WINDSOR

10/10 FOR JOYTECH PLAYSTATION® 2 WIRELESS ANALOG CONTROLLER

Friday 21 November 2003, Posted 12:03 GMT

One of JOYTECH's grand Christmas presents has already been unwrapped by the countries leading specialist press, and is fast coming the only peripheral worthy to fill the stockings of the nations video game magazines!

JOYTECH's PlayStation® 2 Wireless Analog Controller and Xbox™ Wireless 'Neo-S' Controller are being hailed as seasonal sensations by leading journalists, as this first review from PowerStation Magazine clearly shows!

Standing proud as the countries highest selling PS2 Tips Mag (**Selling an awesome 34,054 copies each and every month**), PowerStation bestowed the JOYTECH PlayStation® 2 Wireless Analog Controller the highest possible praise, awarding it a full **10/10** score!

Dishing out compliments like they're going out of fashion, the magazine called the controller "*The ultimate solution for the PS2...Great to play with...This is how all wireless pads should be!*"

It doesn't get much better than this from Highbury Paragon's second highest selling video game title, with early signs pointing heavily towards sister magazines 'P2', and the countries best selling unofficial PlayStation® 2 title 'Play', following suit, with similar reviews.

We will of course update you with further news as it develops, but for now, please feel free to read the review in it's entirety below, and those that wish to find out more information can do so by clicking on the relevant link, or by contacting their local JOYTECH representative...
