

Good Luck!

-----

Please remember your shareware fee: \$5.00 is more than reasonable for a program of this caliber, in fact, it's downright cheap. The next time you relax while MacUpdate is doing your backups for you, consider all the time that I spent working on this program so you could enjoy yourself in this manner.

I'll keep developing MacUpdate as demand dictates. This whole thing started as a labor of love, and I expect that to continue for some time.

Thanks to Luca Tami for the "delete", "source", and "destination" suggestions.

Good Luck!!!
