A few days ago I had the need for some classical music to add to a video project I was working on. In the spirit of do-it-yourself, I picked up my classical guitar and created an audiocassette of several public domain classical melodies that I could use for whatever video or multimedia projects I happen to be working on.

In the spirit of sharing, I'm making these melodies available for anyone else to use in their video or multimedia projects. This SimpleCard stack is a sampler of the melodies on the cassette titled: "Classical Guitar Melodies 1."
