DrawStudio-FAQ-english

1.1 DrawStudio-FAQ

```
                DrawStudio-FAQ
   Stand: 27 Sep 2000

            How do I get support?

            How can I create CD Covers with DrawStudio?

            I can't load or save bitmaps!

            How do I create outline text?

            Does the PostScript output of DrawStudio support transparency?
                This FAQ is Copyright by Haage&Partner.
     News and most recent FAQs at: http://www.haage-partner.com

     Created on 27 Sep 2000 by Fiasco written by Nils Bandener
     and by a magic ARexx script written by Martin Steigerwald.
```

1.2 DrawStudio-FAQ

```
How do I get support?

You can get support most easily and quickly using the Internet. To get
support from us you have to be a registered user. Please do never send
your serial number over the internet unless you use PGP encrypted mail.

Info:     http://www.haage-partner.com/ds_e.htm
Support:  http://www.haage-partner.com/ds_sup_e.htm

Email support: <drawstudio-support@haage-partner.com>
```

1.3 DrawStudio-FAQ

How can I create CD Covers with DrawStudio?

In German magazine AmigaPlus 11/97 is a workshop about how to create CD
covers with DrawStudio:
http://www.amigaplus.de

1.4   DrawStudio-FAQ

I can't load or save bitmaps!

When using the original CDROM filesystem of AmigaOS 3.1 all filenames
will be in capital letters when copying DS to your hard disk. Then all
loaders and savers will not work.

Please open the drawers 'DrawStudio/Module/Bitmap' and 'Load' and rename
all files to lowercase or use another CD-ROM filesystem – like CacheCDFS
or AmiCDFS (from AmiNet) for example – to install DrawStudio.

1.5   DrawStudio-FAQ

How do I create outline text?

To create outline text, convert the text to a bezier and then give it a
line weight and no fill. If someone wants to do that quickly, then
perhaps he can write an ARexx script for this.

1.6   DrawStudio-FAQ

Does the PostScript output of DrawStudio support transparency?

The PostScript output of DS does not support transparency, so one will
have to convert this object to a bitmap before exporting it as PostScript.
