### 1.2 DMThor About

DMThor About

This program will read in a conference name and copy all messages in that conference to a text file that you could then (possibly) use to create a digest and post to your webpage or to create a digest and post on a listserver. I believe that there is a Thor script that will read in a digest file and copy the messages to a conference of your choosing. It's called SortMail.br

---

I can be reached at either of the following ways for any questions comments/bug reports etc...

Internet:

E-Mail: [tbouchar@ptialaska.net](mailto:tbouchar@ptialaska.net)  
WWW: <http://www.ptialaska.net/~tbouchar>  
News: alt.sys.amiga.thor Not Recommended!!

Snail-Mail:

Send money to:

SnowyHill Christian Academy  
ATTN: Troy E. Bouchard  
737D Alyeska Ave.  
Kodiak, AK 99615

### 1.3 DMThor Disclaimer

DMThor Disclaimer

I have made every effort possible to make sure that DMThor will operate as programmed, however, no warranty of any kind, expressed or implied, is made by me. I will not be liable for any kind of damages direct or indirect to your computer. In no event will I be liable for any damage, loss of profits or savings resulting in the use of this program (script).

### 1.4 DMThor Registration

DMThor Registration

DMThor is Shareware, I would like you to at least send me an EMail saying you are using it. If you do use it on a regular basis please tell me so. I would like to say that after 30 days of regular use you MUST register it - but I see that all the time and I don't like it - so I won't.

When you have EMailled me - telling me you are using it - you will be put on a "list" (if you want) of 'unlimited' free updates to the script. You will also get free support, and a clear conscience.

If you want to use this script in a business environment then please send me an EMail and we can work out a 'Deal'.

### 1.5 DMThor Install Guide

DMThor Installation

Installation is easy and painless! Just copy DMThor.thor to

---

your [VOLUME]:Thor/rexx directory and run it!

When you run DMThor a ListView will pop up asking you to choose a System. Go ahead and choose your favorite system! Another ListView will pop up asking you to choose a Conference. Choose one!. Once you've chosen your conference DMThor will create a file in the T: directory called CONFNAME.digest (e.g. EMail.digest, Miami-L.digest etc.)

That's all there is to it! DMThor will read the conference and you will see a progress bar adding messages to your file!

New

There will be two progress bars - one for adding the topics and one for adding the messages - so don't freak out when you see that happen!

## 1.6 Acknowledgements

DMThor Would Like to Thank:

The Thor team for developing the Amiga's best news and mail software for ANY computer platform.

Remco van Hooff - who helped me get rid of that annoying Message is deleted error and just some general scripting techniques!

Bill Hawes for developing ARexx

Matthew Dillon for creating DME. THE editor for programmers and programming.

## 1.7 Distribution

DMThor Distribution

DMThor.thor is freely distributable, but remains © Troy E. Bouchard.

It may not be included in any commercial distribution without prior consent. Such consent is already given to include in on the Aminet CDs.

It may be included on magazine cover disks or CDs, notification must be sent beforehand. A copy of the magazine and disk would be most welcome.

## 1.8 DMThor History

DMThor History

History: v1.0 - First release! - (07.27.96)

v1.1 - First Update! - (07.29.96)

---

Added a Progress Bar  
Updated the final REQUESTNOTIFY.

v1.2 - Second Update! - (07.30.96)  
Changed the WRITEBRMESSAGE to SAVEMESSAGE  
(The digest looks better now)

NOTE: If you have a deleted message in the conference  
SAVEMESSAGE will quit! I don't know of a way  
around this (yet) - any ideas?

v1.3 - Third Update! - (08.03.96)  
Fixed the problem with Conferences that have  
spaces in their names. A special thanks to  
Remco van Hooff <rvhooff@GlobalXS.nl> for this fix!

NOTE: Remco also showed me where to go to fix the error  
that will occur if you have a deleted message in  
your conference. I'll get that fixed soon.  
Right now - I don't feel well.

v1.4 - Fourth Update! (08.07.96)  
Fixed the deleted message problem. I would say  
that this is temporary because usually when you  
delete a message it's because that message is a  
duplicate and this routine just puts that message  
back in. But not back in your conference - just  
the digest.

v1.41 - Fourth update! +1 (08.12.96)  
This REALLY fixed the deleted message problem. It  
also fixed the MDF\_UNRECOVERABLE error. Thanks go  
out (again) to Remco van Hooff - who helped me  
figure this out.

v1.45 - Fourth update! +5 (09.30.96)  
Fixed the progress bar. Was showing 100% all the  
time. Now counts the actual messages and not the  
deleted ones also. Added error checking.

v1.50 - Fifth update! (12.02.96)  
Major re-write! The script now reflects a true  
digest! No one told me I was doing things wrong.

There is now a 'TOC' and then the messages.

---
