

Label Preview Data

Use [Label Preview Data](#) to designate the information you want displayed on the label when using the [Label Preview](#) option without having opened database.

You can enter the information into the [Label Preview Data](#) dialog box *both manually and by copying the database record that is currently active.* You can copy into the [Label Preview Data](#) dialog box the active record of the current database by clicking on the [Active Record](#) button or manually enter the data you want.

If no database is currently active the [Active Record](#) button is dimmed.
