Chapter 1

GoFetch!_Scripts

1.1   main

```
                      Two Arexx Scripts for GoFetch!
                Version 1.0
```

_____

```
            Yam2GoFetch!.rexx

            Batch2GoFetch!rexx
```

1.2   yam

```
              Yam2GoFetch.rexx
```

  Is a script to batch download files from Aminet Recent files.

  It was written to work from Yam using Aminet Recent e-mails
  but any Recent file will work. As Yam has it's own built in
  text clipping (to the clipboard) it is simplier to use from
  within Yam. Powersnap or the Snap facility within MCP is
  required to paste the clipped text into the requester. It is
  best to clip the text in, as the script relies on the spacing
  between the file name and the path to determine if the text
  is a valid path and file. The script then makes up a batchfile
  which is sent to the profile list in GoFetch!. Or the batchfile
  can be saved for later use with
              Batch2GoFetch!.rexx
                 .

  Requirements

  PowerSnap   Aminet.....util/cdity/PowerSnap22a.lha
  rexxreqtools.library Aminet.....util/rexx/RexxReqTools.lha

```
reqtools.library      Aminet.....util/libs/ReqToolsUser.lha
```

Adjustment

Change the paths to suit your set-up.

```
gofetch_path = 'AmiTCP:GoFetch/GoFetch!' Line 21
miami_path =   'AmiTCP:Miami/Miami'     Line 22
settings =     'Miami:Miami.default'    Line 23
```

Enter the name of your nearest Aminet server aand the path to the site.

```
site =         'ftp.demon.co.uk'        Line 25
dir_address = '/pub/mirrors/aminet/'    Line 26
```

Set the path to the where you want the batchfile saved.

```
batch_path =   'Yam:gofetch.batch'       Line 28
```

Yam Setup

Just enter it as one of Yams Arexx scripts in the configuration,
without "open window" and "wait for termination".

1.3 batch

```
                Batch2GoFetch.rexx
```

Is a script to batch download files from Aminet from a file
built up by
            Yam2GoFetch!.rexx
                .

Requirements

```
rexxreqtools.library Aminet.....util/rexx/RexxReqTools.lha
reqtools.library     Aminet.....util/libs/ReqToolsUser.lha
```

Adjustments

Change the paths to suit your set-up.

```
gofetch_path = 'AmiTCP:GoFetch/GoFetch!' Line 22
miami_path =   'AmiTCP:Miami/Miami'     Line 23
settings =     'Miami:Miami.default'    Line 24
```

Enter the name of your nearest Aminet server.

```
site =         'ftp.demon.co.uk'        Line 25
```

Set the path to the batchfile the same as you set it in

```
            Yam2GoFetch!.rexx
                .
```

```
batch_file =   'Yam:gofetch.batch'      Line 27
```
