

Preferences

The Preferences card is broken into seven sections, selected from the buttons located at the top center of the card:

Editor Preferences

General functioning of the editor, eg. text wrapping, font and size, WWW browser choice, highlight font and style, report template, etc.

HTML Preferences

HTML specific syntax options, customizable tag tables, return key functioning, etc.

Paths Preferences

Server name and port, server path (location of server), etc.

Import/Export Preferences

Text file handling on import and export: file creator setting, translation on export options, server platform, etc.

Conversion Preferences

Conversion tables for Preprocess, Table Convert, Custom Entity and RTF.

Compacting Preferences

Freespace auto-compaction preferences.

Libraries Preferences

Hotlist (URL), Clip (text), and Image (image URLs) Libraries.

Back to Key Shortcuts, on to Tool Palette Menus, or return to Contents.
