

# *Tyler for Windows*

Thanks for trying Tyler, the addictive new video puzzle game from Ugly Dog Software.

[How to Play Tyler](#)

[How to Register Tyler](#)

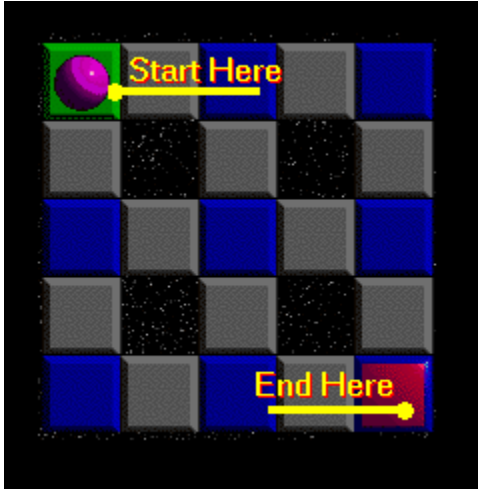

**Thanks again for trying Tyler for Windows. We hope you enjoy it!**

# *How to Play Tyler*

## **Tyler's Easy to Play!**

You navigate in Tyler using your cursor keys to move up, down, left or right, one tile at a time.

You start out on the green tile. Can you get to the red tile and finish the level?

## **Finishing a Level**

To finish a level, guide Tyler from the green tile to the red tile. In the process, you must destroy all of the gray tiles by touching them.

When Tyler touches a gray tile, it begins to fade out. Don't linger too long!

Other tiles blink in and out of existence, teleport Tyler to another tile, or otherwise make your journey more interesting and difficult.

When you are on the red tile and have destroyed every gray tile on the level, hit the spacebar to advance.

Remember, there is no time limit in Tyler. Take a few moments at the beginning of each level to familiarize yourself with the layout and plan your route.

## **Passwords**

Upon completing a level, you will be given a password which will allow you to jump directly to the next level in the game. From the Game menu, select Password, and type in any level's password to go directly to that level.

## **What's Par?**

Each level in Tyler has a Par. Par is the number of keystrokes it will take a

good player to finish that level. If you finish a level at or below par, you'll receive a special Token of Excellence. Win five tokens, and you'll get an extra life.

## **Special Keys**

Cursor Keys    move Tyler.

Ctrl+P            pauses Tyler.

F8                hides and re-displays the menu.

Alt-F4            exits Tyler at any time.

## *How to Register*

This program is distributed as Shareware. Registration is only \$10. The registered version of Tyler includes 20 additional, new and challenging levels. To register send your check or money order along with your name, address and phone number to Ugly Dog Software at:

Ugly Dog Software  
P.O. Box 780172  
Wichita, KS 67278-0172

Feel free to distribute TYLER for non-commercial purposes. If you wish to distribute this program commercially, please contact the authors by mail.
