.""""" """"""""""""""""""""""""""""""""""""""\____/"""""""""|_____/""""""" """"".
            SnatchDIZ V2.0 - © by rASCAL/SUPREME on 19.4.95
```

                    Purpose

                     Usage

                  Requirements

                   Greetings

                   History
                              kEEP tHE aMIGA aLIVE aND ... lEGALIZE iT!

1.2 What the fuck...

SnatchDIZ is another FILE_ID.DIZ extractor for the Shell or for use with
any bbs-system. Features:

 - LHA-, LZX-, ZIP-, DMS-, EXE-, GIF-, TXT-Support
 - SnatchDIZ is smaller than 3 KB and faaaaaaaaaaaaaaaaaaaast!
 - great code: SnatchDIZ does not produce HITS like WhaDIZ, SpeeDIZ etc.
 - good error handling: No problems with empty files or something

-=> Use SnatchDIZ instead of all the other crap floating around!

1.3   It's easy...

```
Usage: SnatchDIZ FILE/A,S=SUPPRESS/S,K=KEEPDIZ/S
================================================

For example:  "SnatchDIZ dh0:down/PPLAY41.LZX S K" will give you

-------------------------------------
Power Player 4.1 Final Omega Version
* Latest Update! *
-------------------------------------
```

This extracts and shows the FILE_ID, suppresses the About text and does NOT delete the file t:file_id.diz (which is temporarily created) so that you may use it in any way. The file t:file_id.diz is only created for dms-, lha-, lzx- and zip-files.

WARNINGS: - SnatchDIZ is cli-only so don't start from Workbench!
          - SnatchDIZ was NOT TESTED AT ALL with GIFs!

1.4   You got this crap...

You need:

 - an AMIGA w/Kick 2.04+ (as always).
 - the lha-, lzx-, GIFdesc- and UNzip-executable placed in your path.
   A working UNzip and GIFdesc is included in the SnatchDIZ-archive.

That's it.

1.5   Hallöle...

Greetings to all SUPREME and CAFFEiNE membaz!

1.6   Versions...

```
V0.9: not released but seems to work properly.
V1.0: added filetype indicator and the SUPPRESS option.
  1st release (under CAFFEiNE label)!
V2.0: added own routine for search in DMSs (MUCH FASTER than DMS VIEWDIZ)
  optimzed search in executables A LOT!
```
