            History

1.2 Extreme Programming

A small group of four people have banded together to create the
programming group known as EXTREME PROGRAMMING. These people are with
their specialty:

    Paul Ullrich   - Utilities and Role-Playing Games

    Greg Magolan   - Graphical Games and Game Utilities

    Kevin Bryson   - Misc. Graphical Games and Misc. Text Games

    Brian DePratto - Large Text Games and Misc. Utilities

    David Sturgeon - Misc. Board Games & Text Games

    To contact us for game ideas, comments and ideas for game improvements,
read the following list:

    E-Mail   : paulu@ophelia.waterloo.net

    Reg. Mail : Paul Ullrich
                90 Royal Orchard Dr.
                Kitchener, ON Canada
                N2N 1J6

    Those at Extreme Programming are dedicated to those of you out there
who would take the time to download our programs and guarantee that as
long as we exist, we will provide good, quality shareware and freeware
products to everybody.

1.3   About the Author

    PhoneBook v1.1 by Paul Ullrich of Extreme Programming 1995.

    All compiling of Amiga programs is done on my Amiga 3000 using ACE. I
came up with the idea of a PhoneBook program a couple of weeks ago and
quickly programmed it and compiled it until I came out with version 1.0.
In the future, I am planning to add some more features to the program but
would request if you download it, send us some E-Mail or regular mail to
suggest ideas for features.

    THANX

       - Paul Ullrich Dec. 1995

1.4 How to Use Phonebook

   PhoneBook is a small utility which is used to keep numbers easy and
accesable. PhoneBook requires Courier 13 font installed in the fonts:
directory to run properly, if you do not haave it, it is contained in this
archive. It is quite easy to run, just type 'PB' from a shell window or
click on the icon using WorkBench. PhoneBook opens up a window where,
within are six gadgets and a box in the middle with the numbers 1 to 9
running down the side. The buttons in the window do the following:

   Add Entery - Allows you to add a phone number into the booklet which
                will be filed for future use. You will be asked various
                questions about the entery.

   Del Entery - Deletes an entery in the phone book. You will be prompted
                to enter the number of the entery to delete. Press 'A'
                here to abort it and go back to the menu. If you want
                something deleted, press the number of the entery and
                it will be deleted and all enteries below that point
                will be moved up.

   More Information - The Regular screen shows only Name and Number but
                when this is pressed, you will be prompted to enter the
                number of the entery you want to see. Press 'A' here to
                abort and go back to the menu. When a number is givin,
                the window will show everything about that entery.

   Quit - Exits (Easy, isn't it?)

   Up - Goes up one page

   Down - Goes down one page

1.5 History of Phonebook - Current V1.1

V1.0 - First Release

V1.1 - Second Release
        Add Entery Fixed to use standard input boxes
        More Information Fixed so all gadgets would be closed
        Icon changed to a Tool
