**How to progress through the game:** *Mystery Case Files: MillionHeir* takes a bold step into Touch Generations with a new game in the accomplished *Mystery Case Files* series from Big Fish Games. *Mystery Case Files: MillionHeir* is a seek-and-solve game in which players assume the role of a detective who investigates a set of unique characters by finding cleverly hidden items in their environments. The objects are displayed in plain

sight but are seamlessly interwoven into the illustration, making them challenging to find. Once a player finds enough hidden objects in a certain area, the character and area will be considered investigated. The player will then be prompted to move to the next potential clue.

**Characters:** Phil T. Rich and a rich cast of possible heirs.

**Mini-games:** Finding hidden objects is not the only activity in *Mystery Case Files: MillionHeir*. Between investigations, players are presented with entertaining brain teasers that must be solved in order to progress. These mini-games add to the depth of the experience by including game-play mechanics that reach beyond the core searching elements. All of the mini-games use the Nintendo DS stylus in ways that provide a true Touch Generations experience.
