1.2 About Amiga HelpLine

AMIGA FREE HELPLINE(c) TERRY GREEN 30th December 1998.

Hello my name is Terry Green. I have had an Amiga A1200

for over 5 years, one day I thought that I would start a

Public Domain Software Library, and not being able to afford to pay for advertising I put an advert in our local Admag, a free ads paper, ever since then I have had people phoning me and asking for advice on how to do things on the Amiga computer. So with me knowing a little bit about a lot of things I thought I know I will start an Amiga HelpLine to give free advice about all things Amigan. The only trouble was I don't know an awful lot, so I put an advert in the Admag and Amiga Format Readers Ads. My helpLine has now grown to over 40 people who are willing and able to give advice on most things of the Amigan.

If anyone feels that they can be of help to anybody else and that they want to join my Amiga HelpLine they can contact me on.
