

Click on the Export button or select Export from the File menu to Display this window.

xporting extracts the data from TimeTracker into a tab-delimited format readable by almost every database, spreadsheet, and word processing program.

For example, let's say you want to further analyze and print the TimeTracker data. Export the data, and then import it into a database program, such as FileMaker Pro. Now you will have much greater control on how the information looks and prints.
