

Marathon Marine

By Cmull86011@aol.com

Yet another wonderful JPEG by the same person who created the now-famous Floating Compiler picture featured in March. I realize that most people are unaware of the author of that portrait. Please be aware that these wonderful paintings come from Cmull86011@aol.com

"Marathon Marine" is another 3-d rendering, this time of a Marine in a small room, perhaps an elevator. The graphic is in JPEG format. There are many shareware viewers available which display this format, including:
