	own (If you use your own wave files you must rename them)
and they	must be in your path.
VBCTL3D.VBX	Place it in your Windows Directory

Description:

The object of the game is to finish with more pieces than your opponent.
You take pieces by surrounding an opponents on two sides in any direction
which includes diagonally. You may only make a move when you can take an
opposing piece. If no moves are available the computer will forfeit your turn.

The Easy, Hard, and Difficult Levels puts you against the computer.
The first level is fairly easy, the moves are totally random. The next
level is Hard and the last level is very difficult to win.
The game can be changed to a -Two Player- level, which involves no computer
interaction. At this level, you can play both the HEARTS and SPADES turns, or
compete with someone else.

The cursor will change to a Cross whenever it is over a valid move. The Hint button
can also be used to determine the current player's best move. The hint square will
flash on the board.

If you want to play Music on the background or enable the Sound effects select
Music and sound effects.

The game ends when all of an apponents pieces are taken, there are no more valid"
moves, or all of the squares are filled.

REGISTRATION:
