

# Iconer 1.0.0

*December 2008*

## Iconer License agreement:

**- THIS PROGRAM IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

**-This program is free for commercial and non-commercial use. You can distribute it providing you include all the files found in this package.**

## Introduction

Iconer is a small, simple program for creating icons and toolbar bitmaps. Iconer works in two modes: *toolbar mode*, *icon mode*.

## Icon mode

Icon mode lets you create 16x16 or 32x32 size icons of 1, 4, 8, 24 color bits. It does not support 32bit icons and sizes other than 16x16 and 32x32. Those icons however can be converted to native format when they are opened. In this mode you also can create and edit cursors.

**WARNING! This program may not correctly handle 32x32 8-bit colors icons and cursors. So, make copy before editing.**

## Toolbar mode

Toolbar mode lets you create toolbar bitmaps. The bitmaps created are of 32 color bits. In this mode as well as in *icon mode* you can use extractor to create images.
