[The CSR's in the world](#)

A Production from Stefan Wiberg (2:204/454.0)

1.2 Introduction

Introduction

~~~~~

This Program is PostCardWare. IF you use it i'll be happy if you send a postcard to the [author](#) .

This door reads the raw file of the nodelist and it will

\*NOT\* need a Traplist or a mebbsslist compiled nodelist.

Disclamer

~~~~~

This software is provided "as-is" and the author accepts no

responsibility for damage and/or loss of data/equipment
software resulting from the use of this.

Okey then.. What is this?

~~~~~  
This is a small proggy that lets the users search in your  
nodelist's. The program itself is pretty self explaining. So now  
for the **install** .

## 1.3 Installation

Installation

~~~~~  
You can put the file WizNodeScan.rexx wherever you like.. I recommend
that you put it in Mebbsnet:Rexx/ or Mebbsnet:Doors/.

This is an ordinary AREXX door. Just run it from any menu you
like in this way:

```
;BEGIN *.menu
```

```
Option 'W':
```

```
Function AREXX Doors:WizNodeScan/WizNodeScan
```

```
End
```

```
;END *.menu
```

Configuration

~~~~~  
The file WizNodeScan.cfg **\*MUST\*** reside in Mebbsnet:configfiles/

This is the syntax for WizNodeScan.cfg:

Line1> BBS name... - Your own is recommended ;)

Line2> Path for QuickNS - C: is recommended

Line3> Path for the nodelist's...

Line4> First nodelist... - NOT nodelist.244, JUST nodelist

Line5> What you wish to name the first one - Example: FidoNet NodeList

Line6> Second nodelist

Line7> What you wish to name the second one

.

.

.

You can have a maximum of 4 different nodelist's.. Just append  
them (in the same way as Line 4 and 5) to the WizNodeScan.cfg.

So if you have 4 nodelist's, the last line in your

WizNodeScan.cfg will be Line 11. And it will reside what you  
wish to name the fourth nodelist :)

---

## 1.4 What You Need

Requirements

~~~~~

OS 2.04+

MebbsNet 1.168

QuickNS (included in this archive!)

1.5 goes

Greetings

~~~~~

Henrik Dikvall - for beta testing and good suggestions.

Jörgen Ljungberg - For being such a good friend.

Stefan Von Starten - For GREAT MEBBSnet-support.

Per Wallberg - For Popupload, A GREAT Upload door for MEBBSNet

Larry Cloud - For inspiring me to use AREXX.

William Bowling - For MEBBSNet...(I still miss Zmodem Resume :) )

Johan Billing for QuickNS and FD2TD and CONVPKT....
