## WINDSOR

### 5/5 FOR JOYTECH XBOX™ WIRELESS 'NEO S' CONTROLLER.

Thursday 26 February 2004, Posted 12:03 GMT

Following phenomenal Christmas Media Coverage, JOYTECH's range of Wireless Controllers for PS2® and Xbox™ continue to go from strength to strength. Today the long awaited review published in the Official Xbox™ Magazine appeared on news stands everywhere.

Far and away the best selling Xbox™ publication in the UK (**ABC's just released show the magazine selling over 83,000 copies per month**), Official Xbox™ Magazine showed yet again that they know a good peripheral when they see one, dedicating the entire page to the review, and awarding the new JOYTECH Xbox™ Wireless 'Neo S' Controller a full **5/5** score!

Seemingly unending in praise, Future Publishing's best selling Xbox™ title said of the new controller **"A great little pad... JOYTECH have thought of everything...No interference in sight..."**

Perhaps best of all, the magazine left readers with a final quote set to convince even the most cynical of players saying **"Don't wait a second longer to join the wireless revolution. it's here, it's all good!..."**

Further and indeed unquestionable evidence then, that JOYTECH take the lead in the field of Wireless peripherals!

Please click on any of the links on the left hand side of the screen for further information, or indeed to see the review in full.
