## 1.36 Michaela Pruess

Michaela Pruess  
 michaela@flagranti.net  
<http://www.flagranti.net/amiga>

She is the author of the great Version checker "VersCheck".

She's the only one, who wrote an program to check the versions of the system files. And that's specially for my Guides.

Michaela, thanks for the ability to distribute it with LibGuide. Dear reader of this guide, with Michaela's program you are be able to check your libraries easilier than before. No more slow ARexx scripts. Now it's a full vbcc program. Now it's also possible to check the correct versions of PPC, WarpOS and AROS versions. (That's the first program which will do that.)

Please respect the hard work of Michaela and download the complete VersCheck archiv from Aminet. (util/cli/VersCheck.lha)  
There you will find your special version from 68000-68060.

Here you can get some  
information

.

To Michaela: Many thanks, best wishes and kisses again ;-)

## 1.39 Special Tools - AddDatatypes

Short: New AddDataTypes, V45.2  
Author: GISBURN@w-specht.rhein-ruhr.de (Roland Mainz)  
Uploader: GISBURN@w-specht.rhein-ruhr.de (Roland Mainz)  
Type: util/sys

New "AddDataTypes", V45.2

This is the datatypes.library V45.3-matching release.

Includes a set of sample descriptors with tools, including descriptors for  
AmigaVision Flow,  
Aminet ReadMe,  
FantaVision (IFF FANT),  
IFF AIFF,  
IFF SMUS,  
LHarc,  
MovieSetter and so on.

Part of the "DataTypes Replacement Project", which includes a new  
"AddDataTypes", a new "datatypes.library" and a new "MultiView"  
(GMultiView).

This is a new AddDataTypes command.  
It offers more flexibility than the previous versions offered by Commodore.

---

- 1) It offers the possibility to use subdirectories in DEVS:DataTypes/.  
Finally, no more chaos in your datatypes drawer.
- 2) It fixes some memory leaks of the old AddDataTypes command when replacing datatype descriptors.
- 3) It is 100% compatible to the original versions V39 and V40
- 4) It includes a preferences editor.

## 1.40 Special Tools - datatypes.library

Short: New datatypes.library, V45.3, + AREXX + DTConvert  
Author: GISBURN@w-specht.rhein-ruhr.de (Roland Mainz)  
Uploader: GISBURN@w-specht.rhein-ruhr.de (Roland Mainz)  
Type: util/libs

This project replaces the old datatypes.library V40.6 from CBM.

Features:

- Fully backwards compatible: The datatypes.library V45 has the same interface as V40/V39, old applications won't have problems with this update.
- Speed. The new datatypes.library is a little bit faster than the original. On request, a 020-version would be possible.
- Bug-Fixes: datatypes.library V45 fixes all bugs I knew about the datatypes.library V40.6.
- Extended interface:  
The new datatypes.library introduces new features in the datatypes system:
  - Tools: You can define a set of tools for each datatype.  
A DT browser like "GMultiView" is able to present the list of tools in a menu/dock/etc., and is able to launch them.  
  
For example, you're viewing a C source, you're able to launch CED from the tools menu.
- Image: The datatypes.library V45 includes the docs how to handle a datatype like an image within applications and/or other subclasses.
- Descriptor list: Applications are now able to access the datatypes global descriptor list in a system-friendly way.
- AREXX interface: A backwards-compatible and extended interface

Many other features have been added to make things using datatypes easier.

## 1.41 Special Tools - DTView

Short: DataType picture viewer & converter, works with graphic cards

## 1.42 Special Tools - HappyDT

Short: Allow all prog. to use Datatypes  
Author: cfc@iname.com  
Uploader: cfc@iname.com  
Version: 2.4  
Type: util/cdity  
Distribution: Shareware

This commodity provide the use of datatypes to ALL software like Deluxe Paint, Brilliance, etc...

Thanks to Datatypes, an app can load files (eg. pictures), without knowing the type of the file. It can load GIF, JPEG or PNG pictures without specific code.

But few commercial apps use this feature which comes with Workbench 3.0.

It's the purpose goal of HappyDT: HappyDT acts just like a filter between programmes and pictures. When an app tries to load a picture saved in an unknown type, HappyDT converts it in an temporary IFF file. In this way, the app acts just as if it loaded an IFF picture.

In addition, if the picture is packed, HappyDT can unpack it with Xpk or Xfd.

## 1.43 Special Tools - PlayDT

Short: DataType Sound player  
Author: tst92@ecs.soton.ac.uk

## 1.45 Special Tools - FasterDatatype

Short:            Speedup for AddDataTypes  
Author:           nagilum@chillout.org  
Uploader:         nagilum@chillout.org  
Version:          1.0

### Features

~~~~~

FasterDataTypes 1.0 will cat all descriptor files in Your  
SYS:Devs/DataTypes drawer into one file (called AllTypes).  
This will lead into a faster execution of the C:AddDataTypes command wich  
is usally executed in the S:Startup-Sequence in the result Your machine  
will boot a little bit faster.  
FasterDataTypes will not delete anything on Your HD, all descriptor files  
will be moved to SYS:Storage/DataTypes.
