## 1.2 Introduction

```

INTRODUCTION TO BANANAPLAY  (____)____
                             (____(
                             _____)____)
                             (____)
                             - | -
.....)\\/(.....;.....:.....:.....:.....

```

BananaPlay 2.0 was finished in 1993 but was never released simply because I was too lazy to fix the last few details. Two years later a friend of mine (ORGASMATRON!) started to terrorize me about making SID-support. The result is this version called 2.0a.

UN-detected bugs may occur but the risk is low. Please let me know if you find any. The sourcecode is old and in 100% assembler so maybe some small unplanned feature was included without my knowledge. :-)

Bananaplay features you:

```

<*> NICE GUI
<*> EASY-TO-USE
<*> POWERFULL PLAYLIST PROGRAMMING
<*> CODED IN 100% ASSEMBLER
<*> SUPORTS 9 DIFFRENT FORMATS
<*> MODEM FRIENDLY (A MUST FOR SYSOP's)
<*> DO NOT USE MUI (AS OTHER LAME PLAYERS DO)
<*> USES VERY LITTE MEMORY
<*> STABLE

```

But it REQUIRES THIS:

```

<*> AMIGA-COMPUTER WITH KS2.0 or HIGHER
<*> SOME CHIP MEMORY
<*> MUSIC TO PLAY

```

Not required but utilitised if available:

<\*> powerpacker.library  
<\*> playsid.library

### 1.3 Disclaimer

```

LEGAL DISCLAIMER
_____
(____(
_____
)____)
_____
(____)
_____|____
.....)\\/(.....;.....

```

BananaPlay is freely distributable as long as no copying fee is charged without written permission from me. Magazines are given the permission to include BananaPlay on a coverdisk, but please noitfy me. When you are spreading this archive into BBS:es please use some of the included FILE\_ID.DIZ

This software is provided "AS IS" without any warranty of any kind. The programmer can not be held responsible for any loss of data using BananaPlay.

If you want to register read the  
Registration  
page.

### 1.4 Registration INFO and so on

```

```

I really hope that you will find this product worth registering. To register BananaPlay simply send me some sort of gift (It doesn't have to be anything expensive) along with your name & address plus a disc. Please also tell me what you think of BananaPlay.

I really don't care too much if you register or not, so if you decide not to register feel free to write me an E-Mail because it's always nice to get mail!

OBSERVE that BananaPlayer can freeze when you play SID-songs. But this has nothing to do with BananaPlay, since it is PLAYSID.library that contains that bug.

My address is: Pontus Fuchs  
Snipgatan 5  
234 42 Lomma  
Sweden

Phone: +46-(0)40-413422  
Fido: 2:200/123.8

### THE CREW OF BANANAPLAYER

Programming, GUI-design, Pontus "

Inmate

" Fuchs

Documentation, GUIDE-design, Beta-testing Naging: Fredrik "

ORGASMATRON!

" Elmqvist

ASCII-LOGOS: fATAL / Epsilon Design ^~xOR / aRCLiTE

Musical Support:

THE BEST OF THE AMIGA SCENE

Inmate whish to thank the following musicgroups for inspiration ↔  
while coding:

Front 242, Frontline Assembly, Kraftwerk, Nine Inch Nails, Poupee Fabrik.  
Die Krupps, U2, Mobile Homes, Nitzer Ebb, Machine Head, The Prodigy

A big thank to MasterCard for his help with the betatesting!

### 1.6 The main window

```
THE MAIN WINDOW          ___(____)____
                           (____(
                               _____)
                                   _____)
                                       (____)
                                           - | -
.....:.....:.....:.....:.....:.....:.....) \ | / (.....;.....:.....:.....:.....:.....
```

Short description of the gadgets in the main window:

RightMB: Will open the  
          module-programming window  
          Next: Load the next module ofcourse, will bring up a ↔  
              filerequester if the  
          current filelist contains 1 or no modules.

Load: Will bring up a filerequester asking you to select 1 or more modules.  
      The modules in the current filelist will be removed. Multiselect with  
      SHIFT is enabled from the filerequesters.

Pause: Well hmmmmm, nothing to say about this one except that pressing  
      space on the keyboard will do the same as this gadget.

Stop: Will cause BananaPlay to stop playing the current module and free all  
      memory used by the module. The module have to be reloaded if you want  
      to listen to it again.

Clear: Clear the current filelist and stop playing the current module.

Volume: GUESS!

Speed: Wow this sounds funny. This is also a good feature to use when you  
      want play fastforward without missing \*ANY\* speed commands in the  
      song.

About: Some bullshit info and my adress!

Hide: Will cause BananaPlay to close all windows and only be accessable  
      through the hotkey (look in prefs) and through the "Tools"  
      menu in WorkBench. If you want to hide BananaPlay always then check  
      out the prefs.

+1/-1: Jump a pattern forward/backward. When playing SID-tunes these  
      buttons performs a jump to the next subsong (if avaible)

Program: Open the  
           module-programming window  
 Prefs: Open the  
        preferences window

## 1.7 The Programming window

```

                                     _____
THE PROGRAMMING WINDOW             ( _ $ \times $ _ ( _ ) _ $ \times $ _ )
                                     - ( _ ) -
                                     - | -
.....:.....:.....:.....:.....:.....) \ | / (.....;.....:.....:.....:.....

```

Short description of the gadgets in the Programming window:

Load: Load a modulelist.

Save: Save a modulelist.

Current: Put the cursor on the currently playing module.

Play: Play the selected module (Return or doubleclick will do the same)

Settings: Open the  
           module-settings  
           window. In this window you will be  
           able to make individual settings for each module.

Add: Add modules to the modulelist. The modules will be inserted after  
       the cursor. You may also add an entire modulelist. They will in  
       that case first popup with their filename until you doubleclick at  
       it.

Remove: Remove a module or a subtitle.

Clear: Clear the modulelist and stop playing the current playing module.

Sort: Sort the modulelist in alfa-order. Each subtitle will be sorted  
       separatly.

Subtitle: Add a subtitle at the end of the modulelist.

Up: Move a module or subtitle up.

Down: Move a module or subtitle down.

After: Use this gadget to move a module between subtitles!

1. Put the cursor on the module you want to move.
2. Press "After".
3. Click on the module you want the first module to be placed after.

## 1.8 The preferences window

```

      THE PREFERENCES WINDOW
      _____
      ____ (____) ____
      (_?_ (____) _?_)
      (____)
      _ | _
      ..... \ | / (.....;.....:.....:.....

```

Short description of the gadgets in the preferences window:

**Moddir:** Default directory for your modules.

**Listdir:** Default directory for your modulelists.

**Replaydir:** Path to the external replay-files used to play other module-formats than Protracker and SID.

**Startlist:** The modulelist to be loaded when BananaPlay is started.  
Don't forget to mark the "Use startlist" checkbox!

**Key f1-f10:** You can assign a modulelist to every F-key. So that you can load your favourite modulelists with no fuzz at all. Just enter the path to your modulelists.

**MatchPattern:** Filter for the "Load/Add" filerequester.

**Next-Hotkey:** You can press this hotkey from any program and BananaPlay will play the next module.

```
=====
```

**Hide:** Don't open the main-window at startup. It will only appear in the "TOOLS" menu in the WB. (usefull together with startlist).

**Use Startlist:** Mark this checkbox if you want the startlist to be loaded at startup.

```
=====
```

**Spectrum:** On/Off!

**Gfx:** Updatespeed of spectrumgfx.

```
=====
```

**Auto change mod:** Load next module automatically when a module ends.

**Random order play:** Play the modules in random order.

**Allocate channels:** Allocate the audiochannels in audio.device or not.

IF YOU WANT TO ORDER NOW! Check Bottom of this TEXT!

CHECK OUT AMIGA REPORT 3.08 FOR A FULL REVIEW!  
 -----

Amiga has a good reputation for the high quality sound it can offer the users. Since it was released back in middle 80's the musicians have been working with it as an instrument. Our idea with releasing this CD was to let you listen to the best music that have been made on this wonderful machine. We never thought of making a big "hit" collection of the Amiga music but we're almost there with this CD.

It was hard to find all the best songs and the best musicians but this is a big step in the right direction. We are very happy to know that a lot of friends and musicians gave us a good backup with our work with this record.

During our work with making this CD we used the AMIGA for every detail we made with it. This is a tribute to AMIGA and it's creators. We are three persons behind this CD. We wanted it to be as good as it was ever able to be. I think that we have succeeded with it. I hope that you gonna like it as much as we do. We used every professional equipment we were able to use when developing this record. The multitasking system made it much easier for us to work with the whole thing.

To give you a hint of all the good music you can check out the contents of the CD:
