

Using This Document

*As you've already discovered, navigate using the "Previous" and "Next" buttons at the bottom of the page. Or use the "Contents" in the menu bar to navigate to specific pages.

*Scroll down longer pages by clicking on one side or the other of the "Scroll" button at the bottom of the page.

*Use the Slideshow command under the word "Museum" in the Menu Bar to move rapidly through the clipart and get a fast idea of what its like.

*Print information in the usual way.

*Press "Command + C" to copy clipart or text to your clipboard. Then paste it in your scrapbook, word processor or paint document as needed. Email (charlie938@aol.com) if you need help. The copy command copies the entire contents of the page (text or graphic) to your clipboard.

*To change window size, click the small box in the upper right hand corner. This document will open in the smaller size, but may be awkward for reading the longer text.

Be sure to email (charlie938@aol.com) if you have any problems or questions.

Our thanks for the excellent work of Rustle Laidman for the excellent program we used to create this document!
