# 4-Port RS-232 Interface with Extended "AT" Interrupts
For IBM PC/XT/AT and Compatibles

$299

- ✔ **Four Independent Windows 3.x Compatible RS-232 Ports**
- ✔ **Reliable Communication up to 100 Feet**
- ✔ **Individually Selectable Address (Including COM1 through COM4) or Any Other Address up to 3FF hex**
- ✔ **Individually Selectable Interrupt 2–7, 10–2 and 15 on the "AT"**
- ✔ **Four dB-25 Male Shielded Connectors Coming Off Single "Spider" Cable**
- ✔ **16550 Buffered UARTs Included**
- ✔ **Includes Driver Software**
- ✔ **Data Rates up to 20 kBPS at 50 Feet (Higher Rates Obtainable at Shorter Distances)**

Shown smaller than actual size

Comes complete with "spider" cable with four 25-pin connectors.

The OMG-VERSA-COMM4 four channel asynchronous serial communications card utilizes the RS-232 specification to provide RS-232 communication to your Windows or DOS applications. Selectable and sharable extended "AT" interrupts increase the versatility of this interface card. Signals are transmitted and received via 25-pin D-type connectors, which provide shielding from environmental noise.

The OMG-VERSA-COMM4 is a PC-Bus add-on card based on the 16550 FIFO buffered UART which is compatible with the standard 8250. Bit character lengths of 5, 6, 7 or 8, and odd, even or no parity are all available.

The OMG-VERSA-COMM4 includes a serial communications software driver that provides fully buffered interrupt driven input and output to multiple asynchronous serial communications ports. The driver provides the programmer with a robust and reliable means for servicing multiple serial ports while maintaining a straight forward and consistent software interface. The driver supports the following DOS languages, C, C++ and BASIC.

Specifications
Communications Chip: 16550 UART

Ports: four port RS-232

Max. Data Rate: 20k bps @ 50 ft per spec. higher rates attainable at shorter distances

Max. Data Distance: 100 ft

Operating Ambient: 0 to 50°C (32 to 122°F); 0 to 90% RH

Storage Ambient: -20 to 70°C (-4 to 158°F)

Power: +5 V @ 200 mA; ±12 V @ 50 mA each

Connectors: on-board DB-37; spider cable to four DB-25 connectors supplied
