Welcome to the AFS Palette

Anderson Financial Systems, Inc. is the premier supplier of word processing and page layout applications for NEXTSTEP and OPENSTEP. AFS is a privately held software development company based in Springhouse, Pennsylvania (suburban Philadelphia). Founded in 1982, the company's primary business has been designing customized trading software for more than 60 Wall Street firms on IBM PCs and NeXT workstations. Since adding NeXT to its roster in 1991, AFS has made a substantial commitment to building applications that leverage the unique capabilities of the NEXTSTEP operating environment.

If you are not familiar with WriteUp and PasteUp, please run the demonstration versions found on this disk. If these demonstrations have expired, please call us and we will provide you with a demonstration license string.

WriteUp.tiff ↵ **WriteUp**[™] is a full-featured word processor that excels at letters, memos, reports, proposals and all types of common business documents. WriteUp has everything expected in WYSIWYG word processors: fonts, color, alignment,

indents, tabs, pagination, headers and footers, spell checking, margin control, destination object links, and graphic support for TIFF and EPS. It also provides advanced typographical features such as smart-quotes, kerning, line height control, and automatic hyphenation. WriteUp contains templates, mail merge, columns, named paragraph styles and "runaround" for flowing text around graphics. A page navigator allows rapid access to any document page with thumbnail sketches of all pages. WriteUp can display multiple views of documents at zoom factors from 10% to 1600%.

PasteUp.tiff → **PasteUp**™ is an extremely powerful and easy to use document creation and word processing package. Offering all the features of AFS' WriteUp, PasteUp is also a page layout tool, providing visual design tools, very flexible multi-column layout, fully functional graphical drawing tools, and advanced typographical features such as text wrapping around graphics, kerning, leading, and smart punctuation. Like WriteUp, PasteUp offers spell-checking and hyphenation in 8 different languages, as well as support for RTF, RTFD, and other popular document formats. Importing of TIFF, EPS, and PS graphics is standard; user-supplied image filter services are also supported. PasteUp can skew, rotate and scale any text or graphic element to any arbitrary degree and precision. PasteUp can also perform sophisticated pre-press operations such as spot color,

color separations, crop and registration marks, and printing to all supported PostScript devices.

.dir.tiff → For leading edge financial services firms who want to streamline their trading support operations, **afs:TRADE™** is a front office trading system that is easy to use and can be adapted quickly for specific customer requirements. Unlike rigidly defined in-house solutions, our product can be deployed more quickly yet is totally customizable and easy to maintain.

If you have any questions or comments, please call us. Thank you for your interest in our products!
