1.2 Description

Description

MP3-TagED is a GUI-based program to Add/Edit/Remove ID3 TAG in MPEG Audio Files.

See **history** for all the new functions added.

1.3 System Requirements

System Requirements

° Requires at least kickstart v2.04+ ° [gtLayout.library](#) v40+ ° [reqtools.library](#) v38+ ° [popupmenu.library](#) v8+ ° [ACDB](#) to use the Import ACDB File function. ° A keyfile to Save TAG's - it's **FREE** .

This program has been tested successfully on the following configurations:

° A1200/030 50Mhz 32Mb RAM 1.4Gb HD 8xCD-ROM 1084 C= Monitor ([Complete List](#)) ° A4000/060 50Mhz 64Mb RAM ([Complete List](#))

1.4 Features

Features

° Uses [gtlayout.libray](#) (font and screen mode sensitive). ° Can be opened on any public screen. ° AppIcon & AppWindow for Drag 'n' Drop. ° Commodity support. ° Read / Write / Delete MP3 ID-TAG. ° Multiple file support. ° Read files at startup. ° Fresh Genre list (sorted). ° Genre statistics. ° Import ACDB File. ° Import Playlists: - SongPlayer - AmigaAMP - Amplifier ° MP3 Header information. - ID - Layer - BitRate - Frequency - Mode - Length - FrameSize ° Rename files through program. ° Make filename from ID-TAG (configurable). ° Configurable filecomment. ° Export TAG information to following formats: - ASCII - AmigaGuide - SongPlayer playlist ° Copy TAG to all loaded files. ° Default ID-TAG display if loaded MP3 hasn't got a TAG (configurable). ° It's EMailware.

1.5 Disclaimer

Disclaimer

This package can be freely distributed as long as:

1. It is not sold; only a reasonable charge for copying and storage medium is allowed.
2. All of the following files are included in their original form without modification of any kind.

MP3-TagED is released as **EMAILWARE** please respect it!

Permission is hereby granted to include 'MP3-TagED' in PD compilations such as Fred Fish or Aminet CD.

You may include this archive on any Magazine CoverDisk/CD-ROM, as long as you contact me (through e-mail) and send me a copy of the magazine. See [Last Words](#) .

Use 'MP3-TagED v2.8' at your own risk.

The Author, Christian Vigård takes no responsibility at all, for whatever may happen you or your software/hardware caused by any of the files containing in this package.

1.6 How to get a free KeyFile

How to get a FREE KeyFile

There is no excuse not to register this program if you use it. It's 100% FREE and to get a keyfile just e-mail the [Author](#) and don't forget to include your name.

Q: Why do I need a keyfile ?

A: Keyfile has been added for one single reason, and it is to see how many people using this program.

Limits without keyfile

The program is fully functional except for 3 things.

You can't use the "Read" "Write" "Delete" functions in main window.

I've noticed a cracked version of MP3-TagED v2.3 (cracked by zIgUS/FTN) If you are using a cracked keyfile then please delete it and get one from the author instead, or else this may be the last version.

Your name will only be used to create a keyfile for your own personal use. The keyfile will be sent to you as soon as possible.

1.7 Installation

Installation

Use the supplied Installer script.

The following files should be in the MP3TEDv26.lha archive.

1.13 History

History

v1.0 (21-Jul-98)

- First public release.

v2.0 (25-Oct-98)

- NEW: Total rewrite of program.

v2.1 (21-Mar-99)

- NEW: MP3 Header Information - Supported fields: - ID - Layer - BitRate - Frequency - Mode - Length - FrameSize
- NEW: Added support for AppIcon/AppWindow (Drag-n-Drop).
- NEW: Menu items
- NEW: Default MP3-TAG
- NEW: Copy Tag Fields
- NEW: More fields added to Comment FOrmat.
- CHANGE: Removed the `Use` button in Preferences window.
- BUG-FIX: Rename function was not working properly (fixed).

v2.2 (18-Apr-99)

- NEW: MenuItem Sort - Sort main list by: - Filename - Artist - Songname - Album - Filesize
- NEW: **Status** window. (MP3 Info).
- NEW: Genre Status window. (Genre Statistics).
- NEW: **KeyFile** Get it! :)
- NEW: Rewrote some parts of Argument parser code.
- CHANGE: The only way to save Default TAG settings is by using the Save button in Preferences window.
- CHANGE: MP3 Information window is replaced by a reqtools requester.
- CHANGE: Structure of Preferences file changed.
- BUG-FIX: Forgot to free Memory when "Remove" button was pressed.
- BUG-FIX: Fixed some errors in the Documentation.

v2.3 (3-May-99)

- NEW: Installer script finally ready.
 - NEW: 1 Icon added to the program.
 - NEW: **Known Bugs** added to MP3-TagED.guide.
 - NEW: Genre button added to Default TAG.
 - NEW: Added Import Playlist - Supported formats: -SongPlayer -AmigaAMP -Amplifier
 - NEW: Added **popupmenu.library** .
 - NEW: It's now possible to load a playlist at startup.
 - NEW: Added SKIPPLST - See **Arguments / ToolTypes** .
 - NEW: Information window position is now configurable.
 - CHANGE: "Tag To FileName" window is removed and replaced with a **popupmenu** .
 - CHANGE: "Comment Format" window is also removed and replaced with a **popupmenu** .
 - CHANGE: Start button in **Copy Tag Fields** window is now disabled. if no fields are marked.
 - CHANGE: "Information" requester is replaced by a window (again!). The main reason for this is that you can have the window open and browse the loaded files at the same time. Information will be updated when you select a file.
 - CHANGE: Cosmetic change made to **Status** window. (Listview removed and replaced with a **glayout.library** button.
 - BUG-FIX: "Make FileName From TAG" and "Rename" wasn't working correctly. Forbidden characters will be corrected automaticly.
-

- BUG-FIX: Sort filenames wasn't working correctly. If files from different drawers was loaded the filename wasn't sorted correctly.

v2.4 (27-May-99)

- NEW: Percentage now shows in Genre Status window.

- NEW: It's now possible to add files by directory.

- NEW: Pressing TAB when Information window is open will make MP3-TagED shift between Main- and Informationwindow.

- NEW: Information window menuitem is now disabled when Information window is open.

- NEW: Pressing "Add" in **Mainwindow** and a popupmenu will appear.

- CHANGE: Removed the following menuitems: - File / Import / SongPlayer - File / Import / Amplifier - File / Import / AmigaAMP

They are replaced with **Load PlayList** All lists can be loaded anyway.

- BUG-FIX: "Tag To FileName" wasn't working correctly. The "Space To Underscore" option was always enabled.

Reported by: Matt Sawyer (Thanks!)

v2.5 (5-Sep-99)

- NEW: Format of Export / Ascii & AmigaGuide is now configurable.

- NEW: New prefs window is used for Export / Ascii & AmigaGuide.

- NEW: A new menuitem have been added: [Save Settings].

- NEW: Filename length is now max 30 characters.

- CHANGE: Add directory is removed. No use to have it since aal files can be selected in filerequester. (Lot's of people didn't get it to work).

- CHANGE: Structure of Preferences file changed.

- CHANGE: Large parts of Prefs handler is rewritten.

- BUG-FIX: Removed enforcer hit on exit.

v2.6 (31-Oct-99)

- NEW: TextViewer is now configurable (Ascii/AmigaGuide preview).

- NEW: There is no need to define X/Y positions for Information window.

Just move [Test] window and the Left-/TopEdge values will automatically appear.

- BUG-FIX: Import / PlayList was "ghosted" when no files was loaded.

v2.7 (5-Jan-2000)

- NEW: AmigaGuide documentation updated.

- NEW: Import **ACDB** Files function is now finally ready.

- CHANGE: Prefs Handler rewritten again.

- CHANGE: Status Handler rewritten.

- CHANGE: Delete TAG Window removed and replaced with reqtools-requester.

- CHANGE: Popupmenu removed from Write button, Write Select & Write ALL moved to Menu.

- BUG-FIX: Year 2000 Bug fixed, correct year will now be written in the Export List functions.

v2.8 (30-Jan-2000)

- NEW: 'Copyright' now shows in information window.

Suggested by: Andy Thomson

- NEW: If program is already running and only 1 is copy allowed, another copy can pop up the original program's interface or terminate it.

This function may contain bugs.

- CHANGE: Cosmetic Change made to Settings Window.

- CHANGE: Cosmetic change made to Copy Tag Fields window. (It looks very nice and is more useful in my opinion :)

- CHANGE: GUI updates here and there.

- BUG-FIX: Minor error fixed in the 'Delete Tag' function.

1.14 ToDo List

ToDo List

· Add support for Locale.

· Your Ideas!

1.15 Credits

Credits

I would like to thank the following persons, without them MP3-TagED would not exist.

Olaf 'Olsen' Barthel: For the gtlayout.library (used for all the gui).

Nico Francois & Magnus Holmgren: For the reqtools.library.

Henrik Isaksson: For the popupmenu.library.

Mark Ritter / Paul Huxman: For all the help with gtlayout programming.

Piotr Gapinski: For writing the superb program ACDB.

Fredrik Rambris: For the MPEG Header Info code.

Tobias Persson: For Beta-testing this program.

Christian Nilsson: For Beta-testing this program.

Daniel 'Bejron' Andersson: For some nice ideas and testing.

Kirt Strauser: For some nice ideas and testing.

Matt Sawyer: For the bugreport.

ALL REGISTERED USERS Without them this version wouldn't exist.

Also thanks to the following bands for their great music

Metallica / Blind Guardian / Gamma Ray / Rhapsody / Luca Turilli Stratovarius / Mortum / Supreme Majesty / Amorphis / Children Of Bodom Non Serviam / HammerFall

/Greetings Christian Vigård

(If you want a keyfile than please use "MP3-TagED v2.8 - KeyFile" as subject).

1.17 Request From Author

Request From Author

- ICONS

I want Icons to use with the MP3-TagED package (both in MagicWB/NewIcons style).

If you want to help me with this then please [email](#) me.

1.18 Last Words

Last Words

My english isn't the best because my native language is Swedish. So if you don't understand this text - sorry :).

If a magazine wishes to put this archive on their disk, I must be notified and granted a free copy of the issue. Usually the Amiga magazines don't even bother to send you an e-mail when they use your work on their disks, they don't even bother to mention your name. That STINKS!

MP3-TAG / Sort / By FileSize

Sort loaded files by Filesize.

1.41 File / Rename

File / Rename

Rename selected file. See [Rename Window](#) .

1.42 File / Information

File / Information

View MP3 Header Information on selected file, a window will pop up with the header info.

You can also doubleclick on a file and get the same result.

1.43 File / Make FileName From Tag

File / Make FileName From Tag

Make filename from ID3-TAG (configurable through preferences window).

1.44 File / Import / PlayList

File / Import / PlayList

Import SongPlayer/AmigaAMP/Amplifier/ playlist.

1.45 File / Import / ACDB File

File / Import / ACDB File

You can import **ACDB** files with this function.

How this works:

1. Load all MP3's from a CD, let's say that there are 8 tracks on the CD. 2. Load the ACDB File. If there are 8 songnames in the file they will be set as TAG to all the loaded files.

**** NOTE ****

If you have loaded 7 MP3's and there are 9 songnames in the ACDB file the program will show you a requester about it and abort.

1.46 ACDB Information

ACDB Information

WHAT IS "CDDDB", AND WHAT DOES ACDB DO? -----

In short, the CDDDB and ACDB saves you from having to manually type in artist, disc and track title information for each audio CD you play via your Amiga's CD Audio player.

Each time you play a CD in your Amiga's CD-ROM drive, you can access a "CD DataBase" via the Internet (located at <http://www.cddb.com>) for information about that specific disc. Recognized as the most accurate audio CD identification service on the Web, CDDDB has data on all kinds of music, even CDs with multiple pressings. Best of all, accessing CDDDB is free for your private use.

CDDDB (CD DataBase) is an information database containing artist, disc title, track titles, and other information for digital audio compact discs. Over time, this archive has grown to contain a substantial collection of CD information and is continuing to grow at a rapid rate. This database can be accessed by applications via the CDDDB server hosts that have been set up on the Internet around the world.

The CDDDB data format and the CDDDB servers are designed to be open, and are used by many client applications requiring CD information. CDDDB has become the de facto standard for Internet access of compact disc information.

ACDB (Amiga CD dataBase) retrieves this information for any CD that you request. It then saves these files in a format (SCDP file format) that many Amiga CD players can read.

Currently, configuration of ACDB is only via icon TOOLTYPES.

You can download ACDB from aminet: disk/cdrom/ACDB11.lha ?

This window will show some information about the MP3 file you've selected.

The information you will get is:

- ID - Layer - BitRate - Frequency - Mode - Length - FrameSize - Copyright

· Close

Close window and continue.

1.57 CopyTagWindow

Copy Tag Window

· SongName

Select `SongName` and the program will copy it to all other loaded MPEG Audio files.

· Artist

Select `Artist` and the program will copy it to all other loaded MPEG Audio files.

· Album

Select `Album` and the program will copy it to all other loaded MPEG Audio files.

· Year

Select `Year` and the program will copy it to all other loaded MPEG Audio files.

· Comment

Select `Comment` and the program will copy it to all other loaded MPEG Audio files.

· All

Select all fields.

· None

Clear selected fields.

· Start

Write loaded ID3-TAG to all other loaded files. The program will start at top and write the ID3-TAG to all your files, it doesn't matter if you select the last file all other files will have the same ID3-TAG anyway.

· Cancel

Close window.

1.58 Status Window

Status Window

This window will show:

- Loaded File(s) - Total Size - Total duration (HH:MM:SS) - File(s) with TAG - Genre Statistics

Genre Statistics Example:

-UNSET- 4 <-- 4 loaded files has -UNSET- as genre. A Capella 0 <-- 0 loaded files has A Capella as genre. Acid 27 <-- 27 loaded files has Acid as genre. Acid Jazz 0 Acid Punk 0 Acoustic 4 <-- Etc...

 · Save

Save the information to a file.

Program will check the active page and save the `viewed` information.

· Close

Close `Status` window.

1.59 EMAILWARE

EMAILWARE

MP3-TAGED IS RELEASED AS EMAILWARE. THIS MEANS IF YOU USE IT, YOU'LL HAVE TO SEND ME AN E-MAIL. I HAVE PUT ALOT OF TIME AND EFFORT INTO THIS PROJECT, SO THE LEAST YOU CAN DO IS SEND ME AN E-MAIL. TO USE THIS PROGRAM TO 100% YOU NEED TO REGISTER

WANT TO PUT THIS ARCHIVE ON A MAGAZINE DISK ? FIRST OF ALL READ [Disclaimer](#)
