

THE PRINT SHOP PHOTO FOLIOS: LIFE & LEISURE
WINDOWS BMP FILE FORMAT
VERSION 1.0

Thank you for purchasing this folio of photographic images. We know you will enjoy using these images in The Print Shop Deluxe, The Print Shop Deluxe Companion, The Print Shop Deluxe CD Ensemble, The Print Shop Deluxe Ensemble II, The Print Shop Deluxe II, The Print Shop Deluxe III, The Print Shop Ensemble II, The Print Shop Ensemble III or any other application which accepts Windows BMP files.

You may notice a shift in the image colors on screen. This palette shift will occur if your monitor is not capable of thousands or millions of colors. Cropping the image in the Import dialog may also cause the palette to shift; however, in both of these instances, this palette shift will only appear on screen. The output prints correctly and looks fine.

Printing imported bitmaps: When importing the bitmap images into your document (Windows BMPs) and printing, they may not print out correctly if you rotate them. It may mean that your printer driver does not support the rotation of bitmaps. If you experience this problem, try going to the **Preferences** dialog from the **File** menu and deselecting the **Fast bitmap printing** checkbox. This will slightly increase the time it takes to print the document, but any rotated bitmaps may now print correctly. Since this does result in longer print times, it is recommended that you keep **Fast bitmap printing** checked unless this is a problem. If printing bitmaps continues to be a problem, contact your printer manufacturer.
