

License

[Program Switcher](#) will only work 50 times between each computer restart unless it is registered.

You may install [Program Switcher](#) onto your computer free of charge for up to 2 weeks. After that time, you must either remove [Program Switcher](#) completely from your computer or pay an one-time registration fee of US\$10 for each computer you have [Program Switcher](#) installed on (site licenses also available).

[Program Switcher](#) may be freely distributed by any not-for-profit organization. Commercial organizations who want to distribute [Program Switcher](#) must obtain permission from me (Michael F. Kamprath) first. Failure to do so constitutes an agreement on the part of the commercial organization to pay me (Michael F. Kamprath) US\$1000 for each incident. Online services (such as AOL and CompuServe) are excluded from this limitation and may freely distribute [Program Switcher](#). This limitation is intended to prevent CD-ROM companies from distributing old versions of [Program Switcher](#). Obtaining the "latest version" does not exclude a CD-ROM company from obtaining permission first.

Registration Fee

[Program Switcher](#) has a registration fee of just \$10. For the registration fee, you will receive a password based on your name which will allow you to use [Program Switcher](#) more than ten times per session.

To pay the registration fee, please use the Register program included with the [Program Switcher](#) archive. This program will help you generate a registration form for paying by check, cash, or credit card. Once you generate the form, please mail it to the address on the form itself. Do not mail the form to me as I have contracted Kagi Shareware to process my shareware registrations. You will need to provide some manner in which I can contact you to provide you with your registration password. If you have an e-mail address, please include it. This is the easiest and the quickest way for me to send you your password.

If you are on CompuServe, you can register [Program Switcher](#) online. Type GO SWREG for more information. [Program Switcher](#)'s registration code is 6209. CompuServe only allows single user license registrations.

Site licensing and customizations are available. The Register program has two options for site licenses: Regular and "World Wide". If you want to get a site license that allows your employees (or students, if you are a school) to install [Program Switcher](#) on their personal computers (that is, the computers are not owned by the holder of the site license), you must get a "World Wide" license. This license will authorize anybody directly associated with the holder of the "World Wide" site license to install [Program Switcher](#) onto any computer that they use.

Custom about boxes are available for either type of site license. Please arrange this in advance.

Upgrades from previous versions of Program Switcher are free. Please contact the author by e-mail if you need a new password. Be sure to include your customer number in your e-mail.

Contacting the Author

You may contact me through e-mail at:

<mailto:kamprath@kagi.com>

Since I move often (I'm in the military), I do not list my postal address here. If you want to mail me something, please contact me by e-mail first to obtain my postal address.

If you are on the World Wide Web, please take a moment and visit my web page. You will always find the latest version of [Program Switcher](#) and other shareware products by me there. The address is:

<http://www.leonardo.net/kamprath/clairware.html>

Warranty

USE OF THIS PRODUCT, PROGRAM SWITCHER, IMPLIES THAT YOU WILL HOLD MICHAEL F. KAMPRATH HARMLESS TO ANY DAMAGES CAUSED BY THE PERFORMANCE OF THIS PRODUCT. YOU ALSO AGREE THAT MICHAEL F. KAMPRATH CAN NOT BE HELD LIABLE FOR ANY OTHER DAMAGES YOU MAY INCUR BY THE USE OF THIS PRODUCT. MICHAEL F. KAMPRATH PROVIDES NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, OF THIS PRODUCT, INCLUDING ITS MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

"Windows" is a trademark of that company run by Bill Gates.
