

he easy-to-use time tracking program for the Macintosh®.
System 7 or greater is now required for TimeTracker.

Also please check out our professional time-tracking application TimeSlice®.
You can download a full working demo from our web page. If you have
Netscape up and running, click on the hyperlink.

imeTracker is Shareware - you may try the program for a short time, but if
you like it and want to keep using it, please send in the requested \$25
registration fee. A lot of time and effort went into developing this program,
please be fair and help support it.

Please read this manual. It is short and easy to read.

This manual was written using DOCMaker, the shareware document creator
from Green Mountain Software. If you have any problems using or printing
from this manual, contact Green Mountain Software at
<greenmtn@Traveller.com>. If you have questions about TimeTracker,
contact Maui Software.

Feel free to submit comments, suggestions, and bug reports.
