Beta 2. Jan. 2002

Read Me file for Macally Mouse/Trackball for Mac OS X

Thank you for using Macally USB product. This driver is to use with Macally Mouse/Trackball for OSX only. This driver is beta version and intended for product eval or test purpose only.

=====================
Installation / Uninstallation
=====================

To install the driver, simply copy the file Mouse/Trackball file into the "Application" folder and double click it. There are total three files are installed;
- Mouse/Trackball inside the "Application" folder.
- MacallyMouse.kext inside the "System" -> "Library" -> "Extensions".
- com.macally.mouse.pref inside the "Users" -> "User Name" -> "Library" -> "Preferences".

Due to the security implementation of the OSX, you can not delete these files unless booted from "root" mode. the easy way around is boot from OS9 and remove the files from their folder.

===========================
MINIMUM SYSTEM REQUIREMENTS
===========================

The following hardware and software are required to use Mouse/Trackball driver for Mac OS X:
- Operating system: Apple Mac OS X version 10.1
- Computer: Any PowerPC, G3, or G4 system supported by Mac OS X version 10.1 with a processor that is 266 MHz or higher.

==============
KNOWN ISSUES
==============

Speed control is not complete in this beta. Some minor adjustments are still needed and will be implemented in the final release.
