           SnatchDIZ V2.2 - © by rASCAL/SHOOT on 19.7.95
```

                   Purpose

                   Usage

                Requirements

                 Greetings

                 History
                            kEEP tHE aMIGA aLIVE aND ... lEGALIZE iT!

## 1.2  What the fuck...

SnatchDIZ  is  another  FILE_ID.DIZ extractor for the Shell or for use with
any bbs-system.  Features:

 - LHA-, LZX-, ZIP-, DMS-, EXE-, GIF-, TXT-support
 - SnatchDIZ is smaller than 3 KB and faaaaaaaaaaaaaaaaaaaast (1oo% asm)!
 - great code: SnatchDIZ does not produce HITS like WhaDIZ, SpeeDIZ etc.
 - reentrant (can be made resident)
 - good error handling: no problems with empty files or something

-=> Use SnatchDIZ instead of all the other crap floating around!

## 1.3   It's easy...

```
Usage: SnatchDIZ FILE/A,S=SUPPRESS/S
====================================

For example:  "SnatchDIZ dh0:down/PPLAY41.LZX S K" will give you

-------------------------------------
Power Player 4.1 Final Omega Version
* Latest Update! *
-------------------------------------

This extracts and shows the file_id.diz and suppresses the credits and the
filetype indicator.

WARNINGS: - SnatchDIZ is cli-only so don't start from Workbench!
```

## 1.4   You got this crap...

```
You need:

 - an AMIGA w/Kick 2.04+ (as always).
 - the lha-, lzx- and UNzip-executable placed in your path.
   A working UNzip is included in the SnatchDIZ-archive.

That's it.
```

## 1.5   Hallöle to...

```
                            all SHOOT members
                                CAFFEiNE
                                 OMEN
          STEELER and the rest/PHANTASM (thanks for the bug reports)
                               Flake/TRSI
                              MAVE/CRYSTAL
```

## 1.6   Versions...

```
V0.9: - not released but seems to work properly.

V1.0: 1st release, 31.3.95 (CAFFEINE)
  - added filetype indicator and the SUPPRESS option.
  - 1st release (under CAFFEiNE label)!

V2.0: 2nd release, 19.4.95 (SUPREME)
  - added own routine for search in DMSs (MUCH FASTER than DMS VIEWDIZ)
  - optimzed search in executables A LOT!

V2.1: (no public release)
```

- added own routine for search in GIFs (MUCH FASTER than GIFDESC)
- SnatchDIZ is now reentrant and can be made resident (PURE option)
- removed KEEPDIZ option because it was unnecessary at all
- now checks if dos.library is >= V36
- no longer crunched. V2.0 sometimes crashed on 040 systems due to
  the used packer (CrunchMania V1.9)

V2.2: 3rd release, 19.7.95 (SHOOT) :-)
- fixed bug with filenames containing spaces/wildcards
- I was told SnatchDIZ even handles JPGs, check it out yourself
