

PYROMANIA! - Playing With Fire™ (Volume 1, 2 and PRO)

Welcome to PYROMANIA!-Playing With Fire by Visual Concept Entertainment. VCE has been a leader in producing visual effects for the motion picture industry over the past 20 years. Over 200 motion pictures including RETURN OF THE JEDI, ROBOCOP, BEETLE JUICE, ADDAMS FAMILY, and most recently MEN IN BLACK have featured our work.

That expertise is now available for the first time with professionally photographed motion picture visual effects elements filmed especially for this CD-ROM. Pyromania has been used on "Babylon 5," "Hercules-The Legendary Journeys," and in the Academy Award™ Nominee "Starship Troopers." Pyromania has been used for promos on NBC, The Discovery Channel, The SciFi Channel.

The images on these CD-ROM's are not computer generated effects or computer graphics! The images on these discs were photographed for their "organic" quality and are currently difficult if not impossible to recreate successfully or realistically using computer technology.

The image files on these CD-ROM's are not "video-captured". Each image was originally photographed on 35mm motion picture film. The negatives were scanned using a linear array scanner at 2K resolution (2048 pixels wide x 1536 pixels high, 72 dpi and sampled down.

This results in a higher quality image without "video artifacting" or "video quality" as observed in other CD-ROM's utilizing video captured and converted QuickTime™ movies.

You can visit our web site and see thumbnails of the sequences in Pyromania Vol 1, 2 and PRO:
