

(This letter is in English, but I'm not a native speaker, so please forgive me...)

Hi everybody !

I send you some little patches I made only for you, just to add more romantism in your favourite computer. Those patches doesn't creat any trouble, because they do not change anything in the programs.

Those patches are "Heart-wares", I just created them with plaisir because...
..."It's much better with a Macintosh!"...

If you like any of them, and if you want to encourage me to creat some others like them, and even greater, just send me \$1 as a symbol of your satisfaction at the following address:

BORIS WELIACHEW
102 Akatsukiso, Shiheicho 9-41
Aoba-Ku, SENDAI 981
JAPON

(yes, I'm French, but I live in Japan)
Send it only using an official international money-postal oder, please.
As I'm living in Japan you have to change the dollar in yens as follow:
\$1=¥100

Some other patches already exist for other applications.

I work today on four different Macs, one PowerMac 8500/120, one PowerMac 8100/100AV, one Quadra 840AV and one Power-Book 5300.
So I tested those patches only on those four machines. But as those patches does not affect any programmation. On the other hand I'm working with the less stable system existing which is this "... Japanese Macintosh system, so it should only work even better on yours...

Being an Architect and working only on Macintosh and SGI Onyx, I progressively became a lover of everything which is beautiful, and I cannot stand any imposed environnement. So I regularly change it, as you will be able to see with my patches.
That is why a Mac is really "magic" somewhere, isn't it?...

At last I'm in real war with this famous W.. 95 system, which is "... me seriously.
Using the Internet nearly every day I feel little bit offended by the fact that developpers often offer the new versions of their great applications at first to this ugly W.. 95...
So I changed that, offering to you the chance to get even "better" much before any others...
Enjoy it! Your friends on other platforms will be jealous. But that their own fault, their should have bought a Mac!
Because of that the first patch, will change the appearance of your favourite Web application which is the great "Netscape Navigator" in its last version.

The second also offered on the Net is changing one of your favourite User-System extention which is the great "~Aaron" also in its last version...

This text will be the same given with the both patches.
Download the other now.
I agree personaly with the fact to put my patches on any Magazine's CD-ROM.

Read also carefully the text I wrote with my poor English when you will open those patches!!!

Have a lovely day,

Boris
