

FOSSIL FIGHTERS FRONTIER

A Bone to Pick

The latest game in the *Fossil Fighters* series delivers a first: Players can now hop into their vehicles and drive around exotic locations to excavate fossils, which transform into real-life dinosaurs known as Vivosaur. Players battle their Vivosaur with wild Vivosaur they encounter on digging adventures.

FEATURES:

- While driving, set off radar blasts to help discover dinosaur fossils. Different buggies possess different features. A racing buggy, for example, goes fast and allows players to reach faraway places, while a carrier buggy is great for transporting more items.
- Unearth ancient dinosaur fossils that come to life and transform into Vivosaur. Clean fossils using tools like hammers and drills on the Nintendo 3DS* touch screen, but don't be hasty: Carefully cleaning fossils makes the transformed Vivosaur more effective when it comes time to battle.
- Using local online play, players can explore and excavate the dig sites as a three-player team.
- Bring the Vivosaur you are training to join six-player local and online Vivosaur battles**, fighting three-on-three in a stadium.
