

FPGA conversions ? Don't choose risk, choose ULCs.

Why take chances when you can choose TEMIC ULCs™ (Universal Logic Circuits) - the risk-free, cost-effective alternative to any FPGA or PLD.

Risk-free thanks to unsurpassed TEMIC experience including over 700 design conversions over the past 5 years with quality you can count on (99,8% success rate).

And risk-free because we've entirely eliminated the sign-off process. If the part doesn't work, simply cancel your order. Choose TEMIC ULCs and enjoy these extra advantages:

- Conversion of any available CPLD™/FPGA from market leaders,
- No design conversion or prototyping fees,
- A true second source through guaranteed pin-to-pin compatibility,
- No sign-off requirement means our ULCs won't tie up your engineering resources. Every ULC is delivered 100% fully tested,
- Fully dedicated conversion specialists are available at design centers around the world,
- Low to medium volume available,

- Fast turnaround guaranteed : only 5 weeks for CPLD prototypes: just 9 weeks for high-end, high pin count FPGA prototypes,
- Your long-term, reliable source for space and military flows.

ULCs from TEMIC. Why risk anything less ?
