Who are you?

It's not my fault the boring disclaimer bit

What the....

Where, How?

How do you explain That?

It's a good job I've got....

I Love You Man

1.3 hey look, use it at your own risk

Disclaimer: OK. I take NO responsibility for these levels causing any damage to your system, your game of Worms, your health or anything else, including your pet goldfish.

Do not alter any details on the levels. Feel free to include them on CD-ROM archives such as Aminet, Fred fish etc. and also PUT THEM IN WORMS 2. Please could you e-mail me to tell me,if possible. If any magazines would like to put them on a coverdisk then please let me know and always give credit.

Sorry, getting carried away a bit now. They're only Worms levels....but you never can tell.

1.4 what is this I've just acquired?

'ello 'ello, 'ello, what av we 'ere then?

WHAT DO YOU THINK DUMMY?! It's a set of seven (yes7) rather good (honest) custom levels from **Team17's** Worms.

They were all created using **PPaint 6.4** on a 960 x 350 image size.

Now I don't claim to be no artist so don't go on at me for my lack of artistic talent.

There just levels I like playing and the must be **SOMEONE** who would almost enjoy playing them too.

I am not sure what machines these levels will work on. It depends on the amount of land mass in them. They all work on my 6-meg Amiga A1200 but as for other machines specs - I don't know.

1.5 so how exactly to I use these wonderful levels?

Installation - No problem

Hard Disk

Simply copy all the files ending with the suffix ".WRM" into the TWCUSTOM drawer in the Worms directory on your hard disk. Easy isn't it?!

Floppy Disk

Once again, copy all the file sending with ".WRM" into the TWCUSTOM drawer on either a blank disk or your back-up Worms disk if they'll fit.

1.6 tell me more, tell me more like did he have a car

Map 1: [Dopus](#)

Map 2: [Eh?](#)

Map 3: [Suicide](#)

Map 4: [Sunny](#)

Map 5: [Surreal](#)

Map 6: [War](#)

Map 7: [Workbench](#)

1.7 map numero uno

OK, so it's a little weird. Basically, It's a screen grab of Directory Opus 4. It looks strange but it plays well cool (if you pardon the expression)

That's all there is to say.

[Levels Next](#)

1.8 hot maps part deux

Just a quick doodle on PPaint ended up with this level. The nice blue border makes it fun to play just to see them drop into the water.

[Levels Next Previous](#)

1.9 third time lucky

I WAS BORED. I felt like a bit of mass destruction with airstrikes so I made this level.

[Levels Next Previous](#)

1.10 sunshine on a rainy day

My first custom level. Not spectacular but different. Just to see what things looked like and get to use custom levels.

[Levels](#) [Next](#) [Previous](#)

1.11 SHEFFIELD WEDNESDAY 2 - SHEFF UTD 1

My second custom level. Again, nothing spectacular. A nice plain , green landscape. I like to stand on the roof of my little house and blow the S**t out of Worms

[Levels](#) [Next](#) [Previous](#)

1.12 war, never been so much fun

AH! One of my favorite custom levels. Best for 2 players, It was created for my and my brother to blow the crap out of each other.

This level didn't work on my brothers Amiga Technologies 1200 with 2meg RAM.

[Levels](#) [Next](#) [Previous](#)

1.13 Its hard, so hard, it's tearing me apart

Another screen grab, this time of my workbench. Again, it looks weird but is fun to play.

[Levels](#) [Previous](#)

1.14 but I NEED these things

Directory Opus 4

Directory Opus is by INVOAtronics (at least thats what it says in the 'about' option on my version.)

PPaint

PPaint 6.4 is by Cloanto. E-mail info@cloanto.it

TEAM 17 are responsible for this indirectly since they are the company behind WORMS.

My Workbench

My Workbench was customized by [me](#) and designed by Commodore although it is now "made" by Amiga Technologies.

1.15 Sarah - I'll be your K.S.T.

HA HA. AT last! This is where I get to say hello to anyone I want!

So, Greetings to: Andy Wilson - You can't play worms to save ya life.

Kev Williams - Hartlepool United's Number 1 (and only!) fan.

Guy Woodhouse - An AMIGA is a REAL computer.

and of course, Sarah - My gorgeous girlfriend. xxxx

AND FINALLY (Phew, I here you say) to YOU

Yes, YOU. The person who is reading this now. Thanks for having an AMIGA. Keep upgrading it and stick with the machine we love.

Cheers,

Jamie
