Classic? Visually lets you know if Classic is running or not from the Dock.
The Icon on the Dock glows green when Classic is running and is dimmed grey when it's not active.
The Dock icon provides a sub menu to Startup or Shutdown Classic without having to open the System Preferences.

This application is Freeware. You may use it on any machine you see fit. You may not Reverse engineer or decompile this application. You may not redistribute this application or any part of it's stuffed archive. This application is provided free as is and offers absolutely no warranty or guarantee   what - so - ever. It works for me YMMV. We are not responsible for any damages incured by use of this software.

We appreciate all feedback, comments and suggestions
