This information pulled from the ascii version of Xeno BBS-list

Please note: This AmigaGuide version is generally just a complete listing of Xenolink supported BBSes which appears in the monthly ascii version. The ascii version will be the one that shows which systems are new and updated.

-- Lennart

1.6 About the Xenolink BBS-List.guide

The Xenolink Worldwide Bbs List

© Copyright 95/96, Lennart Schram

AmigaGuide edition Ported by:

Lennart Schram

Welcome to the Worldwide Xenolink Bbs List in AmigaGuide format!

This Version of the BBS-list was updated using the old ascii version, which i used to work with :-)).

This AmigaGuide version contains almost the entire contents of the ascii version. (also available)

Distribution sites BBS-LIST

Because of the differences in AmigaGuide libraries for WB2.x and ↔
3.x,

there are some "cosmetic imperfections" in the way this guide will look, depending on what version of AmigaDOS you are currently using. Some of the buttons)especially clustered) will be off center. Every attempt has been made to keep this problem at a minimum.

I have also taken advantage of some WB3.x specific features, such as bold, highlighted, italic, and underlined text. Also
 HELP
 is always
 available with the AmigaGuide "Help" menu button. (Ghosted under WB2.x)
 If you can read THIS sentence, these features will NOT exist!

1.7 Help with the guide

AmigaGuide buttons

BBS-LIST.guide buttons

[CONTENTS]	Main menu.	[ABOUT]	About BBS-list Guide.
[INDEX]	Not supported.	[HISTORY]	Brief history of BBS-LIST.
[HELP]	This page.	[CREDITS]	People who helped.
[RETRACE]	Returns prev. page.	[SUPPORT]	How to support the list.
[BROWSE <]	Retracts one page.*	[CODES]	Help with the codes.
[BROWSE >]	Advances one page.*	[VOLUME]	Volume # from a shell.
[TITLE]	Enters the list.	[©]	Copyright information.

* Browse is limited to a few areas only.

SEE SEPERATE CODES BUTTON FROM THE MAIN MENU FOR MORE!

=====

1.8 Checking the volume number

You can get the volume number of XLK-BBS_LIST with the "WB:C/Version" command from the shell without having to load up the database.

Click this button for a simulation

Depending on your set-up you may have to shuffle windows to see the results of this simulation, as it opens a seperate shell.

Also, if you've renamed this database the "simulation" will not work.
 The file name should be: XLK-BBS_LIST.guide

1.9 No listing

If there is currently no listing for this country / area
 If you know of a system in this country/ area please

contact
 me trough netmail or E-mail!

Thank You!

1.10 Understanding the codes

Understanding the codes

```
Bbs Name
c
S
Phone number
City
Baud
Modem
Net
Ln
```

For a simple explanation of the codes just click the appropriate ← button.

You can access this screen at any time by selecting the "bar" at the top of each listing, then hit "Retrace" a couple of times to return you to the previously displayed listing.

1.11 The name of Bbs system

Not much to explain here, just the name of the BBS!

1.12 Computer type the BBS uses

```
c = Computer type used
    by the listed BBS.
```

```
-----
```

```
a = Amiga
```

1.13 Telephone numbers

With the AmigaGuide edition of this list you will be allowed to select a specific State, and area code within that state. At any time you can look in the title bar to see which state is being listed as well as the area code.

International numbers are currently only seperated by countries. County codes and city codes are included, refer to your local telephone book for a better understanding of these codes.

To place an international call you must first contact your long distance company for information on how to use their service for international calling.

1.14 City location of BBS

City from which the Bbs is opertated.

1.15 Baud rates

This column will tell you the MAXIMUM Baud rate the BBS is running at. You may call in at rates equal to or slower than that listed. Note: on many multi-line systems, the rate varies from line to line.

If you call a multi-line Bbs:

1. Check the baud rates of each line listed.
2. Many Sysops have commented on people calling a "higher" baud line with a "lower" baud connection (when they have "lower" baud lines empty!). This means the higher speed lines are busy more often.
3. Call the line with the rate closest to your modem. If it is busy THEN try the other lines. This makes it fair for everyone!

1.16 Number of lines available

If the system is multi-line, the total amount of lines or the line number will be placed in between the '[]', otherwise it'll be left blank for easier reading.

1.17 Disclaimers

=====

DISCLAIMER: ALTHOUGH THIS LIST IS AS ACCURATE AS POSSIBLE, PLE@SE REMEMBER, BBS SYSTEMS WILL COME AND GO ON ALMOST A DAILY BASIS. ALL THE INFORMATION IN THIS LIST HAS BEEN COMPILED FROM NODELISTS, SYSOPS, AND USERS. IF YOU FIND A BBS ON THIS LIST THAT IS NO LONGER ONLINE, PLEASE

INFORM

ME AS SOON AS POSSIBLE SO IT CAN BE REMOVED FROM THE NEXT LIST. ALSO, IF YOU RUN UP A HUGE PHONE BILL, I AM NOT RESPONSIBLE! :-)

=====

DISCLAIMER NUMBER TWO: THIS LIST CAN NOT BE REPRODUCED WITHOUT MY PERMISSION. THE TEXT VERSION MAY BE VIEWED AS A BULLETIN ON ANY BBS SYSTEM AS LONG AS THE HEADER (FROM THE TOP OF THE LIST DOWN TO THE, "SYSOP PLEASE POST THIS FILE FOR USERS TO ACCESS" MESSAGE) IS INTACT!

Issue No.03 And all before the .guide (Normal Ascii version(s)

```

1.49 Where to get the BBS-LIST

/X/ Where to get the BBS-LIST each month:

- Automatic thru the network :-)
- Aminet (ftp.uni.paderborn) directory Comm/Xeno/

/X/ Official Xenolink BBS-LIST Support Site:

- Dial-Tone BBS +31-72-5402-979, The Netherlands 33K6 HST/v34 2:280/128.0
 - And ofcourse almost all xlk bbs'es around the globe :-).
-

1.50 People to thank!

/X/ Thanks to the following people for additions, changes, suggestions, help, verifying, inputing, format, etc.!:

ALL the Xenolink Sysops that sent me your information via NetMail and/or Origin lines! Without your co-operation, this list couldn't have been possible!! Keep running those Xenolink bbses!

Especially

Jeff Jangli
for writing the GUI registering tool :-)).

1.51 BBS Software the system uses

/X/ S = Bbs Software used (2 letter abbreviation)

- Amiga BBS software :-), Xenolink
-

1.52 Modem type the Bbs uses

/X/ Modem Types

ITU-T was formerly known as CCITT.

v32 = ITU-T V32 9600 bps full duplex
v32b = ITU-T V32bis 14400 bps full duplex

HST = USR HST 9600/14400 bps
HST/v32b = USR HST/DS 9600/14400/16800 bps + v32b
HST/v32t = v.32terbo 19200/21600 full duplex + HST/v32b
HST/v.FC = v.FC 28800 full duplex + HST/v32t
HST/v.34 = v.34 28800 full duplex + HST/v.FC

ZyX = Zyxel series 9600/14400 bps + v32b
ZyX+ = Zyxel series 16800 bps + v32b
ZyX++ = Zyxel series 16800/19200 bps + v32b

vFC19 = v.FC 19200 bps full duplex + v32b
vFC24 = v.FC 24000 bps full duplex + v32b
vFC28 = v.FC 28800 bps full duplex + v32b

v.34 = ITU-T v.34 28800 bps full duplex
v.34+ = ITU-T v.34+ 31200 / 33600 bps full duplex

- Speed-codes used in the BBS-LIST:

A= v22 B= v22bis C= v23 D= v32 E= v32bis F= HST (1=9600 2=14k4 3=16k8 4=21k6/V ↔
-terbo 5=33K6/V34+)

G= ZyXel (1=16k8 2=19k2) H= VFC (28k8) I= v34 J= v42 K= v42bis L= MNP5 M=Euro- ↔
ISDN N= I-net addr.

1.53 Available Networks on the BBS

/X/ Nets = Message Base Networks (only Amiga-related topics listed)

AmigaNet -- a whole Network with ALL Amiga ONLY topics/messages!

FidoNet --- one of the Biggest Networks around!

InterNet -- A network covering the entire world. Perhaps 19,000
networks with millions of individual systems are
connected to the InterNet. InterNet nodes are mostly
UNIX systems.

NLA -- A network in the netherlands created by bart Schraa,
formaly co-ordinator of the network.

LCN -- Also a network from the netherlands created by Ian p.heitmans

If someone could come up with better text to describe these Networks, I

could use the help.

1.54 Application

In this menu you can write your application thru a GUI interface :-))
So lets click the BUTTON

At At this very moment the 'Register application' is in a Very BETA ↔
stage
So by using it, it could be that it doesn't work proper.

And if it doesn't use the old .add form wich work fine 2 :-).

Click this button for registering

1.55 Jeff Jangli

At first he is a guy from the Netherlands, Also Xenolink SysOp, but not ↔
active
Online.

At Second and ecellent DOOR programmer.

Some of his work is :

CallSysop

Newuser.rexx (v2.0) recently hatched, before that 2 earlyer version.

ListRegist (the utility used for creating the bbs-list .add form.

TODO:

Complete the ListRegist app.

Trying to add 'auto netmail' option or maybe even E-mail.

adding a reqester for using your own favorit Editor (Ced, Ed etc.)
to add the Xtra info.

More news wil follow :-).

1.56 Xeno Inc. Members

As I'm sure you're all aware, Xenolink is now owned and developed by
X-Team Developments, more commonly known amongst Xeno sysops as Xeno Inc.

All previous rights to the source, development and name are now owned fully by ourselves.

And here we are;

Name		Email Address	Fidonet Address
Chris Dee	(Netherlands)	chris@trans.xs4all.nl	2:286/517.0
Roelof Jansen	(Netherlands)	roelof@trans.xs4all.nl	2:286/405.0
Martin Wasley	(UK)	mjw@martinac.demon.co.uk	2:2500/167.0
Robert Dale	(UK)	robdale@darkside.demon.co.uk	2:254/524.0
Francesco Brolli	(Italy)	kekko@inbox.vol.it	2:333/721.0
Brendan Pratt	(Australia)	bpratt@sidecar.livewire.com.au	3:640/463.0
Colin Bell	(Australia)	colin@twister.dialix.oz.au	3:712/631.0
David Hockett	(Australia)	<None>	3:640/800.0
Garrett Laska	(USA)	glaska@ecshore.apk.net	1:157/569.0
Jack Boling	(USA)	<None>	1:124/7005.0

To get more info how to GET Xenolink call, mail to one of the above addresses

1.57 MagicFile Advertisement - (c) Manuel Groeneweg

MagicFile v1.71+

A full-screen ANSI file tagger for Xenolink 1.98+

The first and ONLY file-tagger for Xenolink!

Copyright © 1994-1996 by Manuel Groeneweg
All rights reserved

List of features

MagicFile Online

1.58 MagicFile features

- o Supports the following files:
 - Xenolinks standard file catalog
 - external configs (for CD-ROMS)
 - Aminet FILES.BBS
 - Gifs Galore 00_INDEX.TXT
 - Users private dir (from UserFileBox)

- o Optional buffering of CD-ROM files for systems with CD-ROM changers.

- o Supports external doors (with possible access restrictions) for eg.:
 - Downloading
 - Archive viewing
 - Long descriptions
 - File maintenance/editing
 - Anything you can write yourself
- o All text strings configurable
- o All keys configurable
- o All colors configurable
- o Online help through text file
- o Lots more, see for yourself!
