

About this patch...

This is version 1.0 of Output Enablers' System 7.5 Update Patch. It is free, and may be distributed over the Internet and public online services. It MAY NOT be distributed by any Clock Accelerator company other than Output Enablers, although owners of kits from those companies (Newer Technologies, KS Labs, Other World Computing, Trinity Works, DVC, etc.) are allowed to use the program free of charge.

How does it work?

Apple's new System 7.5 Update 1.0 contains code to selectively load Operating System patches based on machine type. Machine type is determined at boot-up and is stored as a "Gestalt" value. PowerMacintosh 7100/66 machines that have been upclocked to 80 MHz report a different Gestalt value than either the standard PowerMac 7100/66 Gestalt or the 7100/80's Gestalt. Hence, the System Update 1.0 will not load on 7100/66's that have been upclocked to 80 MHz.

OE's patch to the System Update 1.0 file simply copies certain resources for the normal 7100/66 and changes the resource ID to match the Gestalt value of the upclocked 7100/66.

A similar patch is included for PowerMac 8100/100 and 8100/110 machines that have been upclocked past 120 MHz.

This patch cannot work properly while virus detection software is running. Please make sure that you have disabled any virus detectors before applying the patch.

And now, the Legalese:

This software is provided 'as-is', without any express or implied warranty. In no event will Output Enablers be liable for special, incidental, or consequential damages resulting from any use of this software, or under any other legal theory, including but not limited to lost profits, downtime, goodwill, damage to or replacement of equipment and property, and any costs of recovering, reprogramming, or reproducing any program or data stored in or used with computing devices that have been modified using this software.

This patch application was made with ResCompare, a free resource comparison and patch generation utility. ResCompare can be FTP'ed from most Macintosh archive sites. Send e-mail inquiries regarding ResCompare to Michael_Hecht@mac.sas.com.
