

JOYTECH MEDIA COVERAGE UPDATE

Welcome back to the first JOYTECH Review Roundup of the year! Sorry we've taken so long to get you the latest instalment, but it seems like JOYTECH's Christmas momentum has kept on going the way in to the new year! Check out the incredible reviews for JOYTECH's range of Wireless Controllers! FULL MARKS from Official Xbox™ Magazine, and Play, not to mention incredible scores from the countries leading specialist press!

JOYTECH's range of UEE equipment is also starting to hit the press, with suitably impressive results. I promised you all a look at the astonishing results our International territories have had in promoting JOYTECH peripherals, but due to time constraints, I'm afraid it's been put on hold for another month! Thanks to all territories for sending over coverage, I promise we'll feature the results shortly! Until then, should you wish to see separate copy for any of these reviews, or wish to find out a little more about any of the products in the JOYTECH Range, then please feel free to click on the 'Contact JOYTECH' button at the bottom of the page. Enjoy!
