TIFFany II V2.20 Triple and Quadruple FAT News

In the current version, there are some known bugs.

· For HPPA only: Due to a bug in the HPPA AppKit, the Process panel does not remember its last location. In order to fix that, enlarge the panel a bit (roughly 300*200), place it whereever you wish, and quit. If it still isn't enough, enlarge a bit more¼

· For Sparc only: Currently, TIFFany does not support the automatic crash catching mechanism. If T2 crashes on a Sparc, the backtrace is printed only in the Console, not also in Mail.app.

Also, an administrative change. bMD, TIFFany II's distributor, has moved. The new address is:

benchMark Developments, Inc.
11970 Charter Oak Parkway

St. Louis, MO 63146-5226
Phone: (314) 872-2907 or 800 872 3131
info@bmd.com

This address can also be found in the "Purchase Info" panel within the application.

Please excuse the inconveniences. We hope you enjoy TIFFany II.
