

## **Final Cut Pro 3.0 Settings for OS 10.1 Readme**

### **Installing the Final Cut Pro 3.0 Preference Files**

- You can either double click the file or goto the Contour ShuttlePro control panel under Target Application and select Import Settings

### **Using Multiple Settings**

- During the public beta you can only switch settings via Button 13 (Lower Right), once the driver is out of Beta you will be able to switch settings via the Dock.
- You MUST have both Final Cut Pro 3.0 and Final Cut Pro 3.0 (JKL) installed to be able to switch settings.

### **Future Settings**

- We will be releasing settings in the very near future for iTunes and iMovie.
- Please check [http://www.contourdesign.com/shuttlepro\\_mac.htm](http://www.contourdesign.com/shuttlepro_mac.htm) for future updates to the driver and to the settings.
