCSI bus or across a network. Synchronizing also can be limited to specified folders or documents or chosen manually using Intertie's Preview Window.

LapLink Mac III
LapLink Mac III provides fast Macintosh-to-Macintosh and Macintosh-to-PC file transfers. Mac-to-Mac file transfers can be done with the included cable, via modem, or over existing AppleTalk cabling. LapLink Mac also supports SCSI cable transfers between Macintosh Plus or larger desktop computers and PowerBook computers. Mac-to-PC file transfers can be done over the included cable or over a modem. Users can control the file transfer from either computer; a split-screen display shows the files on each side. File translators translate between popular PC and Macintosh word processing file formats.

MacLinkPlus/PC
MacLinkPlus/PC is a complete connectivity solution between the Macintosh computer and any PC. It makes the PowerBook an excellent traveling computer for the DOS or Windows user. Everything you need is included, so you can easily exchange information in either direction between computers. Use your 3.5-inch DOS disks, the direct connect cable, or even your Hayes or compatible modems for longer distances. It delivers complete data compatibility between more than 400 Macintosh, Windows, and DOS file formats, including word processing, spreadsheet, database, and graphic formats. DOS Mounter software is included for DOS disk visibility on the PowerBook.

DOS Interoperability

AccessPC
AccessPC is a software program that allows the user to double-click on a MS-DOS floppy disk, bring it up on screen as an icon, and share the PC files with compatible Macintosh applications without going through a translator. It works with a wide range of Macintosh-compatible floppy and cartridge drives. With AccessPC, users can also format MS-DOS diskettes on the Macintosh computer.

Mountain View, CA
800-848-7677

Available: now
Price: $99.95

DOS Mounter 3.0
The DOS Mounter utility uses the SuperDrive™ in your PowerBook computer to mount MS-DOS disks directly on the desktop. DOS Mounter supports full and write-protected disks, allows MS-DOS disk formatting directly from the desktop, and supports many external MS-DOS drives, such as Bernoulli, PLI, SyQuest, and Kennect. It also includes Extension Mapping, a feature that links the MS-DOS file extensions with Macintosh applications. For example, the Lotus 1-2-3 file extension WKS is mapped to Microsoft Excel. This means that Excel will start automatically when you double-click the WKS file icon. Under System 7, DOS Mounter installs as a Control Panel and has Balloon Help available.

SoftAT
SoftAT is a software emulation of a fully featured IBM AT-compatible and enables the PowerBook 140 and 170 computers to function as AT laptops. SoftAT takes advantage of the PowerBook computer's 68030 processor to run MS-DOS and Windows 3.0 faster than ever. It can also provide up to 32 megabytes of PC-expanded memory for DOS applications, using real or virtual memory. SoftAT also brings PC-based CD-ROM applications to the Macintosh computer. You can work with any PC CD-ROM that works with the Microsoft CD-ROM Extensions, which are included in the package.

Communications and Terminal Emulation

AsyncServeR

AsyncServeR V2.0 is a software-only network access solution. With it, you can dial into your host VAX and become a member of your company's AppleTalk network, using the modems and serial connection equipment you already own. With AsyncServeR, you can take advantage of the file and printer services, electronic mail, and database access features of DEC's PATHWORKS for Macintosh, as well as any other AppleTalk-based ser-vices available in your internetwork, from home or on the road. On the Macintosh PowerBook, AsyncServeR V2.0 uses a vendor-supplied network Control Panel device to establish the connection with the host. A simple scripting language is used to define the procedure for dialing into and logging on to the host, after which host connection is fully automated, and can be established with a mouse-click or automatically during Macintosh computer startup. Once the host connection is established, AppleTalk services are delivered transparently through the Chooser and the Finder™ and, except for transfer speeds, look and feel just like a LocalTalk® or Ethernet connection. AsyncServeR V2.1 uses Apple's own AppleTalk Remote network access software, which provides the simple scripting and user interface features all Macintosh users expect. On the VAX host, Apple's AppleTalk Remote Access Protocol (ARAP) and AsyncServeR V2.1 work together to provide the robust, error-free AppleTalk connection serious Macintosh users need.

DataClub Elite

DataClub Elite offers everything you need to install fast server-based networks for Macintosh computer work groups. From International Business Software, DataClub includes dedicated server software plus its exclusive SmartClient software. Client machines running this software can store personal data locally, yet have it backed up automatically with the DataClub volume. DataClub enables you to implement a virtual server. This means that while you're away, your files may still appear on the server, but no one can access them. This feature eliminates file version confusion and version skew. DataClub also allows you to build a "SuperServer," which lets you combine multiple dedicated servers in your work group, yet they all appear as a single server for simplicity. Administrative tasks can be performed from any Macintosh on the network.

Instant Update
Instant Update is a collaborative application for Macintosh networks that helps groups of people communicate with unprecedented ease and effectiveness through live documents. The dynamic files keep up with the evolving information exchanged within the context of a document — everyone in the group sees everyone else's additions and changes. Instant Update provides an excellent way to manage group task lists, proposals, design specifications, or ad copy. Meeting topics can be preprocessed, and issues that everyone agrees on can be resolved, saving the meeting time for other topics. After the meeting, Instant Update helps you follow up on everyone's commitments. Instant Update stores text, pictures, and tables in an object-oriented database. It also supports basic Apple Events and TrueType fonts.

Security

DiskLock
DiskLock is a versatile password protection utility that provides the highest level of data security, including complete hard disk data security and file and folder locking. DiskLock features three levels of access security for the PowerBook computers, including DES encryption, and three levels of locking, including locking of the hard drive, folders, or individual files. And if you must leave your PowerBook unattended, the Lock-When-Idle feature automatically locks the PowerBook in sleep mode. DiskLock also provides an audit log that logs password activity, an internal virus checker, and its own screen saver.

startup and automatically relocked at shutdown. Automatic internal virus checking and password preferences that define minimum length and expiration period are among FolderBolt's many extra benefits. FolderBolt comes with administrator override and is System 7 compatible.

MacSafe II

Kent•Marsh

MacSafe II password-protects and optionally encrypts Macintosh documents and applications inside folderlike safes, restricting them from unauthorized access or alteration. MacSafe II is ideal for Macintosh computers that are shared or connected by a network like AppleShare® or TOPS. Whether you work with confidential payroll data, a proprietary database, or normal correspondence and memo files, MacSafe II protects your files from unauthorized access by a determined intruder. You can even choose automatic encryption (including ultra-rigorous DES encryption) on everything in your safe to achieve the maximum security possible. Encryption is always your option, not a requirement.

Expanded Books Project
The Expanded Books Project provides electronic versions of outstanding titles in an
appealing format offering readers many advantages not found in printed volumes.
Designed with the Macintosh PowerBook in mind, the entire Expanded Books
library can travel with you on the PowerBook hard disk. Of special interest to
students, educators, and discerning readers are the powerful search functions,
intuitive navigation tools, and sophisticated marking capabilities. Margin comments
and end notes are easily typed in, helping readers organize and refine their own ideas
about the text. Search functions enable readers to trace the development of themes
and characters more easily than ever before. The electronic text is paginated and
booklike in appearance. Large type options and the PowerBook's backlit screen
make eye strain and reading lights things of the past. The first three titles in the
series are Douglas Adams' The Hitchhiker's Guide to the Galaxy, Michael Crichton's
Jurassic Park thriller, and both volumes of Martin Gardner's annotated edition of
Lewis Carroll's Alice inWonderland. Voyager will publish three titles a month,
promising a wide range of titles from the classics to best sellers.

BookView
BookView is an adapter that allows you to add an additional external screen to your Macintosh PowerBook computer. The dealer-installed adapter duplicates the visual display on the internal screen and allows convenient connection to a variety of single-page, monochromatic monitors, including Apple, VGA, composite, and overhead projector screens. BookView is an ideal companion for on-the-road presentations. Salespeople, for example, can gather data with their PowerBook and display their findings for group pre- sentations on a large screen.

Computer Care, Inc.
Minneapolis, MN
612-371-0061

Available: now
Price: $395

BookView/Imperial
The BookView/Imperial interface provides enhanced flexibility to PowerBook users who need color, gray-scale, or monochromatic output for their presentations. Presenters can tuck their PowerBook into the fullest of briefcases and arrive with a complete presentation. BookView/Imperial provides a full choice of monitor output plus an additional 4 megabytes of RAM. A pass-through connector accepts a 2-megabyte Apple card to allow full expansion to 8 megabytes of system RAM. It supports color and gray scales on the PowerBook 140 and 170 computers, and monochromatic output for the PowerBook 100. Standard and full-page VGA and Apple monitors, NTSC, and overhead projector screens are compatible with the BookView/Imperial. BookView Imperial will support up to 19-inch monitors in 8-bit color. Since the adapter functions only when an alternate screen monitor is enabled, power consumption is very low. The adapter must be dealer installed.

Computer Care, Inc.
Minneapolis, MN
612-371-0061

Available: now
Price: $959 for PowerBook 100;

Envisio NoteBook Display Adaptors
Envisio NoteBook Display Adaptors provide two high-resolution display adapters for the Macintosh PowerBook computers. The Notebook Display Adaptor is a monochrome high-resolution display that enables PowerBook 100 users to drive 15-inch and 21-inch displays, as well as any VGA-compatible display or projection device. The Notebook 030 Display Adaptor is an 8-bit display adapter for use with the PowerBook 140 or 170 computer to support color. In addition to driving the monochrome 15-inch and 21-inch hi-res displays, this adapter will also drive 14-inch color displays, such as the Apple RGB display or any VGA-compatible projection device with up to 256 colors. The products can extend the functionality of PowerBook computers by adding a full- or two-page display, helping PowerBooks double as desktop computers and offering the option of plugging into an LCD projection panel so that presentations can be shared with an audience. Both adapters reside inside the PowerBook computer and plug into the slot provided for memory

expansion. Several memory configurations are available to allow the user to get up to as much as 8 megabytes of system RAM.

Lapis ColorServer SCSI

The Lapis ColorServer SCSI is an external video box that provides color and gray-scale dual-screen computing for the Macintosh PowerBook 140 and 170 computers. The Lapis ColorServer SCSI supports most standard monitors as well as VGA color. The second screen appears under the Monitors Control Panel on the PowerBook 140 and 170, as if a video card were installed. Multiple ColorServers can be connected, using the SCSI bus to obtain multiple screens. And there is an extra benefit of the Lapis ColorServer SCSI: Drawing software is super fast, using a high-level graphics model implemented in the 16 MHz 68000 CPU contained in the box.

Lapis Technologies Inc.
Alameda, CA
510-748-1600

Available: 5/92
Price: $799

Lapis DisplayServer SCSI

The Lapis DisplayServer SCSI, an external video box, connects to all Macintosh PowerBook computers via the SCSI bus to provide black-and-white dual-screen computing. The second screen appears under the Monitors Control Panel on the PowerBook 140 and 170, as if a video card were installed; on the PowerBook 100 a separate Control Panel appears. Multiple SCSI DisplayServers can be connected, using the SCSI bus to obtain multiple screens. The DisplayServer SCSI is compatible with most standard monitors, including VGA monochrome. And there is an extra benefit of the Lapis DisplayServer SCSI: Drawing software is super fast, using a high-level graphics model implemented in the 16 MHz 68000 CPU contained in the box.

RasterOps ClearVue/SD21

RasterOps ClearVue/SD21 is a 21-inch monochrome SCSI monitor for Apple PowerBook computers. It adds yet another level of flexibility to the PowerBook computers. The monitor can connected directly into the computer's SCSI port without requiring an interface device. The ClearVue/SD21 has a built-in SCSI controller and dual SCSI ports, which allow you to daisy-chain other SCSI devices. It also provides a SCSI select dial. The 1152 by 870 resolution provides the viewing quality required by serious desktop publishers. Couple it with a PowerBook computer, and you have an innovative and powerful solution at your fingertips.

ScuzzyView

ScuzzyView is a portable display adapter that connects monochrome and color displays as well as LCD panels to the Macintosh PowerBook computers. Measuring 2 by 4 by 6 inches and weighing less than 2 pounds, ScuzzyView fits in a briefcase and can easily be transported anywhere the PowerBook goes. And because ScuzzyView uses a universal input power supply, it can also be used with European power connections. Based on the ScuzzyGraph technology, which has been shipping for the Macintosh for over two years, ScuzzyView has its own graphics processor, which offloads processing from the Macintosh to speed up screen drawing. All Apple monitors are supported, as well as VGA monitors in monochrome and 8-bit mode. An optional NTSC encoder is available to support TV monitors and VCRs. Any presentation system based on LCD panels, projection monitors, or TV monitors can be driven by ScuzzyView under the control of the PowerBook.

_____

RAM

BookRAM
BookRAM memory cards give Macintosh PowerBook computer users a choice of
memory additions to the installed RAM with the ability to add up to a total of 8
megabytes of system RAM. The card, which plugs into the memory expansion slot,
is configured with 2, 4, or 6 megabytes of pseudostatic RAM. The pseudostatic RAM
is the same RAM used by Apple, and it draws very little power from your
PowerBook computer's battery. BookRAM has been designed to work with all three
notebook computers and is specially manufactured to be within Apple's size
specifications for total compatibility.

Computer Care, Inc.
Minneapolis, MN
612-371-0061

Available: now
Price: BookRAM 2 $329;
BookRAM 4 $629; BookRAM 6
$899

CMS PowerBook RAM
CMS PowerBook RAM for the PowerBook 140 and 170 computers provides
optional 4 megabyte and 6 megabyte components to upgrade overall system RAM to
6 megabytes and 8 megabytes repsectively. CMS uses only pseudostatic components
for maximum reliability and minimum power draw.

Available: now
Price: Coyote 2MB $389; Coyote
4MB $889; Coyote 6MB $1289

Lifetime Notebook RAM
Lifetime Memory offers 2-, 4-, and 6-megabyte RAM cards for the Macintosh
Products PowerBook computers. PowerBook 100 users can increase the standard 2
megabytes of RAM to 4, 6, or 8 megabytes to run System 7 and many larger
applications. PowerBook 140 and PowerBook 170 users can also increase their RAM
with Lifetime Memory cards. The computer can also be set up to use the memory as
a RAM disk, thus reducing hard disk activity and increasing battery life. Lifetime
cards use pseudostatic RAM for low power consumption and high reliability.

Mass Storage

CD Porta-Drive

The CD Porta-Drive makes portability of massive quantities of information a reality. Weighing less than four pounds, the CD Porta-Drive CD-ROM drive can be used anywhere you go with your Macintosh PowerBook computer. The 683-megabyte capacity provides access to the equivalent of 330,000 pages of text on one CD-ROM disc with a 325ms access time — perhaps the fastest in its class. The CD Porta-Drive is compact, fast, versatile, and dependable. With its external power supply, it doesn't attract debris or create heat. Instead, the CD Porta-Drive offers zero contamination and quadruple protection with a sealed drive mechanism and automatic lens cleaning to maintain the integrity of its critical components.

CD Technology, Inc.
Sunnyvale, CA

Price: 100 MB drive $995; 200 MB drive $1595; 500 MB drive $4495.

Liberty 50 Series Hard Disk Drive

Liberty Systems launches the 50 Series Hard Disk Drive, the smallest self-contained portable hard disk drive available for Macintosh PowerBook notebook computers. The 50 Series shaves as much as 28 percent off the size of similar products. It also offers up to 240 megabytes and battery-powered operation for the ultimate in portability for the PowerBook computers. Weighing in at two pounds, the 50 Series commands a fast 12ms access time with a 64K look-ahead cache. With its molded aluminum case, it can withstand an 80g shock while maintaining a 60,000-hour MTBF. The 50 Series carries an internal power supply/charger and an internal battery pack to supply up to three hours of battery operation. The 50 Series is designed for any traveling professional who needs compact, lightweight computer peripherals.

MacLite 40 and MacLite 80

CMS Enhancements, Inc.

The MacLite 40 and MacLite 80 internal hard disk upgrades offer powerful expansion for users of any PowerBook computer. Both drives sport speedy 15ms access times and support sleep mode, as well as all other specifica-tions for size and power consumption. For PowerBook 100 users, either product represents a significant upgrade from the standard 20-megabyte drive. The MacLite 80 converts any PowerBook into a primary personal work-station with a full 80 megabytes of formatted capacity. Both models include CMS SCSI Utilities 7.0.3, providing full System 7 support, flexible parti-tioning, password protection, and a high-speed cache.

Communications

Asanté EN/SC PB and EN/SC-10T PB
The Asanté EN/SC PB and EN/SC-10T PB are external SCSI-to-Ethernet adapters
that provide Ethernet connectivity through the Macintosh Power-Book's SCSI port.
The EN/SC PB includes ports for all three types of Ethernet media, thick, thin and
10BASE-T. The EN/SC-10T PB provides a 10BASE-T port only. The Asanté
EN/SC PB and EN/SC-10T PB can be easily installed in just a few minutes. And
with Asanté's Universal Installer, users are guided through a simple software
installation process without any special tools. Both adapters offer pass-through SCSI
ports, so they may be connected anywhere in the SCSI chain.

Asanté Technologies
Sunnyvale, CA
408-752-8388

Available: now
Price: Asanté EN/SC PB $549;
Asanté EN/SC-10T PB $449

DaynaFILE II
DaynaFILE II is an external disk drive that lets a Macintosh computer read and write
information on MS-DOS floppy disks, using familiar Macintosh techniques.
DaynaFILE II connects to the SCSI port on your PowerBook and can be daisy-
chained with up to six other peripheral devices. Dayna-FILE II is available as a
single 360K or 1.2-megabyte 5.25-inch disk drive or as a 1.44-megabyte 3.5-inch
disk drive. Dual drive units are also available that house either two 5.25-inch drives
or one 5.25-inch and one 3.5-inch drive. DaynaFILE II also includes DOS Mounter
software, which allows you to mount 3.5-inch MS-DOS disks via the SuperDrive in
your PowerBook. Opening an MS-DOS file with a Macintosh application then
becomes a one-step process; simply double-click the document icon.

DaynaPORT E/Z
DaynaPORT E/Z is a small, external SCSI connector designed for Apple's
PowerBook computers and other slotless Macintosh models. It provides connection
to all Ethernet cable systems, including 10BASE-T, thin Ethernet, thick Ethernet, and
fiber-optic cables. The DaynaPORT E/Z's compact, portable design makes it easy to
move traveling PowerBook computers from one network to another. With
DaynaPORT E/Z, your Macintosh can run a variety of network applications,
including all AppleTalk-based software as well as applications based on TCP/IP,
DECnet, and OSI protocols. AppleShare, NetWare, and TOPS operating systems are
fully supported. DaynaPORT E/Z is compatible with Macintosh System 7.

EtherGate
EtherGate is an EtherTalk®/LocalTalk routing gateway that allows you to dial in to your network and have full access to network services, local and   remote routing between EtherTalk and LocalTalk networks, and serial sharing over EtherTalk and LocalTalk networks. EtherGate consists of a built-in Ethernet interface (thick or thin) and two serial/LocalTalk ports. When a modem is attached to one serial/LocalTalk port, EtherGate allows any authorized remote Macintosh computer user to dial in with a standard modem and connect to an AppleTalk Ethernet network, a LocalTalk network, or both. Once connected, you become a full network node with access to all network services and applications. Print to the office LaserWriter® from home, share files between your PowerBook computer and a network file server, even send and receive e-mail while on the road.

Cambridge, MA
617-252-6300

Available: now
Price: $1699

NetModem/E
NetModem/E is a stand-alone Ethernet LAN communications device that allows Macintosh PowerBook users to dial in and have full access to network services. Using the remote network access, your PowerBook is turned into a full network node, allowing you to send and receive e-mail, participate in groupware applications, perform database transactions, perform remote network administration, transfer files, and use any other network resource as though you were directly connected to the LAN. No communications software is required, and there are no new user interfaces to learn. NetModem/E also allows LAN workstations to call out to remote information services or hosts. Geographically separated networks in a routing connection over ordinary phone lines can be joined using NetModem/E. NetModem/E connects directly to the Ethernet network and uses ShivaNet Manager software.

Shiva Corporation
Cambridge, MA
617-252-6300

Available: now
Price: $2299

NetModem V.32
NetModem V.32 allows Macintosh PowerBook users to dial in and have full access to LocalTalk network services. Using the remote network access, your PowerBook is turned into a full network node, allowing you to use and communicate with other network users and network resources — use NetModem V.32 to print out documents from the LAN's printer. No communications software is required and there are no new user interfaces to learn. NetModem V.32 also lets LAN workstations call out to remote information services or hosts. And geographically separated networks in a routing connection over ordinary phone lines can be joined using NetModem V.32. NetModem V.32 connects to any LocalTalk network and uses ShivaNet Manager Software for network administration.

TelePort/FullFax
The TelePort/FullFax is an easy-to-use Macintosh send/receive fax modem that connects directly to the Apple Desktop Bus™. There's no need for batteries or another power source. With the TelePort/FullFax, you can send documents created on any Macintosh PowerBook to any fax machine anywhere in the world at 9600 baud. Incoming faxes can be received at 4800 baud. An incoming fax can be viewed on the screen, printed, edited, forwarded, and/or stored. The TelePort/FullFax software is simple to use, graphically intuitive, and always accessible through the Control Panel. Pictures on the screen inform the user of modem and telephone status. Upon connection with another modem, TelePort/FullFax announces the rate of the connection and whether MNP data compression is in effect. The TelePort modem is auto-bauding. There is never a need for the user to change the Macintosh computer serial speed to match the speed of connections.

ADB 10Key
The ADB 10Key is a numeric/Fkey input device that complements the design of the
Macintosh PowerBook computer. The enclosure design provides a cover for
protecting the key surface for travel and doubles as a holder platform to give the key
surface a 9-degree plane for use. The ADB 10Key includes two ADB ports so as not
to terminate the desktop bus and a 24-inch male-to-male cable for flexible use. The
sculpted key caps' numeric legends are marked on the top surface, and the Fkey
legend is marked on the front surface of each key. A calculator utility with a
paperless tape display is included. The ADB 10Key matches the granite color of the
PowerBook.

Kensington NoteBook KeyPad
Kensington's external numeric keypad provides PowerBook users with convenient,
quick number entry on a separate numeric keypad. The KeyPad offers function keys
not available on the full-sized PowerBook keyboard but extremely useful to
accountants or salespeople. The KeyPad provides cursor/ arrow keys for quick
movement in a spreadsheet, plus function keys for customizing keystrokes to
perform often-used functions. Fewer keystrokes and less hand movement add up to
increased efficiency and overall productivity.

Price: $149.95

PowerKey Remote
PowerKey Remote is an ADB device that can turn on a Macintosh computer with a
phone call. PowerKey Remote electronically presses the Power On key when it
receives a ring signal on a standard telephone line. Alone, PowerKey Remote turns
on any Macintosh II. Add PowerKey and turn on any Macintosh SE, LC, Classic, or
II computer, along with its modem and peripherals. Use your modem to remotely
control your computer. Access files. Receive faxes. Retrieve e-mail. Transfer data.
The possibilities are limited only by the level of communications software used.
PowerKey Remote also includes UnWake configurable software to automatically
shut down your Macintosh after a user-defined period of modem inactivity.

Turbo Mouse ADB
The Turbo Mouse is quick, comfortable, precise, and easy to use. And Turbo Mouse
is an excellent complement to the stationary trackball design of the Apple
PowerBook computer. Ergonomically designed, the Turbo Mouse buttons and ball
are positioned for maximum comfort, and its unique design accommodates a wide
range of hand sizes as well as both left- and right-handed users. The large Turbo

Apple Computer, Inc.

Mouse ball gives you greater control for quick and easy movement. Turbo Mouse ADB buttons offer a variety of features. Click-lock makes dragging, selecting text, and scrolling easier. Chording (pressing two Turbo Mouse buttons at once) allows you to perform one of seven functions you define, including Save, Print, Open, Close, New, Quit, or Undo. Turbo Mouse also comes with special software that lets you change and customize acceleration and double-click speed — choose from one of five settings or customize your own. Turbo Mouse maximizes your work space, too, with a small 4.5- by 5.75-inch footprint.

Apple Computer, Inc.

Printers and Scanners

KODAK DICONIX M150 Plus Printer
The KODAK DICONIX M150 Plus Printer is an ideal complement for your Macintosh PowerBook computer. Small and light, this rugged portable with optional battery operation goes virtually anywhere your work takes you. The M150 prints crisp text, using Adobe Type Manager software or TrueType fonts, plus striking graphics on plain paper. The M150's smooth and efficient ink-jet technology works quickly and quietly. Print anywhere with the KODAK DICONIX M150 Plus Printer.

PowerPrint
PowerPrint is a collection of Chooser-level printer drivers that will allow Macintosh computer owners to print to more than 850 different printers. With PowerPrint installed, PowerBook owners can walk into any office with PowerBook in hand and print to virtually any printer. With PowerPrint, you no longer have to worry about the type of printer an office has. The PowerPrint package contains everything a user needs: printer drivers, a converter cable, and a manual for portable printing power anytime, anywhere.

Typist Plus Graphics
The Typist Plus Graphics solution is complete OCR and image-editing software. This hand-held scanner can read text and numbers directly into your word processor, spreadsheet, or desktop publishing application. And now Typist can scan and edit images with the Graphic Editor. Typist Plus software uses Caere's AnyFont technology to recognize any nonstylized fonts from 6 to 72 points (including column formats and spreadsheet numbers). Scan hundreds of words per minute at true 300 dpi resolution to achieve maximum accuracy. The new Graphic Editor software creates full-tone — 256 shades of gray — graphics in software. The Graphic Editor also lets you scan and enhance photos, artwork, images, and illustrations, using intuitive image-processing tools in either gray scale or black and white. Caere's proprietary LaserGray technology optimizes your output for laser printers to let you print halftones that look like photographs.

easily carried in a briefcase or in the optional WriteMove carrying case. The printer's five rechargeable nicad batteries fit inside the printer platen to conserve space and increase portability. The AC adapter can be used to recharge the batteries and also enables WriteMove to be plugged into a standard wall outlet for a direct power source. The WriteMove comes with six outline font families and also supports Apple's TrueType and Adobe Type Manager (ATM). In addition, GCC has added QuickSpool II, a serial print spooler for printing documents in the background.

Traveler Deluxe $129.95

PowerCase
PowerCase is a leather hardcase designed specially for the PowerBook 140 and 170
computers. When the case is closed, the PowerBook is held firmly in place without
the use of straps. Inside the lid are two pockets for extra batteries, and pockets for
six disks as well as for credit cards and pens. The PowerBook can be used in the
case with all connectors plugged in. Battery charger and AC units are placed behind
the computer, which allows the screen to be tilted backwards. The PowerCase
features a large outside pocket for papers, binders, and other items.

Accessories

Automobile Power Adapter
With the Automobile Power Adapter for the Macintosh PowerBook computer, you have the ability to operate your PowerBook and charge the internal battery using any 12-volt DC source, such as a vehicle, a boat, a solar system, or a large 12-volt storage battery. Adapter operation is designed to be identical to that of the AC adapter supplied with the computer. Computer operation in your car will be the same as in your office. The adapter lets you charge the computer battery from your car as you travel between job sites or customer calls. The battery will always be fully charged and ready for full portable operation.

Lind Electronic Design Company
St. Louis Park, MN
800-659-5956

Available: now
Price: $99.95

Auxiliary Power Pack
The Auxiliary Power Pack for the Macintosh PowerBook computers allows the user to be away from all power sources for greatly extended periods. The Power Pack contains a large 6-volt battery. This allows the computer to run with battery power only for up to four times longer than the internal battery alone. This should be a full day's work for all but the heaviest computer use. The battery pack has a built-in charger that will charge the battery overnight and indicators that show when charging is complete.

Lind Electronic Design Company
St. Louis Park, MN
800-659-5956

Available: now
Price: $189.95

AC Pocket Adapter
The AC Pocket Adapter is small enough to carry in the PowerBook computer's case or a pocket. Designed just for 120-volt AC use, it uses the same carry-along enclosure as the DC Power Adapter and includes a 3-prong AC plug. The adapter provides an LED indicator and 6 feet of cord to the computer plug.

Available: Q2 1992
Price: $199

Cable Safe #425
Cable Safe #425 is an anti-theft security cable kit designed just for the Macintosh PowerBook computer. Its simple design allows it to be installed by anyone in minutes. A steel bracket uses existing screw holes to attach to the underside of the PowerBook. A steel cable then attaches the PowerBook bracket to any stationary object, such as a desk, table, or chair. The kit is designed to travel with the PowerBook when security is not necessary. It folds conveniently out of sight when not in use. Cable Safe comes equipped with bracket, cable, screws, torx driver, and solid brass padlock.

Security Concepts
Santa Monica, CA
310-576-6279

Available: now
Price: $39.95

Apple Computer, Inc.

DC Power Adapter
The DC Power Adapter fits into an automobile lighter and other DC battery sources to run and recharge the PowerBook computer in RVs, boats, planes, and industrial and military vehicles, or with solar generators. Input power from 10 to 30 volts is automatically converted to the 7.5 volts DC required by the PowerBooks, and a bright LED indicator shifts from green to amber to warn if the input voltage is getting low. The adapter's black aluminum enclosure is small and lightweight. A 6-foot cord that connects the computer plugs with the lighter source is included.

Empire Engineering
San Luis Obispo, CA
805-543-2816

Available: now
Price: $99

External Battery Charger
The External Battery Charger (BC-100) charges a spare battery for the Macintosh PowerBook 100 in less than 2 hours. The battery can be charged using the supplied 115-volt AC transformer, the supplied Auto Lighter Cord, or the PowerBook 100 computer's AC power adapter. The unique ability of the BC-100 to use the Apple power adapter ensures the BC-100's international compatibility for all of the PowerBook 100 computers worldwide.

Lind Electronic Design Company
St. Louis Park, MN
800-659-5956

Available: now
Price: $149.95

Farallon Portable Pack
The Farallon Portable Pack is a convenient, shaving-kit-sized pack of indispensable tools and software — a perfect traveling companion for PowerBook users who need to temporarily connect to a remote network, access a local network, or build a small network. The pack contains tools and software to connect into diverse telephone systems and to dial up to another Macintosh computer or network, regardless of location.

Farallon Computing, Inc.
Emeryville, CA
415-596-9000

Available: now
Price: $295

Full Cycle Battery Charger
The Full Cycle Battery Charger (BC-4070) charges and conditions a spare battery for the Macintosh PowerBook 140 and 170 computers. The battery is first discharged and then charged at a rapid rate for the first 80 percent of its capacity, then trickle-charged for the remaining 20 percent of capacity. The battery may be charged in a shorter time if desired by inserting the battery in the charger and not selecting the discharge cycle. The Full Cycle charger minimizes overcharge stress and eliminates memory effect so the service life of the battery should be equal to or more than the manufacturer's ratings. A 115-volt AC power adapter is included.

Lind Electronic Design Company
St. Louis Park, MN
800-659-5956

Available: now
Price: $189.95

Get-A-Grip
Get-A-Grip accessorizes the Macintosh PowerBook 140 and 170 computers with a clip-on soft, black strap handle. This soft strap can be adjusted for shoulder and hand carrying positions. You install Get-A-Grip by replacing the computer's "feet" with the Get-A-Grip feet. This soft strap handle makes the PowerBook easy and secure to grasp and is helpful in situations where constant opening and closing of the PowerBook makes a standard zippered carrying case inconvenient.

Price: $35 per cable

Lock-A-Note

Premier Technology
San Francisco, CA
415-255-8300

Lock-A-Note protects against "walk-away" thefts of Macintosh PowerBook 140 and 170 computers. To install Lock-A-Note, you simply replace the PowerBook's original foot with a specially configured Lock-A-Note foot. Attached to this foot is a nonremovable, flexible, 3-foot black vinyl-covered aircraft steel cable with a loop at the end. After proper installation of Lock-A-Note, theft is almost impossible without cutting the metal cable or destroying the PowerBook case.
