HAVOC

pause the game and hit the following keys repeatedly:

a - gives you full ammo

s - gives you full shields

m - gives you a mortar launcher

v - gives you an extra life

By: Tyler Thompson <tylert@primenet.com>

Ok, I fear for putting this trick here, because people will get boared of HAVOC, but I found that if you hold :

Apple-Shift-Control

(I don't know if you need them all, but that works for me)

immediatly after you have been hit (right before you die, when it starts you with a new cart) you will end up with 9 lives and they are unlimited!!!!!!

ICE AND FIRE

Level Codes

1 INNA
2 LENA
3 SVETA
4 NINA
5 KATYA
6 ANNA
7 TANYA
8 KLAVA

And then there's a general purpose password : MAXIM

JETPACK

In The Reactor, go straight up to find the key. Then when you drop back down, try to keep in the middle of the level.

That way you land almost exactly in the lift and you save time, which gives you more of a bonus, which can give you another life. Also, if you aren't good at dodging fireballs, practice on The Reactor instead of Fireball Hall.

LORD OF THE BEARS vol.1

one of the cheats is to get 2000 gold , this can be done as many times as you would like, all that is needed to be done is click the **leave town button** and the town screen will be filled with dots this signafies that you are outside and the rest of the map will light up, **click around to the left of the armor shop button** you then will find mr. bear he gives you the gold.

On the outside map is three quests the hardest and final quest is labeled dark castle , near the end of the quest you fight lord of the orgs (who is the boss in a previous quest) click on **his sword** when fighting him , then you will have a weapon that is weak to most creatures but can kill the end guy in one shot , otherwise i think that it is pretty much imposible.

Buy Mountaineering skills and Woodsman skills Now - cruise through all the mountains collecting goodies. Be sure and go south near the island w/ the Gargoyles - you should find at LEAST 1 Obsidian object - normally a weapon. Next teleport or take the boat to Swamptown - hit the mountain areas and lakes - you will find several more obsidian objects.
