1.1 Sweet Cheater Version 4.0

SWEET CHEATER V4.0

by Keith Krellwitz

IRC: Abaddon/InDestroy

This cheat list contains over 900 cheats, hints, and level codes for the Amiga and CD³2\$. The game titles with my name after them are the ones that I have found. I have put quite a bit of time into finding some of these cheats, so if you add any to your list all I ask is that you give me credit. If you upload the list to a bbs or include it on a compilation disk please do not alter or remove the header.

All the games with an asterick (*) in front of them have been verified. If the game has been verified and has more than one cheat, the cheat right after the game title is the one that has been verified, but in some cases all the cheats may work.

Some of the cheats may have changed throughout the list due to the fact that I have verified a lot of them and made corrections when needed. If a cheat didn't work before you may want to look at the cheat again, it may have been fixed. I try to verify as many as I can, but I don't have most of the games. I won't verify a cheat with an * unless I have personally tested it and found that the cheat works.

If you know of any cheats, level codes, and hints that are not on the list or if there is an error on any please send mail to:

Keith Krellwitz
110 W. North St.
Ishpeming, MI 49849
U.S.A

or send email to my Internet address: kkrellwi@nmu.edu

If you send me a cheat that I don't have, I will put your name after it and in the SOURCES section to give you credit for the cheat!

LASER SQUAD:

In laser squad, for fun do the assassins on level 1. Buy no armour,
give the corporal an m4000 with two reloads, the next two rocket

launchers with four rockets each, and the last two nothing at all. Deploy in the entrance, in the gap in the outer wall, and take the house to pieces with the rockets, waiting for droids or Regix to show up - get them with Jonlan's M4000. I managed to do the scenario with one shot - it went between the leaves of the door, blew up against a wall and Regix was on the other side. end of story, fade to black.

LEGEND OF FAERGHAIL:

Load in several of the players that come pre-rolled on the disk, and load an original of your own. Go sell all their equipment, have them withdraw all monies from the bank, and transfer to you. Create new characters and do the same as often as you need, and you'll have plenty of gold to properly outfit you stalwart band. Here are the answers to some of the questions and riddles you'll be asked while you're rummaging around in the dungeons of faerghail.

IN THE ELVEN PALACE

Q: Who is Findal's youngest uncle? A: "SCAGNAR"

Q: Who is Findal's father? A: "FINDAIL"

Q: Who is Findal's great parent? A: "ALGANOR"

IN THE DRAGONSERVANT'S TEMPLE

Q: What lies between myself and my opposite? A: "AND"

IN THE CASTLE

Q: What tries to go up, but stops short, has but one foot, and can not walk? A: "STAIRS"

IN THE RUINS OF ANCIENT ORACLE

Q: The more it gets, the more it eats, and has it eaten all, it dies. What is it? A: "FIRE"

Q: I talk without soul, I hear without ears, I talk without mouth, and I'm born in air. What am i? A:"ECHO"

Q: Two little windows, they have no glass, they stand together like flowers in grass. Two little windows, they show us the world, they show us the stars, the forest, the field, the fold. What could they be? A:"EYES"

LEISURE SUIT LARRY:

Hold down 'ALT' and 'X' keys to get past proof of age. Hold down 'ALT' and 'D'. It will ask for a location number. Enter a number form 008-045 (must be a three digit number).

This solve did'nt get all the points, but it finishes the game. my

additions are in capitals.....(score 215 of 222)

The 1st step is to enter the bar, go to the bathroom and read the walls several times until you get the password. Then go to the sink and get the ring. you can (must!) use the toilet if you want. Go to the bar and buy a whiskey. Go to the drunk next to the bathroom wall and (kick him to wake him) give him the whiskey and he'll give you the remote control. Get the rose too. Go back into the bar and knock on the big door.. when he asks you for the password.. tell him "KEN SENT ME", then enter. Turn on the T.V. with the remote. Keep changing channels until you find a channel he likes.. he'll move from the stairs. Climb up and voila! The prostitute: Don't hop into bed with her until you get the rubber. You just need the candy on the bench. Get it. go out the window, and go to the fire-escape ladder. You'll fall into a dumpster. Search it and get the hammer. Exit the dumpster and go left. Call a cab at the street.

Now go to the casino and go through the lobby. Get the card in the ashtray. Now gamble a bit until you have about 250 dollars. Go outside. Sometime in the game when outside the casino, a guy in a barrel will come up and ask you to buy an apple. Buy it. Call the cab.. tell him to go to the store. enter the store and buy a rubber. Also get the (magazine and) cheap wine in the back. (never enter the cab with the wine.. the cabbie will get drunk and kill you) pay for the wine and exit.. Wait for the russian looking guy to come from the left. (Ignore the dog) When he comes, give him the wine.. not money. (Look at phone dial number, answer the questions) Once you have the knife go right and show the pass to the bouncer at the disco door. Go in and sit down at the table with the lady. Smile and give her the ring, the candy, and the rose. Ask her to dance. When you finish off with the dancing ask her to marry you. She'll ask you for \$100. Give it to her and meet her at the marriage chapel. It's east of the casino front. Enter and go up to the front. Type "MARRY", and you'll get married. Go up to the honeymoon suite. (fourth floor, door with the heart, push four). Knock, and enter. She'll be on the bed, and {NOT IN THE MOOD!?!} Turn on the radio and listen to it. You'll get a number to call to get the wine delivered that she wants. Go to the casino and get some taxi fare money. Go to the phone in front of the store, (answer the phone if it rings) call the number and have them deliver it to the {HONEYMOON SUITE}. If they say it probably won't show up, you screwed up on the typing. Go back to the casino and go to the suite. Be sure that you have the knife. Enter and pour the wine. Things will take their course and you'll find yourself tied to the bed. (THE BITCH!) Use the knife and free yourself. Get the rope and leave. Go to the casino again and using some saving, use the dollar and get about \$50. (go to cabaret. find a seat and sitdown. listen to act.) Once you have it, go to the bar and knock on the door again. Go up the stairs and screw her now that you have the rubber. Remove the rubber after you've used it. Go out the window and this time go to the right of the balcony. Tie the rope to yourself and tie it to the railing. Type "GO WINDOW" or (reach out) something so your hanging in front of the window on the right. Break the glass with the hammer. Get the pills. Pull on the rope and untie yourself. Go down the fire escape and call a cab again. Go to the casino and go to the eighth floor. Talk to the lady at the desk until the game tells you that you'll need some medicine or

something. Give her the pills. She'll run off and leave the desk unguarded. Push the button and enter the open doors on the right. Enter and go up and right. When you're in the room with the bed, open the closet door. Enter it and type, "LOOK". Get the doll... (look at doll. inflate doll. look at doll. use doll.) then wait as you run after it. When you're near the hottub, (remove clothes) enter it. Look at the lady. smile, and give her the apple. Things will then run they're course, and voila!

LIBERATION:

To duplicate any item as many times as you want do the following:

First find a power point and stand in front of it. Then select any item from a droid's backpack and drop it on to the floor so that the name of it appears in the text window. Now pick up the same object and return it to the droid's backpack and engage the poser point so the lightning bolts are touching you. Use the look right, look left command to move the view screen so that it is at an angle. Move the cursor to the bottom of the screen and hold down the right mouse button so that the cursor becomes a hand and left click, at which point an object should appear on the floor and you can drop as many objects as you wish. Look back to the normal view and when the power bolts stop you can pick up the objects that you dropped.

LOST PATROL:

Rest for 50 minutes and for no loss of food your strength is restored by a few points. This restores all of your remaining men to 99 percent. Keeping up your men's strength and morale is vital. Giving your men 50 minutes' rest a night, or during the day when it's too dark to carry on, will slam your energy and morale levels to max. Even if you don't have much food, you don't have to worry, as your men will not eat it.

On reaching the first village (the first white cross on the map), search the area to find a hole in the ground where the villagers appear to be hiding. You then have two options: ENTER TUNNEL or USE GRENADES. Gomez is useful at this point, but if he is dead, go for the USE GRENADES option.

Start off questioning the villagers normally by asking them "Where VC?" Once you have an answer, start the hard questioning, or a village boy will get hold of a gun and shoot one of your men.

'HELP' _____ Skip to next level. 'W' _____ For fire weapon.
 'DEL' _____ Activate shield. 'B' _____ For bombs.
 'L' _____ For extra lives. 'E' _____ For energy.
 'A' _____ All coins collected. 'F' _____ Freeze monsters.

Enter any of the following for your password:

"CHEATOFF" _____ Shuts the above cheat off.
 "REVEAL" _____ Reveals the locations of hidden passages.
 "TUTORIAL" _____ ??????
 "SONIC" _____ Increase game speed.
 "NORMAL" _____ Revert back to normal speed.

Don't bother with the tedious procedures of recruitment, just head straight for enemy hq with some dynamite and introduce them to Mr. Big explosion. Also if you start every game by clicking the mouse in exactly the same place on the start screen, every game will be set up identically.

Invulnerability against missiles: Whether you are skiing or driving a now-buggy, the moment you hear the missile being launched, stop immediately and begin to turn around. Keep turning on the spot. The missile will narrowly miss you then come back and keep pace alongside you for a while until it finally speeds off to clobber someone else not so smart.

Invulnerability against mortars: Watch for the bomber. It will always come over the horizon in front of you. If you are stopped, wait until it is approximately half way to you (otherwise it may be able to dodge your missile) then blast it. If you are moving fast blast it the moment it appears over the horizon. If the bomber does manage to drop mortars turn 90 degrees quickly and speed off.

*NEW ZEALAND STORY:

On the title screen, type "FLUFFYKIWIS" for unlimited lives. Press the 'HELP' key to skip levels.

On other versions pause the game, and press 'M'. You should hear a laser gun sound. Type "MOTHERFUCKENKIWIBASTARDS". Unlimited lives are yours.

Near the end of level 1-1 there are three large steps that you must climb to reach your brother (sister?), who is in a cage. Stand at the left edge of the top step, facing left and jump. But as you jump, fire. If your current weapon is arrows, fire halfway up, but if your weapon is bombs, fire at the top of your jump. A whirl-wind should appear after four hits, and it will take you to level 1-4.

On level 1-2 shoot the baddies and collect the blue E on the floor to the right. Now hop back to the point you started at and stand on the last two blocks on the left side of the second floor. Shoot towards the left wall while doing tiny hops, and the warp will appear. This will bring you to level 1-2 where there are 2 Extend Life Pills

On level 1-3 from the starting position there are 12 ledges and a wall to the right. Go to the other side of the wall and fire to the left towards the second ledge from the bottom. Ship required. This will bring you to level 2-1 near the end of the round.

In 1-4, you will be in a little box under some water. Go up and to the right, and you come out in a small room with three boxes on the right hand side. Go up these, and you will see 4 long spaces, the top one having an {N} and a {D} in it. Go up to the top one, get the letters, stand in the centre of the space, facing left, and fire. yep, you guessed it, another whirl-wind. This one takes you to level 2-4.

On level 2-1 above your kiwi friend is a small tunnel which takes you to some stair-like ledges leading to a small cavern where there are two fruits. Fire at the fruit on the right. Ship needed to reach tunnel. This brings you to level 3-4.

On level 2-2 find a balloon and float up to where the bears on balloons emerge. Stand to the right of the green left-pointing arrow and shoot the bears balloons away. Repeat this until the warp appears. This brings you to the end of level 2-2.

On level 2-2 there is a ledge with a green arrow pointing right.

Jump up into the water. This takes you to level 2-2 halfway through the level.

On level 2-3 follow the first water you come to. At the end are two ledges with spikes below. Stand on one ledge and fire at the other. This takes you to level 2-3 takes you halfway through the level.

On level 2-4 , stand at the entrance to the room where the giant octopus is located and fire to the right several times. A warp will appear that will take you to the beginning of level 3-1.

On level 4-1 above the Extend Life Pills is a tunnel. Fire above the 2nd letter from the right. You must be on a duck ship for it to work. This brings you to level 4-2.

On level 4-4 below the kiwi to the left are some spikes. Stand on the left hand side of them and using small jumps fire to the right. This brings you to level 5-1.

When you reach the ice whale, move to the right-hand side of the spikes, avoid the crystals, and wait until he picks you up. Once inside the whale, you can start shooting, but avoid the ice drops.

Meeting the rock monster without bombs makes him difficult to pass. So collect bombs, go to the highest platform and shoot him. Kill it by either dodging the bullets and hitting it when the doors open, or by fireballs.

The last boss you encounter is the balloon seal. He cant be killed, by blows to the body, so you must hit the balloon. Be careful for the balloon seal is armed with a cannon and shoots cannon balls at Tiki.

OVER THE NET:

First, choose a one set game, play the sea-cup and enter one team or two human players. When it's your turn to serve, move the non-serving player up to the top of the court close to the net. This will force one of the computer players to follow him. Now do a jump serve (push up and fire), then hit the ball to the other computer player by pushing right then down. The ball should drop between him and the net and he should miss the ball. Hopefully this plan should work. I don't know if it works with the other teams like Coco, Freaks etc but it works with the Rollers and the Golden Boys.

OVERLANDER:

JUST A FEW TIPS - When cruising the highway don't stop shooting, and always choose the highest paid mission. Buy fuel carefully, only enough fuel for that level, after level 1 you must buy a leanburner. Try to stay in the middle of the road and travel fast, travelling slowly only burns more fuel. Fire bombs are more useful than smart bombs when you learn how to use them. Bulletproofing is necessary after level 2. When travelling through the barriers the best speed is 90-120mph.

LEVEL 1:

1. Select counterfeit money.
2. Fuel up to 14 notches on the fuel guage.
3. Get turbo, 4 battering rams and two flare bombs.
4. After the first bikes slow down or the gunners will kill you.
5. Destroy trucks from as far away as possible.
6. Slow to 100-150 mph to negotioate barriers.
7. If you stay in the middle lane when you come to the wrecks you wont die.

LEVEL 2:

1. Select kidnapped official.
2. Fuel up to half full.
3. Buy leanburner, a few bullet proofs, rams, and flare bombs.
4. After first bikes there's a nasty surprise in the valley below.

LEVEL 3: DARKLANDS

1. Select plutonium.
2. Fuel up to half full (if you have leanburner - if you don't then fill up to the max.
3. Buy rams, bullet proofing, flare bombs and lives if you need them.
4. The toughest part of the course is early on, so don't be afraid to let loose with the flare bombs.

LEVEL 4: THE GUTTER RUN

1. Select illegal chemicals. fill up to max level.
2. Buy maximum rams, bullet proofs and as many lives as you can afford and flare and smart bomb depending on your bank balance.
3. The barriers are every where on this level and you will need to be at 90 - 100 mph to avoid them all. Try to save your rams for later in the level.
4. The alleys in 4 are real mean. Smartbombs and bullet proofing are your best chances of survival.

LEVEL 5: GRAVEYARD

1. Choose the president. Fill up to maximum fuel.
 2. Buy everything \$40,000 up front plus whatever you had from the last level should be enough, lives should be on the top of your shopping list followed by rams, proofing, brakes, armour and weapons - don't bother with the wheelblades!
 3. do the same as for the last level. Because your car's at maximum everything, this level shouldn't prove too difficult.

*PACLAND: (New cheat by K. Krellwitz)

During play hold down 'S', 'I', 'U', and press 'RIGHT ALT'. There should be a slight pause and the ghosts will reset to the starting position. This will give you infinite lives.

When the title screen appears, type "AVALON". The screen should flash. You should have unlimited lives. If that doesn't work, try the following:

Start a two player game. Make it as far as you can with player one. With player two, you must be able to make it as far as the fairy to collect your boots. Now that you have gotten your boots, you are going backwards to where you started. Push the third cactus on the way back, and a yellow pacman will appear. Get it, now kill player two. Continue playing with player one. Every time player one dies, get the yellow pacman with player two and kill player two immediately. As long as you keep getting the yellow pacman with player two, player one will never die.

HINTS:

LEVEL 1: Run to the third fire hydrant, and when you get there, jump over it and push it to the left. This will give you a blue hat that will make you invulnerable to the little ghosts that fall from planes.

LEVEL 2: Run to the third cactus, and push it to the left. You will now be invulnerable for the entire level!

LEVEL 3: After getting your magic boots, push the third

cactus on the way back for a free life.

-Jump on the roof of ghost's car to escape.

-Only use powerpills when ghosts are in range, or else it is wasted.

-When you reach the breaktime sign, jump when you are about 1 inch away, for a bonus (depending how high you are when the level ends)

POWERDRIFT:

Select any course except D and win all the races, you must get the gold medal. Collect all the gold medals and you enter a bonus round on a secret course with you in control of the f-14 tomcat from afterburner. With no collision detection. Do the same thing on course D and you will be in control of the super hang-on bike.

POWERDROME:

Here are some tips on the various tracks:

Oval: The secret with this track is to use as much afterburner as possible, but without blowing up your engines. Keep your eye on the temperature gauge. This track is fairly wide, so switch the centering field OFF and pick up speed. Go around as fast as you can.

Antacorp: A difficult track. Turn the centering field up to four or five, which will put you in the middle of the course. When you go through the underground chicane, hold down the right shift key. This will take you through the vertical scanner without slowing down; then straighten.

Clortek: Shortly after the start line, you will encounter a trench. Don't waste your time flying through it; just go over it. When you reach the pressure gate, which is around half way, don't slow down. If you're going to crash into it then slow down. Hopefully this won't occur, but in this instance it's no use fighting the consequences. When you come out of the exit, switch the afterburners on. Go for speed on this next stretch.

Otyaka: It's main section's underground, very dark and at first quite difficult. The track careers from left to right so turn the centering on at around level five. Once you emerge into the open, you'll come across a nasty right hand hairpin, so hold down the centering key again. This section takes some practice.

Banzal: So named because it really is the hardest track. Crank the centering up as much as possible but reduce it down to six if feasible and necessary. You'll encounter the same kind of underground dip as on the Otyaka course, so use the same tactics. If you get through this you are GOOD.

Apocalypt: This section has an alarmingly tight hairpin situated three corners from the start. Take it using centring mode. While underground you will go through a loop de loop. You get through this using gentle movements of the mouse, with centring set around six. This should see you right.

Estoria: Back into sunny climes and a fairly wide track. Bomb around the course with a low centring setting or none at all.

POWERMONGER:

Instruct your captain to invent something, pause the game, put the game speed up to full, and wait a couple of minutes. Now unpaue the game, the captain will have kept inventing during the pause!

When you wish to invent in double quick time, click invent and when your men leave, click on it again. This often makes a catapult almost immediately, but this cheat only works once on each island.

After killing the strange turtle-like creature on the first level, you should come to a screen with two carnivorous fish bouncing up and down in the water, along with four banks. To get to the secret room don't jump over the first well. Instead jump inside it and fall down into the secret room!

Later on the first level, look out for a ladder near some water which leads up to a platform containing an egg. Climb the ladder and take the egg, then go to the left into the water to find the submarine room.

There is also a way to find some hidden extra food. Go to the third screen of level three and jump forward hitting empty space. The hidden food should now appear.

LEVEL 2	_____	"170961"
LEVEL 3	_____	"010655"
CORE 4	_____	"610169"

Tips: Once in the core, you can't quit. So choose droids with good lasers, Jack and Spud for example. The Quadralien mother is made up of 4 separate pieces grouped together and surrounded by Earthling boxes. The mother can only be destroyed by blowing up each box from a different direction. From the starting point there are three exits: north, east, and west. Go east and destroy the first box, return to the starting point, and go north to destroy the second box. You will now have both droids to blow the remaining boxes. Go west through the one-way force field, and get the other. Don't forget to keep recharging.

*RAINBOW ISLANDS:

Collecting all of the gems in the correct order of color (from left to right on the gem counter - RED, ORANGE, YELLOW, GREEN, LIGHT BLUE, DARK BLUE, and MAUVE) not only awards you the life and Bonus Gem, it also grants you access to a magical secret room. When you reach the end of the level, a silver door appears. You don't have to fight the Boss.

On the fifth island you'll find a box in the secret room which you should collect. There's also a gate with a '7' on it, leading to island 7.

Even more useful is how to create any color gem. The screen is split into several invisible vertical stripes of color. When a gem falls, its color is determined by the 'color' of the area into which it fell. Now all you have to do is gauge carefully where the dead enemy will fall to create the gem color of your choice.

Type one of the following on the title screen, while the rainbow is cycling through colors:

"BLRBJSBJ"_____Permanent fast shoes.
 "RJSBJSBR"_____Permanent double rainbows.
 "SSSLLRRS"_____Permanent fast rainbows.
 "BJBJBJRS"_____Hint a.
 "LJLSLBLS"_____Hint b.
 "LBSJRLJL"_____Continue after island five.
 "RRLLBBJS"_____All hidden food becomes money bags.
 "RRRRSBSJ"_____Does both of the previous two.
 "SRBJSLSB"_____Gives you 100 million counter.

Right at the beginning of the game (blue sector) you will find a well on the left. Run towards it and jump before you hit the wall. Now you will find yourself at the other side of it. Keep on walking to the left and you will notice the screen going crazy. Waggle the joystick in all directions and after a while you will find yourself in the red sector. Once in the red sector do the same as in the blue sector. Now you go to the purple sector. Do the same as in the red and blue sectors. A message appears that you

have completed game one and the code word for game two.

SENSIBLE SOCCER:

To score off a corner every time, kick the ball towards the goalie. When a forward gets hold of it, kick it across the goal mouth and use after-touch to bend it into the net. The computer never quite manages to work out what is going on until it is too late. When your match appears next on the fixtures screen, for example England (You) v Germany (The Opposition), instead of choosing next match, click on Exit. Now choose friendly from the main menu and choose Germany as your team. Go to the Team/Formations Screen and get all the German star players on the bench, put the forward in goal, and generally mess about with the original team selection. Now start to play the game, but escape from it as soon as it begins. Return to the League/Cup games and View Opposition (Germany). Your opponents team will still be mucked up. Using this cheat you should be able to win every match.

This cheat will allow you to play the game in slow motion (aka Kick Off 2). What you have to do is play a match and then make a substitution. Then when the player is walking off, press the 'ESC' key and you will quit the game. Start another match and you should notice that everything plays at slow speed, even the timer! To return to normal, make another substitution, but let it carry through.

(GAME HINTS)

Go left to where the bad guy has a guy trapped in a force field. Quickly hit him a couple of times to kill him and free the lower guy. He will then tell you the position of a switch (upper or lower) for later in the game. Now go left and down the rope to the swamp. Go left until you get to the building. Enter the building, go left and pick up the jug. Now go back to where you started the game. From here go right and through the spear throwing dudes. Go up and kill the guy who is throwing the green puddle things at you. Pick up the axe he drops. Now go left and fall from the ledge. Go right to the rock that is by itself and you can see a little grass spot on the ground. Jump on this like 4-5 times and it will fall through. Go down the steps and you are in the crystal cavern. Go left, at the bridge a guy will start running left. Chase him and he will take you to a bridge that is being mechanically shortened. Jump and shoot the dude thats cranking the bridge(3 or so shots with the axe). Now break the door at the other side of the bridge with your ball & chain. Go up the first chandelier. Go left and hit the correct switch. Now go down and kill the guards and go right. Get the key and go left, you will get caught and they throw you in jail. USE THE 'O' command and give the jug to the guard. After he passes out break down the door with ball & chain. Kill the guard. go up the rope (faster than the prisoner) and kill the guard at the upper left and then go back down the rope to get the key he dropped. Now go up the rope and go left at the first chance you get. Use 1 of the keys and free the prisoner. Go to the top of the rope and go left and get the ring. Now if you go right the prisoners get killed. Give the ring to the old man who lost it, but he still wants a parchment before he will teach you a spell. The other key is for the locked door in the first building (the inn where you got the jug).

SHOCKWAVE:

A few hints and tips follow on how each of the four zones (armys, factorys, mines and rigs) effect the game:

MINES - Each time a mine is purchased the income you receive for each time pass doubles.

FACTORYS - The more factorys you have the faster more weapons are produced, these are essential.

RIGS - These supply you with the fuel for each mission run. The more rigs you have the greater the amount of fuel you receive for each time pass.

ARMYS - For every army unit you own, the enemy slows down. You have one army unit, for each four time passes that occur the enemy won't move for one time pass. If more than 50% of the sector is occupied by the enemy then you will lose one of your assests for each time pass that occurs. The best solution is when 30% of the sector is occupied go an attack the enemy.

SIMULCRA:

THE MOTHERSHIP: It follows you around generating meanies and can take many hits. Ram rather than shoot.

HOMING WEAPONS: Retreat as fast as possible then shot them. Most homing weapons have a limited range and can be outrun.

BLITZKRIEG: The best attack is a fast one. Attack a generator by flying along power barriers at full speed. Learn to recognise the edge barriers. Barriers you can shut down never merge with the edge, and nearly always lead to a generator.

SIMCITY:

When the title screen appears, hold down the 'SHIFT' key and type "FUND". This gives you an extra 10,000 smackers. It also causes an earthquake every tenth time you do it, so do it before you start your city.

Another tip is to set the citizen's taxes to 0%. Then just before tax collection (December or November if playing at fast speed) quickly set the taxes up to 20%. Then after you collect taxes, put it back down to 0%. This way the citizens think they are not paying any taxes.

You can build land on water. Find a straight (horizontal or vertical), stretch of coastline and string a powerline along it. Next, move one square over, out into the water and string another powerline parallel to the first. Repeat as many times as you want. Then just bulldoze all the excess powerlines and you can build on the new land. To make land you simply make a 3 lane highway across any water source. When you make a road by putting 3 sections of road on top of three section of road on top of three sections of road (3 by 3) you make 1 section of land in the middle.

SPACE QUEST III:

IN THE FREIGHTER:

Don't fool with the pod that you came in as it is a waste of time.

You will notice an object to the front and right of the door you came out. You cannot move it but you will need it later.

Head off to the bottom of the screen and then go towards the right on the next screen. You will see a machine bringing scrap towards the ceiling. Hop on and wait. After it dumps you, type "STAND" and then type "JUMP". You will be on a cross beam. Go towards the left until you reach the control room. "CLIMB DOWN" onto the grabber and go around the control room. At the screen after the control room screen, stop the grabber and push the button to lower the claw. Pick up the warp motivator with the claw and after it get back to the grabber go to the right. After you go around the turn stop the grabber and lower the claw. You will have to put the warp motivator in the hole in the top of the ship. Ride back to the control room get off the grabber and fall down the chute.

At the bottom of the chute go to the left where the wire goes into the wall and get the reactor. Climb out using the ladder

and head towards the top of the screen. you are now back where you started. Go to the right and go into the tunnel. As you pass thru the tunnel a rat will grab the reactor from you. Go back to the room where you got the reactor and get it again. When you climb out again, take the ladder. Now when you go through the tunnel take the wires and continue thru the tunnel.

Go to the large head and climb in the eye. Go to the ship and use the ladder to get on top and open the hatch and enter the ship. Put the reactor in the hole to the left and then use the wires to splice them together. Get in the cockpit and examine controls. Turn on the engine, turn on the radar, take off, use your front shields and blast your way out.

IN SPACE:

Scan the area. Don't bother with monolith burger or the volcanic world but go to the other one (sorry i forgot its name). Land and go to the tourist trap and enter the building. Examine the postcards as there are interesting facts you need here. Sell your gem. Buy thermal underwear and a hat if you want it. As you leave you will meet a baddie who is out to get you. Don't go to your ship! Instead go to the left of the robot and take the elevator up. When the baddie follows, wait till he is near the gears and then grab the pulley. After he becomes burger go down and get his belt. Leave and go back to your ship and go to the volcano planet.

VOLCANO PLANET:

Put on you underwear and go to the left and wait until the survey team leaves. Get a detonator and the pole. Go in the direction that the survey team left and go up the mountain and drop the detonator in the machine in the crater. When you get to the crossing back to your ship, use the pole and jump the gully. Take off and go to pestulon.

PESTULON:

Use the belt and get inside past the guards. Go to the broom closet and change into the janitor's closet. Enter the accounting area and use the vaporizer on every trashcan you come to. Make your way to the picture of elmo and take it to the copy machine and make a copy. Put the picture back and make your way thru the accounting area to elmos office. After doing elmo's trash, leave and go to the balcony. When you come back, elmo will be gone and get the keycard off of his desk. Make your way back to the corridor and on the security door use the keycard and then the picture. When you see the jello mold people, push the ramp button and then vaporize the jello.

THE ROBOT FIGHT:

Just do your best, no tricks here.

THE SPACE BATTLE:

Make sure that you get your front shields up as the fighter comes at you and then destroy it when it is behind you. You will have to kill all the fighters as if you miss you will die.

TACTICAL MANAGER:

On the main screen type "CODE", a prompt will appear asking you to enter a code. Enter any of the following codes:

"CODE" _____	A list of cheats will appear.
"BIDS" _____	Erases all bids from memory.
"LIMI" _____	Disables the 110 team rating limit.
"BEST" _____	Gives you the best players.
"FREE" _____	Enables managers to buy your players free.
"POOL" _____	Saves European pool to disk.
"VIEW" _____	Programmers tool.
"PROM" _____	Last season's promotions and regulations.
"MEMO" _____	Show available memory.

These last couple are activated by typing them in on the main screen without typeing "CODE".

"EDIT" to enter the full editor. Now press 'W' to enable you to manage any team. A small green and yellow strip should appear just along from the LOGO and AUTO icon things, under the second logo space. You can now go to the Manager's menu and JOIN any club. Your rating automatically jumps to that of the new team, unless you

are joining a lesser club.

Finally, if you want to alter teams because of transfers among Premiership and Division 1 teams, to maintain more accurate club records, instead of creating a whole new player in the editor, it is best to make yourself the manager of the club who bought the player, enable "FREE" transfers, and transfer the player that way. This means the player keeps his original ID number.

For example, Paul Furlong was bought by Chelsea from Watford, so to enable this change, simply become Chelsea manager, enable "FREE" transfers, and approach Watford.

"IRON MAN THOMAS"_____For invincibility.

(Down cursor to advance level and up to go back)

There is a secret level located on level 1.3, and can be found by climbing up to the ninth branch of the tree (which is the one with the birds on it) and running off the end. You then will be whisked off to a room containing some diamonds which can be collected for extra points.

This next cheat didn't work on my version of the game, but I left it in just in case it works on other versions. At any time, type "TIMEFLIESLIKEABANANA" for infinite time.

TERMINATOR II-THE ARCADE VERSION:

When the game has loaded select your control method at the options screen as usual. Instead of going to {Start Game} press 'ESC'. Wait for the high score chart with the picture of the T-1000 to appear. As soon as the last digit is printed on the high score chart (the last 0 on the 10000, in 10th place), click the left mouse button (or the joystick fire button if that's plugged in to port one). Note you must click the button 0.19 seconds after the last digit on the high score chart has been printed on the screen. If you take longer, or click before the last digit is printed, the cheat will not work, so precise timing is required.

If you find this difficult there is an alternative. Hold down the fire button or left mouse button at the high score table until it is finished. This won't always work though.

Go back to the options screen. If you can see the picture of Arnie, but no options are displayed, then the cheat worked. Left click on the mouse (or joystick) to move on. Click again to skip the high score display. If you allow the high score chart to be printed

again the game may mess up. Start the game.

If you didn't get it to work restart the whole procedure.

Once you've started playing you'll notice that a gunpowder and energy reading is displayed for player two even though he isn't active. Now pause the game (press 'P' not 'F1') and type in all the function keys in order F1, F2, F3, F4, F5, F6, F7, F8, F9, and F10 and you should skip the level you are presently playing. This cheat is for one player only.

On the first level go to the right until you come upon three mushrooms in a row (The first mushrooms you will see). Get the first mushroom, jump over the 2nd one and get the 3rd one. Now continue to the right until you reach a section with two special weapon power-ups that are next to two mushrooms (right before the first bridge and there is a cloud above them). Stand in front of the first power-up and pull down to take it. Now jump over the other power-up and the first mushroom. Get the 2nd mushroom. Work your way past the bridge until you come to the next tree in the background and stand in front of the tree. Now push the fire button and push up on the joystick. The screen should flash yellow letting you know it worked. Finally press 'C' for invincibility and press 'N' to advance levels.

NOTE: If you die before you activate the cheat you must press 'RETURN' to abort the game and restart. Also, you can pick up all the mushrooms and power-ups between the sections.

To avoid going over the cliff, or crashing into it, hold down the fire button. The car will now glide around corners at a constant speed, release the fire button to accelerate/slow down. Don't forget that there are still cars to avoid.

To get a highscore without playing the game:

Load a wordprocessor, and load the "highscores" file, and edit it, then resave it. Note that the highscore shouldn't exceed 99,999 and the name musn't be more than 15 characters.

To change the car, load the highscores as above, and use any of these codes (They must be in lower case):

```
"p911t"-----Porsche 911 Turbo.  
"vette"-----Corvette.  
"lotus"-----Turbo Esprit.  
"rossa"-----Ferrari Testerosa.

Once the game has loaded, select a new game, then when you get to the map screen you should notice that your player's name has changed to "It's You, Buddy". Now when the game starts, you will have plenty of cash in your bank account.

Enter "FLIGHT SIM" for the name of the park and you will start the game with 200K instead of the usual 130K.

Enter "DEMO" for the name of the park for a ready made one.

Position a bouncy castle anywhere in the park (positioning the entrance and exit any where). Now pause the game until you notice the writing above the entrance speed up, and type 'L', (pause), 'I', (pause), 'V', (pause), 'E', (pause), 'C', (pause), 'A', (pause), 'S', (pause), 'H', (pause), 'P', and 'P'. You should now get a new shop and ride every year.

To get the baddest roller coaster without having to pay for it, place your roller coaster doorway where you want and build the smallest loop you can around it using the least number of sections possible. Open it up and close it down immediately (to only be charged for the tiny ride). Now remove the tiny loop and build your dream coaster without paying a dime.

UFO ENEMY UNKNOWN: (Steve Lowder)

After playing the game for a while and building up your stores save the game. Now quit the game and go into your current save game directory and make a copy of the base.dat file. Now boot the game back up and sell everything you have (if you need money) or transfer stores (not ships or personel) to other bases. Now save the game again and quit. Next replace the base.dat file with a the copy of the original that you made earlier. Now when you go back to the game you'll have all the money from the sales plus all the equipment you sold. And, if you transferred anything those items will arrive shortly. Continue the above procedure as often as you like.

For those of you that haven't found the magic method of travel in Ultima 6, holding 'ALT' '2' '1' '4' will bring up a prompt (in Gargoylian) for three coordinates - these three hex numbers will bring you to any location in Britannia, the dungeons or the Gargoyle world. This is apparently the programmers method of travel and is faster than a fan powered Balloon!

The three numbers are basicly the x,y & z coordinates for the map, with 0,0,0 located at the upper left corner on Level 0 (Britannia). For this discussion, I will use the form x,y,l to describe this coordinate system. The first two numbers (x & y) increase by 1 for each move in the horizontal or vertical direction. The x coordinates begin at the left edge and the y coordinates begin at the top. The third coordinate (l) represents the level; Britannia is Level 0, the dungeons are levels 1 thru 4 and the Gargoyle world is Level 5.

'ALT' '2' '1' '4' is entered on the numeric keypad. Each coordinate is entered separately, ie, press 'RETURN' after each one.

'ALT' '2' '1' '3' this gives the Gargoyle coordinate for your present position plus a free view of the map - forget all those gems and peer spells!

'ALT' '2' '1' '3' returns a 13 digit number, the last 7 of which are the coordinates. The first 6 are related to the total number of moves you have made. For the example above, the number would look something like: 79000029D0430 or 790000 moves and coordinate 29D,043,0.

BEWARE: You can land in a real 'snake pit' with some of these locations. Always be prepared for the worst when teleporting to a strange location.

Get your man outside the ring and pick up the steel chair to beat up any harder Fighters that you are having trouble with. This should help you to get further. When you are about to go into a joystick waggling battle, follow these steps:

- (A) Pause the game.
- (B) Plug the mouse into the joystick port you are using.
- (C) Unpause the game, and move the mouse rapidly from side to side. This will enable you to waggle quicker than your opponent.
- (D) When your character has won the move, pause the game and plug the joystick back in.

Place the chair outside the ring (next to the bottom left turn buckle) just up a bit. Now jump into the ring and you should have the chair. Climb up on to a corner post, and instead of jumping into the ring, jump the other way. Weird gravity!

During a two player practice game, get 1 player to climb onto the top of the top left turnbuckle, then get player two to be as close as possible to him. Player two should drop and kick the player, then he will turn into a "ghost". He can pick up the chair and take it into the ring. Press escape then compete for the title, and the chair will still be there.

On the high score table, enter "ALF". Now when you start to play the next game you will have infinite lives and near invincibility.

If you manage to reach level 10, you're better off using your radar to kill the xybots. Just line them up using radar and fire, you don't have to be able to see them. Keep as many keys with you as possible because some levels don't have enough to complete them.

There are short cuts to level seven on levels one and four - you get extra cash for using them. If you have the extra energy upgrade try not to let your energy fall below 100m, because you lose the upgrade if it does.

Drums are not just decorations - hide behind them when possible and use your zapper near to them to find more cannon power.

On level eight, near to the top left hand transporter you can get to two white coins by blasting away one of the three walls around them.

Don't split up in the two-player game, because it's easier to complete it together.

The master xybot lives on level 11, and you'll need to stock up on double shot and extra shot speed to stand a chance of survival.

Try to get one xybot to stand behind another - they'll blow each other apart.

X-OUT:

On the equipment screen select the white bug ship and put it on the grid area. Then choose the orange laser and drag it to the face of the shop keeper. Keep clicking the LEFT MOUSE BUTTON until you get \$500,000.

Insert the disk, and hold both mousebuttons until the title screen appears. When youre in the shop hold down 'HELP' and 'DEL' for a few seconds, now choose your ships as normal, but you have infinite energy.

To get more cash at the beginning of the game, select the smallest ship (the one at the top), then the weediest laser (the orange one with single beam), and place it on the shopkeepers nose. Hit the fire button to get the cash boost!

*YOLLANDA: (Keith Krellwitz)

On the high score screen, type "SKID ROW". I'm not sure this does anything other than put {18 and life} as your name on the high score table.

At any time, type "QUIDITY" and use the following keys:

'SPACE' _____ Skip levels.
'HELP' _____ Toggle infinite lives.
'F4' _____ NTSC video mode.
'F5' _____ PAL video mode.

If the game ends or you reset the game by pressing 'F1' you will have to enter the code again.

ZOMBI (UBI SOFT):

If you have seen Dawn of the Dead, you already have a good idea on how to solve most of the puzzles. But here's some extra tips anyway:

1. To lock up the mall to keep zombies from getting in, you need to park the trucks over the entrances. Get the key from the office on the 2nd floor and go to the 4th floor where the keys to the trucks are kept.
 2. To keep the dead zombies from coming to un-life, lock them up in the freezer in the basement.
-

3. Before you can go play in the basement, you need a source of light. Get the fuses and gloves from the 3rd floor and go to it!
