•WHAT IS THIS?•

Aspire is a very elegant typeface great for logos, headlines, brochures, invitations, etc. I created both Type 1 and TrueType versions for your pleasure. Personally I think the Type 1 version is suited for more applications, especially if you want to convert it to outlines in a draw program. It's very similar to a commercial typeface with the exception it costs much less. It's slightly boldfaced and ideal for printing above 48pts.
